SUMMARY

QA Automation Engineer with **4+ years** of experience in Selenium-Java automation, API testing, CI/CD pipelines, and database validation. ISTQB Certified Tester with strong expertise in automation framework development, production support, and Agile delivery.

EXPERIENCE

QA Automation Engineer | SDET | RECSTECH Technology Pvt. Ltd. | Bengaluru | February 2022 – Present

- Experience working on DMS (Toyota) applications including Toyota My (mobile), Loyalty module (web), Body & Paint (web), and PKR Malaysian Election portal (web and mobile).
- Worked with Selenium-Java automation frameworks using **TestNG** with **basic Page Object Model structure.**
- Experience in executing automation suites using **Maven-based project setup.**
- Automated **180+ regression test cases**, reducing manual effort by **45%.**
- Hands-on experience in maintaining and enhancing existing automation scripts.
- Hands-on experience with **Java, Core Java.**
- Working experience with Linux-based environments.
- Experience with Git version control, branching, and conflict resolution.
- Hands-on experience in API testing and validation using **Postman** and **Swagger**.
- Experience in writing and executing SQL queries for backend data validation.
- Experience using GitHub Desktop for repository management.
- Used Jira for defect tracking and test reporting, basic exposure to Microsoft Azure.
- Strong understanding of SDLC and STLC processes.
- Experience executing automation suites through Jenkins CI/CD pipelines.
- Worked in Agile/Scrum methodology.
- Collaborated with developers and product owners to analyze requirements and improve test coverage.

PROJECTS

TOTOYA MY | RECSTECH Technology Pvt. Ltd. | March 2022 - Present

TOYOTA MY is a mobile application designed for end users. It offers multiple features to customers, such as, booking service appointments, tracking vehicle rides, providing 24/7 customer support, Enabling remote vehicle start, Access to various other functionalities.

Responsibilities:

- Designed and executed **manual and automated test cases** for mobile application.
- Automated regression test cases using **Selenium-Java and TestNG.**
- Performed **API validation** using Postman and Swagger.
- Provided **production support**, monitored logs using **Grafana**, and validated live issues.
- Participated in **Agile ceremonies** (Daily Scrum, Sprint Planning, Retrospective).

DMS -Loyalty| RECSTECH Technology Pvt. Ltd. | July 2023 - June 2024.

Loyalty module is a web-based application within the DMS project. This module is designed to award loyalty points to customers after the completion of their service appointments. It manages the full calculation logic for awarding points, which customers can later view in the Toyota My application. Customers could redeem and accrual these points.

Responsibilities:

- Designed and executed **manual and automated test cases** for mobile application.
- Automated regression test cases using **Selenium-Java and TestNG.**
- Performed **API validation** using Postman and Swagger.
- Provided **production support**, monitored logs using **Grafana**, and validated live issues.

DMS -Body and Paint | RECSTECH Technology Pvt. Ltd. | June 2024 - Present.

TOYOTA MY is a mobile application designed for end users. It offers multiple features to customers, such as, booking service appointments, tracking vehicle rides, providing 24/7 customer support, Enabling remote vehicle start, Access to various other functionalities.

Responsibilities:

- Designed and executed **manual and automated test cases** for mobile application.
- Automated regression test cases using **Selenium-Java and TestNG.**
- Performed **API validation** using Postman and Swagger.
- Participated in **Agile ceremonies** (Daily Scrum, Sprint Planning, Retrospective).

PKR| RECSTECH Technology Pvt. Ltd. | Feb 2022 – May 2022.

This is a web and mobile-based application developed to manage the election process for Malaysian parties. The platform allows users to create and complete elections efficiently. It supports different access levels based on user roles, ensuring role-based security and control. The application enables both online and offline voting, with multiple layers of security authentication to ensure secure and reliable voting.

Responsibilities:

- Designed and executed **manual and automated test cases** for mobile application.
- Automated regression test cases using **Selenium-Java and TestNG.**
- Performed **API validation** using Postman and Swagger.
- Participated in **Agile ceremonies** (Daily Scrum, Sprint Planning, Retrospective).

HLA| RECSTECH Technology Pvt. Ltd. | June 2022 – Feb 2023.

HLA is an iOS-based insurance project where I worked within the insurance domain. This project involves systems and services that provide financial protection against various risks such as health issues, vehicle damage, property loss, and life coverage. The application offers multiple types of insurance products, including Life Insurance, Health Insurance, Motor/Vehicle Insurance, and Home/Property Insurance.

Responsibilities:

- Designed and executed **manual and automated test cases** for mobile application.
- Automated regression test cases using **Selenium-Java and TestNG.**
- Performed **API validation** using Postman and Swagger.
- Participated in **Agile ceremonies** (Daily Scrum, Sprint Planning, Retrospective).

CERTIFICATION

- ISTQB Certified Tester – Foundation Level (March 2024).

EDUCATION

Bachelor of Engineering| SAVITRIBAI PHULE PUNE UNIVERSITY| 2021 | 7.2 CGPA

SKILLS

- Automation Testing: Selenium WebDriver, TestNG, Cucumber.
- Language Expertise: Java, Core Java, SQL, HTML.
- API Testing: Postman, Swagger.
- Mobile Testing: Android, iOS, Browser Stack, Scrcpy.
- Database Testing: Microsoft SQL Server.
- Project Management: Jira.
- Other Tools: Grafana, Azure, Git, GitHub Desktop, Jenkins, CI/CD.
- Methodology: Agile, Scrum, SDLC, STLC.
- Operating system – macOS, Windows, Linux.
