Pune, Maharashtra

EXPERIENCE

Python - Technology Lead
09/2025 - 12/2025

Synechron technologies pvt. ltd
Pune, India

Client: UBS
Role : GenAI Engineer

- Working on **Generative AI and LLM-based project for 1 Month.**
- Understood project requirements related to **GenAI** use cases.
- Worked on basic **GenAI agent concepts** (single-step and task-based agents).
- Learned and implemented **prompt engineering techniques**.
- Explored **LLMs** (Large Language Models) and their working principles.
- Gained hands-on understanding of: **Agent-based AI architecture, RAG (Retrieval Augmented Generation) basics, GenAI workflows.**
- Assisted in designing **AI agents** for task automation and decision-making.
- Collaborated with the team to understand real-world GenAI project flow.

Senior Software Developer
05/2025 - 09/2025

GlobalLogic
Pune

Client: Qlik
Current Project: Singer.io Tap Development & Maintenance.

- Responsible for identifying and fixing bugs and issues in previously developed**Singer taps** to ensure data accuracy and pipeline stability.
- Developing new Singer taps from scratch using the **Tap Generator**, following best practices for modular and scalable design.
- Implementing robust **API integrations, handling authentication, pagination, rate limits,** and data transformation logic.
- Designing and generating **JSON schemas** for structured data **extraction and validation**.
- Extracting and loading data using Singer specifications, working extensively with **JSON-based data structures.**
- Performing comprehensive **end-to-end testing** of all taps across environments to ensure reliability and performance.
- Working in the **PQR environmen**t to simulate production-like conditions and validate **integration pipelines**.
- Worked with React to make minor UI changes, fix UI bugs, and integrate backend APIs into existing components.
- Assisted in updating React components using basic hooks and props to support new backend features.

SUMMARY

Results-driven and detail-oriented **Senior Python Developer** with over 7.5 **years of experience**, specializing in **scalable, data-driven solutions** across diverse domains. Proven expertise in leading **end-to-end development** using **Python**, **Django**, and **RESTful APIs**, with a strong foundation in **data forecasting**, **task automation**, and **backend architecture design**.

Proficient in **core Python concepts** including **OOP**, **decorators**, and **asynchronous programming**. Experienced in **test automation** using **Playwright** and **Pytest**, ensuring maintainable, high-quality codebases and reliable CI/CD pipelines.

Currently **enhancing skills in Artificial Intelligence**, including **Generative AI**, **Large Language Models (LLMs)**, and **AI Agent frameworks**. Completed **Generative AI Certification** and **pursuing certifications** in **LLMs** and **Golang**, aiming to integrate **AI-driven capabilities** into real-world software solutions.

A quick learner passionate about applying emerging **AI and automation techniques** to improve system intelligence, efficiency, and user experience. Experienced in both **product** and **service-based environments**, with strong collaboration skills and a focus on aligning technology with business goals.

Seeking a **Senior Python Developer** role to leverage proven backend expertise while contributing to **AI-enabled product innovation** and **team mentorship**.

EXPERIENCE

Forecasting Manager
11/2022 - 05/2025

Merck Sharp & Dohme Pune

A leading global healthcare company.

- **Python Development & Debugging:** Designed, developed, and maintained robust Python applications. Performed in-depth debugging and resolved critical production issues to ensure application stability and performance.
- **Python Development & Debugging:** Designed, developed, and maintained robust Python applications. Performed in-depth debugging and resolved critical production issues to ensure application stability and performance.
- **React (Basic Exposure):** Worked on minor enhancements in existing React applications, including small UI changes, bug fixes, and integrating backend APIs.
- **AWS Integration:** Utilized AWS services (e.g., S3) for deploying and managing cloud-based applications, ensuring scalability and reliability.
- **Agile & Git:** Managed source code using Git and actively participated in Agile/Scrum ceremonies, sprint planning, and peer code reviews.
- **Forecasting & Data Analysis:** Leveraged Python for advanced data forecasting, predictive analysis, and rigorous model testing to support strategic decision-making.
- **Django Development:** Built and maintained scalable web applications using Django, enabling efficient handling of complex healthcare workflows and secure data management.
- **AWS Integration:** Utilized AWS services (e.g. S3,) for deploying and managing cloud-based applications, ensuring high availability and scalability.
- **Playwright Integration:** Conducted comprehensive end-to-end web application testing using Playwright, ensuring high-quality, bug-free releases.
- **Collaboration & Problem Solving:** Collaborated cross-functionally to translate business requirements into robust technical solutions and proactively resolved issues.

Python Developer
01/2022 - 07/2022

Xpanxion International Private Limited Pune

Xpanxion International Private Limited

- **Training & Task Specification:** Ensured clear understanding and execution of task requirements and training objectives across departments to improve workflow efficiency.
- **Interdepartmental Communication:** Facilitated smooth communication between HR and other departments, enhancing collaboration and alignment on project goals.
- **Support Coordination:** Worked closely with the support team to address operational needs and resolve internal queries.
- **Python & Django Development:** Successfully completed an internal project using Python and Django, applying core concepts of backend development and web application structure.
- **Technical Upskilling:** Currently learning the fundamentals of Docker and Kubernetes to expand knowledge in containerization and orchestration for modern DevOps practices.

Software Developer
08/2018 - 12/2021

StanceCode Technology Private Limited Pune

A technology solutions provider.

- **Application Development:** Designed, developed, and maintained Python applications by integrating relevant libraries and frameworks to meet evolving business needs.
- **SDLC Expertise:** Applied full Software Development Life Cycle (SDLC) principles—including requirements gathering, analysis, design, implementation, deployment, and support—to ensure successful project delivery.
- **Business Analysis:** Collaborated in requirements-gathering sessions; created comprehensive documentation and use cases aligned with business objectives and stakeholder expectations.
- **Technical Solutions:** Engineered robust backend solutions using Python, Django, Flask, and SQL, including database design, data management, and implementation of RESTful APIs.
- **Agile Methodology:** Actively contributed to Agile development practices by participating in daily Scrum meetings, sprint planning sessions, and retrospectives to drive team progress and deliver high-quality results.
- **Stakeholder Communication:** Maintained ongoing communication with stakeholders to clarify technical requirements, provide regular progress updates, and integrate feedback into iterative development cycles.

Learning & Certifications

- Currently enhancing skills in **LLM architecture**, **AI agent frameworks**, and **generative model applications.**
- Exploring Golang for building efficient backend systems integrated with AI services.
- **Generative AI Certification** – Completed comprehensive training covering prompt engineering, model optimization, and applied AI workflows.
- **Currently pursuing certifications** in Large Language Models (LLMs) and Golang to strengthen expertise in AI systems and backend development.
- Enhancing skills in **LLM architecture, AI Agent frameworks, and Generative Model** applications for advanced AI-driven automation and decision-making.
- Exploring **Golang** for building high-performance backend systems seamlessly integrated with AI services.
- Engaged in personal AI projects and experiments to develop practical understanding of Autonomous **AI systems, Prompt-based automation, and intelligent workflows.**
- **Completed comprehensive training in Generative AI Certification** covering Prompt Engineering, Model Optimization, and Applied AI Workflows.

PROJECT

07/2018 - 01/2021

Food Delivery Application Development

Pune

Role: Python Developer
Duration: 2018 – 2021 (3 Years)
Core Technologies: Django, RESTful Web Services, MySQL, Git, HTML/CSS
Objective:
Developed a scalable Online Food Delivery System aimed at optimizing restaurant operations and enhancing the customer experience in food ordering and delivery.
Key Responsibilities & Achievements:

- **Backend Development:** Implemented core backend functionalities using Django, including user authentication, order processing, and secure payment integration.
- **API Development:** Built RESTful APIs to enable seamless communication between the frontend and backend, supporting real-time order placement and tracking.
- **Database Management:** Designed and maintained a normalized MySQL database to ensure efficient data storage, retrieval, and integrity.
- **Role-Based Dashboards:** Developed custom dashboards for different user roles (Admin, Vendor, Delivery Manager) to facilitate operational management and access control.
- **Frontend Integration:** Collaborated with frontend developers to integrate HTML/CSS with Django templates, ensuring a cohesive and responsive user interface.

- Highlight your accomplishments, using numbers if possible.

EDUCATION

08/2012 - 06/2016

Bachelor of Engineering in Electronics

Pune

Pune University

- Bachelor of Engineering in Electronics
