Technical Skills

Backend & Server	Node.js, Express.js, REST APIs, Redis, PostgreSQL, MongoDB, Caching, Rate Limiting, RBAC, Microservices
Infra & DevOps	Docker, Kubernetes, CI/CD Pipelines, Nginx, Azure, AWS, Git, Github
Frontend & UI	React.js, Next.js, TypeScript, Tailwind CSS, shadcn/ui, Redux, React Query, Zustand, Figma

Technical Experience

SDE 1 | **Brysk INC** *Jan 2025 - Current*

- Designed and maintained **Node.js backend microservices** and **REST APIs** with store-level data isolation to manage pricing rules,historical price data, and high-volume sales transactions across multiple retail locations.
- Implemented Moneris Tap & Go payment system with **Redis-backed retry and failure-handling logic**, replacing the store application and enabling direct backend-driven payment and pre-authorization processing via secure REST APIs.
- Integrated real-time **WebSocket-based backend workflows** with backend payment logic to automate coffee machine operations, ensuring reliable cashless transactions through proper failure and retry handling.
- Enhanced a video-based labeling workflow by integrating **real-time streaming and analytics pipelines using WebRTC**, increasing operational efficiency and reducing manual intervention.
- Developed and released production-grade **iOS (.ipa)** and **Android (.apk)** applications using **React Native**, implementing scheduled **cron-based background jobs** to automate inventory monitoring for empty, expiring, and damaged products, triggering store-level push notifications and reducing stock discrepancies by **10%**
- **Tech Stack:** React.js | Node.js | Postgress | Redis | Microservices | Docker | Kubernetes | Azure | CI/CD | React Native | WebRTC

Freelance | Contract Jobs

Full Stack Developer | **Renthunter.nl (Netherlands)** | **Work Mode - Remote** *June 2024 - Aug 2024*

- Optimized **AWS S3** infrastructure to cut storage **costs by 50%**, implementing a **serverless** image compression pipeline that significantly decreased page load latency and **improved Core Web Vitals**.
- Built a **production monitoring and alerting system** using Cron jobs and Slack API integrations, reducing production downtime and accelerating incident resolution times by **25%**.
- **Tech Stack:** React | Tailwind CSS | Node Js | MongoDB | Sentry | Puppeteer | CronJobs | AWS S3 | Nginix

Node js & React Js Developer | **Kluff (USA)** | **Work Mode - Remote** *Dec 2023 - June 2024*

- **Developed** a scalable frontend for a targeted messaging platform using **React.js**, enabling efficient email campaign management and precise audience **segmentation**.
- **Automated** a high-volume **data extraction pipeline** to migrate **15,000+ email templates** into ERP systems, leveraging **GoLang modules** to handle high-concurrency processing and reduce execution time.
- **Tech Stack:** React | Node Js | Express Js | GoLang | Typescript | Python | Docker | Postgress

Projects

Slink - URL Shortening Platform (Microservices) Github | Live

- Designed a high-throughput **Node.js-based backend system** using a **microservices architecture**, capable of handling concurrent URL creation and redirection requests with low latency.
- Implemented **Redis-based caching and rate limiting**, and configured **Nginx as a reverse proxy** to route requests to backend services, reducing database load and optimizing redirect performance under high traffic conditions.
- Built scalable backend services for **link creation, redirection, click tracking, and analytics**, deploying **Dockerized services on Azure** with independent scaling and fault isolation to ensure reliability and performance.
- **Tech Stack:** Next.js | Tailwind CSS | Node.js | MongoDB | **GoogleOAuth** | Docker | Azure | Microservices | Nginx

Education

B. Tech Computer Science and Engineering CGPA: 8.25
Vellore Institute of Technology, Bhopal 2021-25

Achievement

- Secured a **Top 10** Rank out of **1600+ teams** in the Rajasthan Police Hackathon 1.0 for the **Kavach** security platform.
- Selected as a University-level **Finalist in the Smart India Hackathon** for innovative software product development.
- Achieved Leetcode ranking of 182,351 with 410+ questions solved. Max contest ranking of **1600+**
