PROFESSIONAL SUMMARY

Experienced Software Engineer specializing in .NET back-end development with a proven record of designing secure, high-quality production code. Skilled in **C#**, **Web API**, **and .NET Core, SQL, React, Angular** with demonstrated expertise in **unit testing**, debugging, and agile methodologies. Proficient in utilizing Azure DevOps and Git for version control and continuous integration, while effectively developing RESTful APIs and integrations that enhance system performance.

TECHNICAL SKILLS

- **Programming Languages**: **C#**
- **Frameworks & Technologies: .Net Core**, NET CORE Web API, **Entity Framework**, ASP.Net MVC, **React**.
- **Database Skills**: SQL Server,MS SQL
- **Tools**: Git, Azure DevOps, GitHub, Visual Studio, VS Code, CI/CD, **SonarQube,Jira,ElasticSearch,Kibana,Service Now**
- **Cloud Services**: Azure Cloud, CI/CD pipelines, **Application Insights,** Azure Services(App services, Function, Blob Storage, SQL, Cosmos DB, Azure Key Vault, Service Bus).
- **Data Streaming & Pipelines:** Kafka
- **Testing**: **Xunit** Unit/End-to-End Testing,Moq
- **Load Balancer**- IBM;'s F5 Load Balancer
- **APIs & Authentication**: RESTful APIs, JWT, OAuth2
- **DevOps**: Azure DevOps, GitHub
- **Methodologies**: Agile, Scrum, Waterfall, Unit Testing (Xunit), Code Reviews
- **API Development & Testing:** NET CORE Web API, Swagger, Postman, Soap UI
- **Emerging Technologies**: Artificial Intelligence
- **Gen AI Experience**: Effectively utilized GitHub Copilot as an AI-powered assistant to enhance development efficiency while maintaining full control over code quality., Used Copilot to generate boilerplate code, explore alternative solutions, and accelerate repetitive tasks, allowing more focus on complex problem-solving and architectural decisions.

PROFESSIONAL EXPERIENCE Nihilent Limited May 2022 - Present

Senior Software Engineer - Backend Developer *Pune, India*

- **Engineered Data Pipelines for Business Intelligence:** Developed a data streaming solution using **Kafka** to provide real-time transaction data (e.g., account status, feature usage) to a dedicated data warehouse. This enabled downstream teams to create dashboards and reports for business stakeholders, facilitating data-driven decision-making
- Engineered a **secure RESTful API solution using C#** and .NET Core for customer queries on undelivered card shipments by integrating with Microsoft Dynamics 365 Customer Service. Collaborated with the **D365 team** to design API endpoints with OAuth 2.0 authentication that logs issues as cases with unique identifiers.
- **Developed Expense Management API:** Built and maintained an external-facing API that captures user credit card usage data by category. This data was provided to external vendors, enabling them to analyze user engagement and provide targeted offers.
- Implemented a robust RESTful API integration with a delivery company's system to retrieve real-time user data and live delivery statuses. Employed asynchronous data fetching and caching strategies to optimize performance, resulting in a 15% boost in customer engagement.

- Achieved 95% unit test coverage with xUnit, significantly reducing deployment errors by 30% and ensuring high-quality production code.
- Achieved rapid project completion, delivering the solution in just 50% of the allocated time, demonstrating efficiency and technical expertise
- Optimized CI/CD pipelines in Azure DevOps to cut deployment time by 25%, reinforcing agile practices and operational stability in a large corporate environment.

EDUCATION Chandigarh University May 2022

Bachelor of Engineering (B.E), Computer Science

KEY PROJECTS

CCI(Corporate Card Issuing)

•Security Integration: Implemented JWT/OAuth2 for secure third-party API access.
•Mobile Responsiveness: Enhanced cross-device compatibility, reducing mobile load time by 20%.
- Authored comprehensive technical documentation that reduced onboarding time for new developers by 25%, supporting effective knowledge transfer and sustainable software design.

Brolink - Insurance Platform | ReactJS Pages

- Insurance based web application assisting short term insurance brokers in serving policyholders in growing their businesses.
- Designed and developed the User Interface and experience for an insurance platform, creating a marketplace that connects insurance providers with potential customers while helping users f ind the best deals.
- Crafted intuitive front-end flows and built responsive UI components using ReactJS and Formik, performed validation, improving user engagement and interaction.
- Integrated and tested REST APIs using Swagger and Postman

Portfolio Website

- Developed a responsive portfolio website showcasing technical skills, professional experience, and key projects.
- Integrated a custom AI-powered resume and cover letter generator using the Gemini API.
- Hosted the application on GitHub Pages for live access.

Movie Finder App

- Developed a responsive movie search application using React and Tailwind CSS.
- Implemented a skeleton loading state for a smoother user experience while fetching data from The Movie Database (TMDb) API.
- Integrated the Gemini API to provide AI-generated summaries for movies, showcasing skills in modern API integration and emerging technologies.

Recruiter CRM Web App

- Built a full-stack web application with React and Firebase for managing recruiter contacts.
- Implemented secure data storage using Firestore and used Firebase Anonymous Authentication to provide a private, unique space for each user.

ACHIEVEMENTS Top Performer Award

- Recognized for leading critical enhancements to Nedbank's financial platform
- Improved legacy module performance by 25% via SOLID principles.
