Experience

IBM **September 2023 - Present**

AI Engineer

- Designed and implemented LLM-powered backend services in Python for enterprise GenAI use cases, including retrieval-augmented generation (RAG), entity extraction, code transformation, and agent-driven workflows using IBM watsonx.
- Built agentic AI pipelines capable of reasoning over context, invoking tools/APIs, and producing structured outputs with schema validation (Pydantic), emphasizing correctness, determinism, and auditability.
- Developed RAG architectures integrating document chunking, embedding pipelines, vector search, reranking, and prompt orchestration; optimized retrieval quality and response grounding for domain-specific data.
- Implemented production-ready APIs using FastAPI, handling long-running inference, streaming responses, and error recovery; addressed real-world issues such as timeouts, latency, and partial failures.
- Contributed to LLM orchestration and evaluation workflows, including prompt iteration, output validation, and failure analysis to improve reliability across multiple enterprise domains.
- Collaborated with cross-functional teams (product, architects, security) to align AI solutions with enterprise constraints, including data access control, explainability, and safe deployment practices.
- Supported multiple enterprise deployments by hardening prototypes into reusable AI components and patterns, accelerating downstream teams building customer-facing and internal AI applications.

HFCL 5G R&D **July 2022 – September 2023**

Assistant Manager

- Designed and deployed NLP pipelines to process large volumes of customer call transcripts and network logs, transforming unstructured data into structured technical insights used for root-cause analysis in 5G radio access networks.
- Built and evaluated deep learning models for real-time QoS optimization, enabling dynamic tuning of radio and network parameters to improve coverage, throughput, and connection reliability under live traffic conditions.
- Engineered end-to-end ML workflows, including data preprocessing, feature extraction, model training, validation, and inference integration with network monitoring systems.
- Worked closely with network engineers and operations teams to translate field issues into model-driven decision support, improving mean time to detect and resolve network performance degradations.

Swiftprep **May 2020 – February 2022**

Co – Founder

- Conceptualized and launched Swiftprep, an ed-tech platform focused on simplifying exam preparation through concise, high-impact study materials.
- Led product development, ensuring content clarity and optimized learning paths for students targeting competitive exams.
- Oversaw content strategy, collaborating with subject matter experts to create concise, result-oriented study modules.
- Drove user acquisition and engagement strategies, helping students improve performance with reduced preparation time.
- Managed end-to-end operations, from content design and technology roadmap to marketing and customer feedback loops.

Internships

- **NicheSolv Pvt Ltd:** Trained CNN models (VGG16) to detect players and classify tennis strokes for performance analysis.
- **ArtPark IISC:** Developed vision algorithms for object detection and pose estimation in a domestic cleaning robot.
- **Niramai Health Analytix Pvt Ltd:** Worked on Thermalytix, a thermal imaging tool for early breast cancer detection.
- **CDSAML (PES):** Developed an NLP model to analyse tweets and extract public sentiment around the 2019 Indian Lok Sabha Elections

Skills

- **Technical Skills:** LLM, Prompt Engineering, RAG, NLP, Tensorflow, Computer Vision, Machine Learning, Python, ReactJS, Solution Architecture
- **Agentic Frameworks:** LangGraph, Langchain, CrewAI
- **Market Skills:** Client Engagement, Executive Communication, Technical Presales

Defense Publications

- AI Agents assisted vertical Mega Farming
- AI Assisted Personalised Memory Bank

Education

PES University, Bengaluru — **July 2018 – May 2022**
B.Tech, Electronics and Communication Engineering — *CGPA : 9.35*

Sri Bhagawan Mahaveer Jain College — **July 2016 – March 2018**
Class 12th — *94% (Overall) 99.8%(PCME)*

Bishop Cotton Boys School, ICSE — **July 2004 – March 2016**
Class 10th — *95%*

Awards and Achievements

- Prof. C N R Rao Merit Scholarship
- Prof. M R Doreswamy Merit Scholarship
- 2nd place in the Best Project category at Intel Technovation Contest 2020
- Secured 10th rank in BTech at PES University
- ACE Alliance Award at HFCL 2022
- Growth Award at IBM 2025
