Professional Summary:

A highly skilled and results-driven software developer with above 3 years of experience in full-stack development, specializing in C# (.NET Core Web API) and Angular. In my most recent role at R Systems, I led the development and integration of scalable Logistics Dashboard Web APIs, focusing on shipment management, driver monitoring. I also built and maintained a responsive Angular UI that seamlessly integrated real-time data from backend services. Previously, at TCS, I gained hands-on experience in developing enterprise-grade applications in designing and maintaining scalable web applications with a focus on quality, security, and performance. Led the development of critical solutions for healthcare clients like Humana, ensuring seamless integration and data protection. Skilled in code reviews, debugging, performance optimization, and building responsive UIs with real-time data integration. Committed to continuous learning and applying best practices to enhance user experiences.

Technical Skills

- **Programming Languages:** C#, C, C++, Python , TypeScript, JavaScript, HTML5, CSS3
- **Software Framework:** .NET Core, ASP.NET , Angular, Angular CLI
- **Styling/Design**: Bootstrap, Material Design, Angular Material
- **Database Management:** SQL, SQL Database Administration
- **Cloud Computing:** AWS Cloud , Azure Cloud
- **Tools & Environments:** Visual Studio, Visual Studio Code, Postman , Toad , Sql Server Management Studio
- **Software Development Practices:** Object-Oriented Programming (OOP)

Experience

Technical Developer, Tata Consultancy Services (TCS) | July 2022 – April 2025 (2 Years 10 Months)

- **Scriptmed(SMED) Development (2.7 Years) - C# (.NET Core Web API) , AWS , Azure**
  - **SMED Development & Integration** Led the design, development, and maintenance of scalable Web APIs for Humana's SMED application, ensuring seamless integration with existing healthcare systems.
  - **Quality, Security & Optimization:** Conducted code reviews, performance optimizations, and implemented industry-standard security practices to enhance API reliability and protect sensitive healthcare data.
- **Clinical Development (1.5 Years) - - C#.(NET Core Web API) , Azure , Angular**
  - **Clinical Development** : Developed and maintained a responsive Clinical UI for Humana, enhancing user experience with dynamic components in Angular and real-time data integration via RESTful APIs..
  - **Collaboration & Quality**: Worked with the dev team to resolve front-end issues, ensuring seamless functionality and optimal performance.

Software Engineer, R Systems International LTD | May 2025 – Oct 2025 (6 Months)

- **Logistics Platform Development -C# (.NET Core Web API) and Angular (6 Months)**
  - **Logistics API Design & Integration**: Led the development and integration of scalable Web APIs for Logistics Dashboard, focusing on real-time fleet tracking, shipment management, and driver monitoring, while ensuring high security and performance.
  - **Logistics UI :** Built and maintained a responsive Angular UI for the dashboard, providing real-time updates and seamless user interactions with backend data via RESTful APIs.

Internship & Industrial Training

- Building data lake in AWS for tour and travel Business | TCS | Issue Date :23/04/2022 | Duration: 4 months
- IBM : Essentials of AI | Duration :15 days
    - Basics of IBM Watson & Chatbot Building

Job Responsibilities

Project: SMED Application for Humana (American Health Insurance Company)
Role: System Engineer
Technologies Used:

- **Visual Studio Version:** 2022
- **Target Framework & C# Version:** .NET 6.0 **,** C# 10.0
- **Cloud Platform :AWS**

Key Responsibilities:

- **API Development and Integration:**
    - Designed and maintained RESTful APIs for **Patient, Order, and Prescription** repositories. Integrated OpenAPI (Swagger) for interactive documentation and API exploration. Ensured robust API testing with Postman, meeting all business requirements.
- **Authentication and Security:**
    - Implemented **OAuth** using Google APIs and JWT Bearer authentication for secure API endpoints. Managed token-based actions such as email confirmation and 2FA with Microsoft.IdentityModel.Tokens **.**
- **JSON and Data Processing:**
    - Managed JSON serialization and deserialization to streamline data handling using advanced tools like Newtonsoft.Json and System.Text.Json. Optimized database interactions using **Dapper** ORM for efficient SQL queries and data handling.
- **Logging & Monitoring:**
    - Configured detailed logging with **log4net** and structured logs using **Serilog** for better application monitoring. Enhanced debugging and visibility during development with console logs and efficient error tracking.
- **Testing, API Testing & Data Privacy Standards:**
    - Conducted extensive unit and integration testing using Microsoft.AspNetCore.Mvc.Testing to ensure API reliability and proper functionality. Performed API testing with **Postman** to validate all endpoints. Ensured data privacy compliance with industry standards like **HIPAA**, ensuring secure handling of sensitive healthcare data.
- **Token Management:**
    - Utilized Microsoft.IdentityModel.Tokens for securing user-related actions such as email confirmation, password resets, and two-factor authentication.
- **AWS Cloud Management & Infrastructure (1 yr experience):**
    - Deployed a scalable .NET API on AWS Elastic Beanstalk / ECS with Amazon Cognito for authentication and RDS (SQL Server) for data storage and Amazon OpenSearch Service for advanced search functionality and analytics.
    - Implemented CI/CD using CodePipeline and CodeBuild, with monitoring via CloudWatch, X-Ray, and CloudTrail.
    - Enhanced security using WAF, ACM, and Secrets Manager for encryption and threat protection.
- **Azure Cloud Management & Infrastructure (1.7 yr experience):**
    - Deployed a scalable NET API on Azure App Service with Azure AD authentication, Azure SQL for storage, and CI/CD pipelines via Azure DevOps.
    - Enhanced security using WAF, ACM, and Secrets Manager for encryption and threat protection.

Project: Clinical Application for Humana (American Health Insurance Company)
Role: System Engineer
Technologies Used:

- **Visual Studio CodeVersion:** 1.96.0
- **Target Frameworks :** Angular Version 16.2 , Typesript 5.0.0 , .NET 6.0 **,** C# 10.0

Key Responsibilities:

- **Component Development and Performance:**

- Developed reusable Angular components and a scalable architecture using **Angular**. Optimized app performance with lazy loading and designed responsive UIs with **Angular Material**, **NG Bootstrap** and custom Sass styling.

- **State Management and API Integration:**
  - Managed complex state with **NgRx** and **RxJS** for asynchronous data handling. Integrated backend services using Angular HTTP, optimizing API calls and error management.
- **Forms, Validation & Testing:**
  - Built dynamic forms with Angular forms including client-side validation for healthcare data. Used **Jasmine** for unit and integration tests to ensure component functionality.
- **Azure Cloud Management & Infrastructure:**
  - Deployed **.NET microservices** using **Azure Container Apps** integrated with Azure Container Registry (ACR) and Azure API Management for secure and scalable service orchestration.
  - Automated builds and deployments via Azure DevOps, implemented Key Vault for secrets, Application Insights for monitoring, and Front Door (WAF) for global routing and protection.
- **Microservice Development & Testing:**
  - Built .NET microservices with Entity Framework Core for seamless data access and Azure SQL integration, exposing endpoints via RESTful APIs. Tested and validated services using Postman.

Project: Logistics Application for DTools
Role: Software Engineer
Technologies Used:

- **Backend:** .NET 8, ASP.NET Core Web API, Entity Framework Core, SQL Server
- **Frontend:** Angular 16, TypeScript, Angular Material, Tailwind CSS, RxJS

Key Responsibilities:

- **API Development and Integration:**
  - Led the design, development, and maintenance of scalable RESTful APIs for Logistics Dashboard, enabling real-time vehicle tracking, shipment management, and driver monitoring with seamless backend integration..
- **Frontend Development with Angular:**
  - Developed a responsive, dynamic UI using **Angular** and **Angular Material**, integrating real-time data via RESTful APIs to display vehicle locations, shipment statuses, and key logistics metrics.
- **Database Design & Entity Framework Core:**
  - Designed and implemented a scalable database schema using **Entity Framework Core** with SQL Server, ensuring efficient storage and retrieval of logistics data with proper indexing for performance.
- **Testing & Code Optimization:**
  - Conducted unit tests with **xUnit** and **Moq**, focused on API reliability and frontend performance optimization. Ensured code quality with test coverage and continuous integration..

Education:

Bachelor of Technology | 2018-2022 |Shri Vaishnav Vidyapeeth Vishwavidyalaya

- Major : Computer Science Engineering with Artificial Intelligence
- CGPA :7.99

Certification

- AZ900 Azure Fundamentals certification | Duration :1 month
- AWS Certified Cloud Practitioner | Duration :3 months
- C # Advanced | Udemy | Duration :14 days
- Embedded Developer Trainee | Platforuma | Duration :2 months
- IBM Data Science Practitioner - Instructor Certificate | IBM | Duration :6 months
