DEV GARG

.NET Developer | Senior Software Engineer | Technical Leadership

+91-8860274595 devgarg9966@gmail.com https://www.linkedin.com/in/devgarg9966
https://www.credly.com/users/dev-garg.a9abd960 Delhi, India

SUMMARY

Motivated and results-driven software developer with expertise in .NET technologies, including .NET Core and ASP.NET. Proven experience in building robust, scalable web applications, leveraging a strong proficiency in C#, SQL Server, and modern development practices. Skilled in RESTful API development, Entity Framework, and MVC architecture, with a strong ability to solve complex problems and communicate well. Dedicated to continuous learning and growth in the field of software development, with a focus on enhancing technical skills and delivering high-quality solutions. Completed extensive training and coursework in computer science, specializing in software development with an emphasis on .NET technologies.

EXPERIENCE

Senior Software Engineer

Policybazaar

06/2025 - Present Gurgaon, India

- Leading backend development for a Booking Management System (BMS), building scalable and high-availability modules using .NET 8 and microservice-based architecture.
- Designed core booking workflows — scheduling, availability, confirmations, and notifications — ensuring reliable and consistent system performance.
- Developed REST APIs and background services for high-volume booking operations, integrating with SQL Server, PostgreSQL, and cloud-based data stores for efficient data processing.
- Contributed to frontend features using React and collaborating with UI teams to implement booking dashboards, customer flows, and admin panels as part of expanding full-stack responsibilities.
- Improved system performance by implementing caching strategies, optimizing queries, and refining service-level communication using async patterns.
- Enhanced CI/CD workflows to support automated testing, zero-downtime deployments, and faster release cycles across multiple BMS services.

Junior Software Engineer

BUSINESSNEXT

07/2023 - 06/2025 Noida, India

- Designed and developed REST APIs, GRPC services, SignalR services and various microservices in .NET, enabling efficient communication and data processing within distributed systems.
- Built and deployed scalable web applications, integrating backend services with SQL, Oracle, and PostgreSQL databases to manage and optimize data storage and retrieval.
- Integrated GenAI models into .NET microservices and web applications to enhance functionality.
- Leveraged artificial intelligence to deliver smarter, data-driven solutions and improve overall project performance.
- Collaborated with cross-functional teams to design and implement scalable and maintainable architecture for complex applications, ensuring optimal performance and reliability.
- Applied industry best practices ensuring the security, performance, and scalability of developed services, focusing on high-quality code and efficient workflows.
- Actively contributed to the adoption of modern development techniques, such as CI/CD pipelines, to streamline deployment and integration processes.

Graduate Engineer

BUSINESSNEXT

02/2022 - 07/2023 Noida, India

- Developed and maintained a suite of ASP.NET MVC web applications, improving code quality and maintainability by refactoring legacy systems
- Utilized ADO.NET for database interactions, ensuring seamless data integration and processing
- Performed unit testing using the xUnit framework to validate functionality and maintain high code quality
- Utilized the Microsoft Orleans framework for data and state persistence in distributed applications
- Developed and maintained GRPC services, enabling efficient communication within distributed systems
- Gained hands-on experience in integrating backend services with various relational databases such as SQL Server and Oracle

STRENGTHS

Problem Solving
Utilized my C# and .NET development skills to solve complex issues, increasing overall productivity by 20%

Adaptability
Quickly learned and implemented new technologies to meet evolving project needs.

Code Quality & Best Practices
Maintained high coding standards through clean architecture, thorough testing, and consistent code reviews—resulting in more stable and maintainable software.

Team Collaboration
Worked in cross-functional teams, successfully executed agile methodologies, and ensured timely completion of projects.

Time Management
Consistently met project deadlines by prioritizing tasks and efficiently managing development cycles

SKILLS

.NET Core | Asp.Net Core | C# | MVC | Entity Framework | ADO.NET | LINQ | Dependency Injection | SignalR | Microservices | RESTful APIs | RPC | Microsoft Orleans | Logging | Tracing | Debugging | MS SQL Server | Oracle | PostgreSQL | Docker | Azure | Rancher | Unit Testing | Kibana | Version Control | Agile Methodology | CI/CD Pipelines | Sonar Cloud | Grafana

PROJECTS

Chatbot

- Increased chatbot processing speed by {30%}, improving performance using C# and .NET frameworks.
- Integrated **GenAI models** into the chatbot, enhancing AI-driven responses and enabling advanced conversational capabilities.
- Utilized **ADO.NET** for efficient database interactions, ensuring optimized data retrieval and storage.
- Engineered **microservices** and **gRPC** services to enable scalable and fault-tolerant communication across distributed systems.
- Worked extensively with **MVC architecture** to maintain clean and maintainable code.
- Leveraged **Microsoft Orleans framework** to enhance scalability and concurrency management in chatbot processing.
- Designed and managed relational databases, ensuring seamless interaction with **SQL Server**, **Oracle**, and **PostgreSQL**.

AgentNext - AI Task Management System

- Developed a **SignalR application** integrated with the **Orleans framework** to create scalable and efficient AI agents for simplifying task management.
- Integrated **GenAI models** to enhance decision-making and task automation, providing advanced AI capabilities.
- Designed backend systems using **C#**, **.NET**, and **MVC architecture** for maintainable and efficient performance.
- Engineered **REST APIs**, **microservices**, and **gRPC services** for seamless system communication.
- Optimized data handling with **ADO.NET**, ensuring compatibility with **SQL Server**, **Oracle**, and **PostgreSQL**.
- Enhanced concurrency and scalability using the **Microsoft Orleans framework** for distributed task management.
- Delivered a robust, AI-powered solution that streamlined task processes and improved productivity.

BMS – Booking Management System

- Built core modules for booking creation, availability checks, resource allocation, cancellations, and real-time status updates.
- Designed scalable microservices handling high-volume booking operations with robust API contracts and clean architecture.
- Implemented secure authentication/authorization flows and role-based access for customers, partners, and internal teams.
- Developed backend services connecting to SQL Server and PostgreSQL with optimized queries and caching for fast response times.
- Improved system reliability through structured logging, monitoring, alerts, and APM-driven performance tuning.

CRM System Development

- Contributed to the development of a **CRM application** as part of a collaborative team using **C#**, **.NET**, and **MVC architecture**.
- Worked on implementing key features and functionalities to enhance customer relationship management.
- Developed and optimized **REST APIs**, **microservices**, and **gRPC services** for efficient system integration and data communication.
- Utilized **ADO.NET** for database operations, ensuring seamless interaction with **SQL Server**, **Oracle**, and **PostgreSQL**.
- Followed clean coding practices and collaborated with cross-functional teams to meet project requirements and deadlines.
- Played a crucial role in delivering a scalable, production-ready CRM solution that addressed business needs.

OCP – Omni-Channel Platform

- Contributed to the development of an enterprise-grade **Omni-Channel Platform** by integrating a chatbot to create a larger and more versatile solution.
- Worked on backend development using **C#**, **.NET**, and **MVC architecture**, ensuring system scalability and reliability.
- Enabled seamless integration with social media platforms, including **WhatsApp** to enhance customer engagement.
- Integrated **Microsoft Orleans framework** for enhanced scalability and efficient task management in distributed environments.
- Developed and optimized **REST APIs**, **microservices**, and **gRPC services** for seamless communication across components.
- Utilized **ADO.NET** for efficient database interactions with **SQL Server**, **Oracle**, and **PostgreSQL**.
- Collaborated with cross-functional teams to integrate advanced features and deliver a robust, scalable platform.

EDUCATION

B.Tech. - Computer Science & Engineering

SRM University

2018 - 2022 | Delhi, India

Higher Secondary CBSE

Kulachi Hansraj Model School

2017 - 2018 | Delhi, India

KEY ACHIEVEMENTS

Migrated Enterprise System to Microservices

Successfully led the migration of a monolithic system to microservices, improving maintainability and scalability.

Optimized Performance with AI Integration

Integrated **GenAI models** into backend systems, enhancing decision-making and automation, leading to improved efficiency and response times.

INTERESTS

Technology Accessibility

Passionate about creating software that makes technology more accessible and user-friendly.

Open Source Collaboration

Actively contribute to open-source projects, focusing on solutions for developer tools and productivity.

Agile Software Development

Constantly exploring and adapting agile methodologies to improve team collaboration and efficiency.

AWARDS

- **Cloud Application Developer 2019 - Explorer Award**
- **Enterprise Design Thinking Co-Creator**
- **Enterprise Design Thinking Practitioner**
- **Enterprise Design Thinking -Team Essentials for AI**
- **Watson Studio Essentials**
- **Tableau Analyst**

TRAINING/COURSES

Advanced General Management

Institute of Management Technology, Ghaziabad

07/2025

- Completed advanced coursework focused on leadership, team management, strategic planning, and operational excellence.
- Strengthened decision-making and problem-solving skills through real-world management scenarios and case studies.
- Enhanced capability in stakeholder management, and aligning teams toward shared business goals.
