Professional Summary

Cloud & Platform Engineer with 5+ years of experience designing and operating secure, scalable cloud-native infrastructure across Azure and AWS. Expertise in Terraform-based infrastructure automation, Kubernetes platform engineering (AKS/EKS), CI/CD and GitOps delivery, DevSecOps security integration, OIDC-based authentication, and enterprise RBAC governance. Proven ability to improve deployment reliability, platform security, and operational efficiency through automation and production-grade cloud architecture.

Skills

- **Cloud Platforms:** Azure, AWS
- **Infrastructure as Code:** Terraform (modules, remote state, state locking), ARM Templates, CloudFormation
- **Containers & Platform Engineering:** Kubernetes (AKS, EKS), Helm, Argo CD, Ingress Controllers, Envoy Gateway, Docker
- **CI/CD & GitOps:** Jenkins , GitHub Actions, Azure DevOps, Git, JFrog Artifactory, CI/CD Pipelines
- **Security & Access Control:** IAM, VPC/VNet, Load Balancers, Azure Firewall, AWS Security Groups, mTLS, OIDC/OAuth2, RBAC, DevSecOps, Trivy, SonarQube, Secrets Management
- **Observability & Reliability:** Prometheus, Grafana, CloudWatch, Azure Monitor
- **Scripting & Programming:** Bash (Shell Scripting), Python, Java (Spring Boot – Basic)

Professional Experience

Temenos, Bangalore — Associate Product Engineer – Cloud & Platform Engineering *(March 2022 – present)*

- Automated production Azure infrastructure using Terraform modules, provisioning VNets, AKS clusters, and security components with remote state management to enable consistent multi-environment deployments.
- Engineered secure Azure networking and governance architecture with Azure Firewall, Application Gateway, and policy-driven resource controls, ensuring high availability and compliance for production workloads.
- Provisioned AWS cloud infrastructure via Terraform, deploying VPCs, EKS clusters, ALB/NLB load balancing, Aurora PostgreSQL, EFS, and S3, achieving fully repeatable environment isolation across stages.
- Operated a shared-services Kubernetes DevSecOps platform running Jenkins, Argo CD, Keycloak, SonarQube, Prometheus, and Grafana, implementing OIDC-based SSO, centralized RBAC, secure CI/CD pipelines, and GitOps delivery governance.
- Established cluster-wide observability and alerting with Prometheus, Grafana, and Alertmanager, improving incident visibility and response effectiveness.
- Automated Apache ActiveMQ Artemis deployment with private TCP NLB, VPC Endpoint Services, and Route 53 DNS, enabling secure domain-based service connectivity within AWS.
- Architected enterprise-grade Kubernetes platform security integrating GitOps, SAST and container scanning, secure ingress, enterprise secret management, and Keycloak-based SSO, enabling compliant cloud-native operations.
- Supported production releases, defect triage, and incident resolution across Azure and AWS environments, maintaining reliable service continuity.

Infosys, Bangalore — *Systems Engineer (Jan 2021 – Dec 2021)*

- Completed Infosys Foundation Training covering core programming fundamentals, including Java, Python, SQL, and object-oriented programming (OOP) concepts.
- Supported Snowflake data warehouse operations by developing Bash shell scripts and SQL queries for data management, validation, and operational tasks.

Certifications

- Simplilearn Certified AWS Solutions Architect – Associate
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Cloud Foundation

Education

- B. Tech in Electrical and Electronics Engineering I CGPA: 7.75
- Sree Vidya Nikethan Engineering College, Tirupati, Andhra Pradesh
- Graduation: 2016 - 2020
