Priyanka Seriwala

Senior Data Engineer

priseri123@gmail.com • 8349527731 • LinkedIn • Portfolio

Profile Summary:

Results-driven Data Engineer with 6.7 years of experience in Enterprise data platforms, multicloud data modernization, ETL/ELT pipeline development, and big data technologies. Skilled in designing cost-efficient architecture, optimizing data processing workflows, and implementing scalable solutions on Azure and Snowflake. Proven ability to enhance performance, automate processes, and drive cloud migrations while collaborating with cross-functional teams. Adept in Agile methodologies, CI/CD implementation, and data warehousing, with a strong track record of delivering high-impact solutions that improve efficiency and reduce operational costs. Recognized for excellence in innovation and performance optimization.

Skills:

- Big Data Technologies: Databricks, Pyspark
- Azure Cloud: Azure Data Factory, Databricks, Datalake, Microsoft Fabric, KeyVaults
- AWS Services: Apache Airflow, EMR, Glue, S3, Athena, Redshift, CloudWatch, Lakeformation, SNS,SQS
- Database(s): Oracle SQL Developer, Azure SQL, SQL Server, Teradata, Cosmos DB
- Programming Language: Python
- Reporting Tool: RDL, SSIS, PowerBI
- CI/CD: Azure DevOps, GitHub, Tortoise

PROFESSIONAL EXPERIENCE:

ThoughtFocus-Bangalore

Data Engineer ***Mar'2025- Jan'26***

- Working for a top private credit investment firm, transforming the data as per the Business need, and sharing the reports to Client. Good understanding of private credit, investment banking, fund financing etc.
- Led delivery of **large-scale, enterprise data platforms** focused on **cost optimization, continuous process improvement, and advanced analytics** using **PySpark, Databricks, Snowflake, and Microsoft Azure**.
- Hands on experience on development of data pipelines, Unity Catalog, jobs, workflows and Data Governance in Databricks.
- Submitted a proposal for one of the clients to set up Data Governance
- Completed corporate training on Snowflake. Migrating Blackrock's systems to Snowflake supporting cloud data modernization.

Ecolab Digital Center - Bangalore

Data Engineer ***Feb'2023-Mar'2025***

- Proposed data architecture to reduce costs of storage and processing by **70%** built ELT pipelines.
- Built data lakehouse, maximized Data Quality with Medallion Architecture in Microsoft Fabric.
- Migrated the on-prem databases to Snowflake platform using Azure Data Factory; increased the pipeline orchestration time **2x and 98%** decrease in failure rate
- Fine-tuned query performance and optimized data pipelines for faster, more accurate data retrieval and reporting. Proficient in monitoring through APP Dynamics and Azure monitoring.
- Received **Silver Star Team award 2024** for the digitalizing the solution for the front-end portal **EBR**
- Nominated for the **Innovation award in 2023**.
- Implemented CI/CD and SDLC practices using Azure DevOps, ensuring efficient development and deployment processes

ZS Associates - Pune

Business Technology Solution Associate ***Mar'2022-Feb'2023***

- Design and built data pipelines for data ingestion within a data lake from different sources such as SQL server, AWS S3, flat files, parquets etc. into AWS using AWS Glue, Python and Pyspark and orchestrated with Airflow DAGs.
- Reduced SLA of a spark job from **9 hours to 35 minutes**
- Frequent direct engagement with multinational clients for building new solutions and migrating existing data applications ensuring customer confidence and successful delivery
- Experienced working in an Agile methodology and participated in user story grooming, sprint planning, scrum calls and sprint retrospective along with the product owners, business analysts and team

IBM India Pvt Ltd - Pune

Data Engineer ***Jun'2019-Mar'2022***

- Experience in designing, Implementation of Data warehousing solutions and data pipelines using ETL tools: Informatica Power Center and Informatica Intelligent Cloud Services (IICS) and Azure Data Factory
- Mentored and **led a team of 4**, actively contributed to team discussions, provided valuable insights
- Experience designing data warehousing solutions, data modeling and ETL pipelines.
- Received **Performance award twice a year** for delivering innovative and high-quality solutions to clients in response to dynamic business requirements, naturally capable of multitasking and meeting deadlines
- Extracted data from multiple sources like Oracle SQL DEVELOPER, SQL SERVER, IBM DB2, SAP, Salesforce, Teradata

and Web services
- Proficient in the preparation, execution, and review of UAT test cases and design document
- Engaged with cross functional teams to align with business objectives
- Participated in interviewing and onboarding new team members.

Education:

Madhav Institute of Science & Technology Gwalior, MP

B.E. in Computer Science Engineering (CSE) (2015-2019)

CGPA - 7.4(out of 10)

Certification(s):

- 3X Microsoft Azure Certified: DP900, AZ900, AI900
- Azure Data Engineering (DP200) - trained and certified by IBM (Nov2020).
- Informatica Cloud IICS - trained and certified by IBM.
- Developing solutions for Microsoft Azure (AZ204) – trained by IBM (April2021).
