Dhanush Prabhakar Kottary – DevOps & Cloud Engineer

: +91-7026927881 | : dhanush2819kottary@gmail.com | Karnataka, India | LinkedIn | Github

3+ Years experienced IT professional with proficiency in DevOps, SRE and Multi-Cloud, specializing in infrastructure automation, CI/CD pipeline creation, automated deployment, secure architecture and container orchestration in cloud-native environments. Strong collaborator with excellent adaptability to evolving technologies and problem-solving skills, known for driving process improvements and working effectively in cross-functional, agile teams.

KEY SKILLS

Programming | Development | Automation | Workload Migration | Containerization | Orchestration | Configuration Management | Deployment | Risk Remediation | Incident Management | Testing | Cross-Team Collaboration | Code Review | Security | Debugging | Problem Solving | Infrastructure as Code | Cost Optimization |

TOOLS & TECHNOLOGIES

Programming & Scripting Languages: Shell, Golang, Java, Python | **IAC:** Terraform, Ansible | **Database Management System:** SQL | **Container Platform**: Docker, Kubernetes, Openshift, Helm, Kustomize | **Architecture:** Microservices, Monolith | **CI/CD:** Argo CD, Jenkins, Gitlab CI/CD, Maven, Tekton | **Version Control:** Git, GitHub | **Platform:** DevOps, AWS Cloud, Azure, SRE, GCP, IBM Cloud | **Monitoring:** Prometheus, Grafana | **Security:** Trivy, SonarQube | **OS:** Linux, RHEL

PROFESSIONAL EXPERIENCE

Senior Software Engineer| Persistent Systems Ltd — Goa, IN | 2022 – Present

Infrastructure Management, K8s Custom Operator, Cluster as YAML, Migration

- Managed robust cloud infrastructure management and cluster creation as code using custom controllers for the platform to support SaaS Solutions across multiple cloud providers effectively.
- Designed and maintained **reusable, scalable Terraform modules** to provision AWS infrastructure including VPCs, subnets, firewalls, load balancers, and networking components with **Multi-AZ architecture**, enabling product teams to deploy secure, highly available private clusters.
- Developed a **custom operator** using Golang for the custom resource that enables users to define their **Openshift clusters as YAML** thereby simplifying cluster configuration, management and migration.
- Implemented automation for the migration for K8s clusters from public environment to private environment for enhanced security and aligning cluster exposure with organizational compliance policies.
- **50+ Openshift clusters** were migrated using automation reducing the migration period from **7 days to 2 days** while maintaining **99% uptime**.
- Proactively investigated and resolved issues across **multiple environments** involving **infrastructure, custom Kubernetes controllers, networking, and CI/CD pipelines**, ensuring platform stability and reliability

CI/CD Pipeline setup, Deployment, Microservices, Architecture Design, SRE Practices

- Implemented CI/CD pipelines to ensure faster feedback cycles, troubleshot pipeline failures, resolved code issues, and remediated security vulnerabilities..
- Administered CI/CD support for the product teams onboarding to the platform for deploying their microservices by designing and deploying a **manager-worker Argo CD architecture** across all the environments.
- Configured the worker component to manage and deploy K8s workloads to the clusters.
- Enhanced the Argo CD deployment framework to support **Multi-Cloud** environments by extending compatibility from single cloud to multiple cloud. This cross-platform capability enabled unified **GitOps practices** across cloud providers.
- Collaborated with multiple product teams to deploy **microservices on Kubernetes**, troubleshooting deployment issues related to Helm templating, misconfigured resources, and cluster onboarding, and providing **rollback support** to ensure stable releases.

- **Orchestrated and monitored K8s pods** using **Prometheus and Grafana** dashboards to ensure greater than 90% uptime, establishing a foundation for **Service Level Objectives (SLOs)**.
- **20+ product teams** used the CI/CD automation to deploy their workloads resulting in **75% decrease** in deployment time.

KEY PROJECTS EXECUTED

1. **Project:** Infrastructure, Cluster as YAML automation for MCSP | **Duration:** Jan '2024 – Present

Key Achievement: Successfully managing infrastructure setup, cluster creation for the platform onboarding SaaS solutions using Kubernetes, Openshift, Docker, Terraform, Golang, Shell scripting and AWS to ensure scalable, reliable SaaS delivery. This work directly addresses the need for repeatable deployments and cloud infrastructure management

2. **Project:** CI/CD pipeline and automation for Multi-Cloud SaaS Platform | **Duration**: Aug '2022 – Dec '2023

Key Achievement: Successfully provided CI/CD support for the Multi-Cloud SaaS Platform using ArgoCD, Helm, Prometheus, Grafana, Kustomize, RedHat OCP and Azure to provide a robust, reliable deployment process. This aligns with the requirement for pipeline automation and monitoring.

3. **Project:** GenAI-Assistant 🔗 | **Duration**: 2025

Key Achievement: Developed and deployed GenAI-Assistant, an AI-powered assistant designed to support IT professionals with interview preparation, code debugging, concept explanation, and DevOps/cloud-related queries from scratch. Integrated it with **Gemini LLM** for intelligent responses. Applied **prompt engineering** to improve accuracy and relevance of infrastructure and DevOps-related answers. Designed a **scalable, modular backend** aligned with cloud-native and automation best practices.
Technologies Used: React, Golang, Gemini LLM, Docker, Kubernetes, YAML, nginx, Git, Github

EDUCATION

- **Bachelor Of Engineering – Electronics and Communication** | St Joseph Engineering College (SJEC) | 2018-2022 | 8.53 GPA

AWARDS & RECOGNITIONS

- **Bravo Individual Award by Persistent Systems Ltd - 2025**
  Recognized for the diligence and hard work shown in MCSP Argo CD and OnePipeline migration tasks.

- **Bravo Individual Award by Persistent Systems Ltd - 2024**
  Recognized for the diligence and hard work shown during learning, understanding and working with argoCD quickly.

- **Bravo Individual Award by Persistent Systems Ltd - 2023**
  Recognized for the hard work and resiliency shown in adapting to new technologies while adhering to stringent timelines and showcasing strong technical skills.

CERTIFICATIONS

1. **AWS Certified Solution Architect - Associate (SAA - C03)**

2. **AWS Certified Cloud Practitioner**

3. **Microsoft Certified: Azure Administrator Associate (AZ-104)**
