.

Summary

Senior Backend Engineer with nearly **8 years** of experience building highly scalable distributed systems, specializing in Go. Passionate about designing robust distributed backend systems with a focus on performance, scalability, and operational reliability.

Technical Skills

Languages	Go (primary), Java, Python, Shell/Bash
Cloud & Infra	Kubernetes, Docker, Helm, Jenkins, Linux
Messaging/Streaming	Kafka, gRPC, REST
Databases & Storage	MySQL, MongoDB, GDS
Monitoring & Observability	SignalFx, Datadog
CI/CD & Automation	Jenkins, Harness

Work Experience

PayPal Pvt Ltd. Jan. 2022 – Present

Team: Developer Productivity and Experience (SDE-2)

- Led the development of Manifestserv, a critical service within the Genesis Experience team, managing the complete lifecycle of manifests in the PayPal Deployment environment, while ensuring operational reliability aligned with six nines availability.
  Stack: Golang; MongoDB; Gin.
- Designed and developed the PromoService, a key service within PayPal's CI/CD pipeline, to automate the promotion of manifests and images from development to production environments. This service streamlines the deployment process for all applications, ensuring tested manifests are promoted to production.
  Stack: Golang; python; Kubernetes; MySQL; Google Datastore.
- Contributing to the Genesis/ harness platform, PayPal's standardized platform for continuous integration, continuous delivery, and deployments across its environments.

Robert Bosch Engineering & Business Solution Pvt Ltd. Aug. 2017 – Jan. 2022

Team: CTRLX Industrial Automation (Senior Software Engineer)

- Developed the CTRLX Task Manager, a core monitoring tool for applications (snaps) running on the CTRLX platform. Contributed to the CTRLX App Validation Framework, ensuring application (snap) compliance with snapcraft specifications.
- Implemented an efficient, event-driven architecture using server-sent events (SSE) to retrieve information at defined time intervals.
- Developed and deployed a Performance Dashboard using a Python web framework, providing critical insights to the onsite team.

Education

BE Electronics and Communication (SJCE University) Aug. 2013 - May. 2017
