SUMMARY

Detail-oriented and proactive Software Developer with hands-on experience in Python, SQL, Docker, and DevOps tools. Skilled in building scalable applications, ETL pipelines, and process automation. Strong collaborator with a focus on data migration, cloud infrastructure, and continuous integration. Eager to contribute technical skills to a dynamic team.

EDUCATION

Lovely Professional University — Aug 2020 – Jul 2024
Bachelor of Technology (BTech) - CGPA - 8.36 — Jalandhar, India

COURSEWORK / SKILLS

- Data Structures & Algorithms
- Python Programming
- OOPS Concept
- Agile Process
- Devops Tools &CI/CD
- SQL/NOSQL
- Java

EXPERIENCE

Broadridge Financial Solutions — Bengaluru, India
Software Engineer — Jul 2024 – Present

- Assigned to the Data Migration Development Team with the following responsibilities:
  - Developed and optimized ETL (Extract, Transform, Load) processes to facilitate seamless data migration from legacy systems to new platforms.
  - Built and automated scripts to reuse across 250+ PRs and improved deliverable time lines by 15%.
  - Migrated from Datawatch to AWS Systemware and reduced monthly cost by 20%.
  - Collaborated with cross-functional teams to define data mapping, data cleansing, and transformation rules for successful migration to target systems.

Broadridge Financial Solutions — Bengaluru, India
Software Engineer Intern — Jan 2024 – Jul 2024

- Assigned to the Digital Onboarding Dev Team with the following responsibilities:
  - Led client onboarding initiatives utilizing the DOCM tool, ensuring seamless integration and efficient workflow management.
  - Created an innovative automation tool that reduced 12+ hrs/week manual effort in client onboarding, streamlining the process and ensuring faster adoption of the DOCM system.

TECHNICAL SKILLS

Languages: Python, Java, SQL, NoSQL, PowerShell, Shell Scripting
Frameworks : Django, Jenkins, Docker, Linux, Git, Behave (BDD)
Technologies: Cloud (AWS,AZURE), Tableau, MS Excel, CI/CD, Rest APIs

PROJECTS

Random Data Generator | Java (JDBC), SQL, Docker — Mar 2023

- Created a Java (JDBC) program that connects to MySQL to generate random data for columns at regular intervals.
- Built and deployed the application using Docker, ensuring changes made in MySQL bin are reflected upon running the program.
- Utilized Docker for containerization, Deploying and Postman for API testing.

Online Crime Investigation | Python, SQL — Jul 2022

- Developed an application using Python and its libraries (Tkinter, PIL, SQL Connector) with a proper interface for recorded data of criminals, which is also stored at the backend.

CERTIFICATIONS & ACHEIVEMENTS

- Java Programming — Udemy
- SQL Foundation — Udemy
- Data Structures & Algorithms — GFG
- Python Programming — Coursera
- Received ACE Award for leading and delivering an automation tool at Broadridge. — Broadridge, India
- Solved 200+ problems on LeetCode.

LEADERSHIP

- Mentored 2 juniors and 3 contract associates on Python, AWS, and PowerShell.
- Led the Migration Automation – Python Comparison Tool project at Broadridge.
- Actively contributed to Agile processes and sprint automation improvements.
