SUMMARY

AWS DevOps Engineer with **5 years of experience** supporting cloud infrastructure and application deployments in production environments. Strong hands-on experience with **AWS services** including EC2, EKS, VPC, IAM, S3, Route 53, and Load Balancers, along with Linux system administration.

Experienced in building and maintaining **CI/CD pipelines** using **AWS CodePipeline**, **Azure DevOps**, Jenkins, and Git-based workflows. Integrated **JFrog** for artifact management and **Veracode** for build and code security scanning as part of CI/CD processes.

Strong experience with containerization and orchestration using **Docker** and **Kubernetes**. Regularly involved in **production support**, troubleshooting, and root cause analysis, working closely with application and security teams to ensure stable and reliable delivery.

EXPERIENCE

AWS and DevOps Engineer

Reaktr.ai - full time | 04/2024 - Present | Pune

Company Description

- Worked extensively on AWS services including **EC2, EKS, VPC, IAM, S3, Route 53, CloudWatch, and Application Load Balancers** to support production application and infrastructure workloads.
- Implemented end-to-end CI/CD pipeline using **AWS CodePipeline** and Azure DevOps, improving deployment speed, consistency, and collaboration across development and operations teams.
- Built and maintained CI/CD pipelines using AWS CodePipeline and **Azure DevOps** for regular application deployments.
- Integrated **JFrog** for storing and managing build artifacts and **Docker** images across environments.
- Added **Veracode** security scans into CI/CD pipelines to identify vulnerabilities before production releases.
- Deployed and managed containerized applications on **Kubernetes** EKS and GKE using deployments, services, secrets, and Configmaps.
- Configured Kubernetes Ingress and service exposure for application access.
- Integrated Docker builds into CI/CD pipelines for automated container delivery.
- Used **Terraform** to provision and manage AWS, including EC2, EKS, networking, and related resources.
- Maintained and updated Terraform code to support infrastructure changes and reduce configuration drift.
- Configured AWS **Route 53** hosted zones, DNS records, and routing policies to direct traffic to EC2 instances, S3 buckets, and load balancers.
- Performed **EKS cluster** and node group upgrades with minimal service disruptions.
- Managed cloud migration activities across AWS and GCP, improving infrastructure scalability, reliability, and deployment efficiency.
- Managed **Linux OS patching** using BigFix, applying security and critical updates across servers to maintain compliance and reduce vulnerabilities.
- Upgraded and managed **SSL certificates** on Linux servers, ensuring secure HTTPS communication.

SKILLS

AWS | GCP | Azure | EC2 | VPC | IAM | Route53 | Lambda | S3 | RDS | ELB | Azure Devops | AWS CodePipeline | Jenkins | Docker | Kubernetes | EKS | GKE | Terraform | Ingress | Jfrog | Veracode | Crowdstrike | Load Balancer | GIT | GitHub | Cloud Migration | EKS Cluster Upgrade | Linux | Bash Script | BigFix | Cloudwatch | Grafana | Linux Patching | SFTP

PROJECTS

FreeIPA Setup for SFTP in Linux

- Installed and configured **FreeIPA server** on Linux for centralized authentication and authorization management within the same subnet.
- Set up **SFTP service** on the Linux server by installing **OpenSSH** and configuring **sshd_config** to allow **SFTP** connections.
- Integrated **FreeIPA** with **SSH keys** for user authentication and configured user access permissions for secure file transfers.
- Configured **FreeIPA client** on the SFTP client machines to authenticate using **FreeIPA credentials** for centralized management of user access.

Multi-Cloud Application Migration & DevOps Automation

- Executed end-to-end multi-cloud migration by provisioning EC2 instances, S3 buckets, Kubernetes (EKS) clusters, and implementing DNS cutover with Route 53 to ensure scalable and minimal-downtime deployments.
- Designed and automated CI/CD pipelines for containerized applications, integrating Docker, Kubernetes, and CloudFront cache invalidation to enable reliable, efficient application releases.

EXPERIENCE

AWS and Linux Engineer

Exela Technologies - full time 09/2022 - 04/2024 Pune

Experienced AWS & Linux Engineer with expertise in **cloud infrastructure, server migration, patching, security, and automation**. Skilled in managing **EC2, S3, RDS, Kubernetes (EKS), IAM, and VPC** with a strong focus on performance, security, and scalability.

- AWS Infrastructure (EC2, S3, VPC, IAM)
- Server Migration & Linux Patching
- Managed Kubernetes Deployments, Services, and Pods on Amazon EKS. Deployed frontend applications to Amazon S3 and configured static website hosting.
- Managed Azure DevOps and tasks for application deployments and infrastructure work.
  Created and maintained CI/CD pipelines in Azure DevOps for frontend and Java-based applications.
- EKS Cluster Upgrade and Node Upgrade
- Linux Administration (Apache, HTTPD, Tomcat)
- Installed and configured Apache HTTP Server with SSL on Linux systems, including generating and installing SSL certificates and configuring SSL virtual hosts in Apache configuration files (httpd.conf / ssl.conf) to enable secure HTTPS connections.
- Coordinated with **Sectigo** for obtaining and validating the new private SSL certificate.
- Configured and installed the upgraded certificate on web servers (Apache, Nginx) and verified correct installation.
- Updated the **certificate chain** to support the latest security protocols (TLS 1.2/1.3).
- Deployed Java web applications (**WAR files**) to **Tomcat's webapps directory** and ensured proper initialization.
- Monitoring & Troubleshooting (CloudWatch)

Cloud Engineer

Quadron iSolutions Pvt. Ltd. · Full-time

06/2022 - 09/2022 Pune

Cloud Engineer with hands-on experience in managing **AWS infrastructure** and **Linux servers**. Worked with **EC2, S3 and IAM** for provisioning, access control.. Involved in **server deployments, monitoring, security configurations, backup operations, and troubleshooting**.

- Managed AWS resources including EC2, S3, RDS, VPC, and IAM.
- Created and managed IAM users and basic policies.
- Configured Security Groups and performed access checks.
- Assisted in Dockerizing applications and deploying to Amazon EKS.
- Performed backup and restore activities using snapshots and AWS Backup.
- Troubleshot application and server-level issues.
- Created and maintained IAM users, roles, and policies.
- Configured security groups and performed SSL/TLS certificate updates.
- Containerized applications using Docker and deployed workloads on Amazon EKS.
- Monitored infrastructure using CloudWatch metrics, logs, and alarms.

DevOps Engineer

Aventior 07/2021 - 05/2022 Pune

DevOps Engineer experienced in supporting AWS infrastructure and Linux servers. Hands-on with **EC2, S3, IAM**, basic **Docker and Kubernetes (EKS)** usage, **CI/CD pipelines**, and **monitoring**. Involved in **application deployments, troubleshooting, security configurations, and backup operations**.

- Support on Jenkins, Bitbucket and Bitrise.
- Deployed applications on Linux servers using Apache and Tomcat.
- Performed backup and restore activities using snapshots and AWS Backup.
- Troubleshot application and server-level issues.
- Created and maintained IAM users, roles, and policies.

EDUCATION

Bachelor of Science

Dr. Babasaheb Ambedkar Marathwada University

2016 - 2019 Chh. SambhajiNagar

CERTIFICATION

Amazon Web Services Solutions Architect Associate

Amazon Web Services (AWS)

Red Hat Certified Engineer (RHCE)

Red Hat

Red Hat Certified System Administrator (RHCSA)
