JYOTHI PRAKASH KORRA

TECHNICAL MANAGER, AIML SERVICES, GENPACT

PROFESSIONAL SKILLS

SQL Server(TSQL), Oracle - PLSQL, PostgreSQL, MSBI (SSIS, SSRS), Azure Data Factory,Python, Databricks,pySpark

TOOLS UTILIZED

Azure Storage Explorer
VS Code
MSBI
SQL Developer
PGAdmin
SSMS

CERTIFICATIONS AND ACCREDITATIONS

MICROSOFT AZ900 Azure Fundamentals

Databricks Certified Data Engineer

AWS Cloud Practitioner Certification

AWARDS

- WorldLINE - BEST CROSS functional TEAM MMS EOD TIME REDUCTION
- WORLDLINE - TORCH BEARER AWARD

PROFILE

Ambitious and performance driven professional with Bachelors of Technology degree in Electronics and Communications Engineering. Currently employed as Technical Manager with Genpact based out of Bengaluru. Seeking a challenging career with a progressive organisation that provides an opportunity to capitalise my Technical skills & abilities.

.

WORK EXPERIENCE - 11 YEARS

APR 2022- PRESENT (3 Years 10 Months)
GENPACT INDIAl Bengaluru

Technical Manager
JUL 2024 - Present

Assistant Manager
APR 2022 - JUN 2024

Projects

- CS Optimiser - Analysing Customer Care Data
  Tech Stack: SQL Server, Python, ADF, Data bricks(pySpark)
- CKA - RAG pipeline Knowledge Corpus Application
  Tech Stack: SQL Server, Python, ADF, Data bricks(pySpark), postgreSQL
- 5 Client Deployments based on CKA Product
  Tech Stack: SQL Server, Python, ADF, Data bricks(pySpark), postgreSQL
- Unilever - GenAI Price Claim Automation
  Tech Stack: Azure SQL, ADF, Databricks, Azure Cloud Services,

Roles and Responsibilities

- Proficient in coding with PySpark for transforming and analysing datasets and enhanced PySpark job performance using partitioning, caching.
- Processed structured data from HFS , Azure data lake.
- Designed and managed complex queries, stored procedures and performance tuning in SQL server
- Managed data processing from source to database using Azure Data Factory, handling exceptions with ADF activities.
- Database migrations from on-premises to Azure cloud with ADF.
- Automated database backup processes and implemented data copying to Azure ADLS.
- Automation to move files from share point to cloud storage.

JYOTHI PRAKASH KORRA

TECHNICAL MANAGER, AIML SERVICES, GENPACT

EDUCATION

BACHELOR OF ENGINEERING (ECE)
JNTU Ananthapur | 2009 - 2013

BOARD OF INTERMEDIATE EDUCATION
Sri Chaitanya College | 2007 - 2009

SECONDARY EDUCATION
Socrates English Medium HighSchool | 2007

PERSONAL SKILLS

Creative spirit
Reliable and professional
Organized
Time management
Team player
Fast learner
Motivated

JAN 2015- APR 2022 (7 Years 3 Months)
WORLDLINE INDIA | Chennai

TEAM LEAD - Engg.
JUL 2021 - APR 2022

Senior Software Programmer
JUL 2015 - JUN 2021

Software Programmer
JAN 2015 - JUN 2015

Projects

- POS Payment
- 30 Clients Support on POS Payment (Yes Bank, Corp. Bank, Indian Bank, Canara Bank, etc..,)

Tech Stack:

- SQL Server - Stored Procedures, Functions, Views, Cursors, DML and DDL Operations, TSQL
- Oracle SQL - PLSQL
- MSBI(SSIS, SSRS)
- ADF
- Databricks(pySpark)

Roles and Responsibilities

- Managed end-to-end responsibilities, covering development, implementation, administration, and support.
- Designed and executed SSIS Packages to extract data from Excel spreadsheets and flat files, facilitating its transfer to SQL Server 2008 for comprehensive data analysis and reporting.
- Developed packages for handling bank settlement files, incorporating log updates into the respective tables.
- Engineered intricate ETL Packages using SSIS to extract data from staging tables and seamlessly upload it to the live production database.
- Created custom reports with SSRS/SQL Server BI Studio, enhancing reporting capabilities in MSCRM.
- Utilised SSIS for report formulation and improved report functionality in MSCRM.
- Generated datasets in T-SQL and constructed stored procedures for SSRS.
- Executed a complete database migration from SQL Server to PL/SQL, accommodating new requirements.
- Applied Packages, Procedures, Functions, views, and UTL_FILE to implement logic in PLSQL as per specified requirements.
- Automated PLSQL scripts on a daily basis using schedulers.
- Implemented Python scripts to efficiently move and zip files from source to destination (SFTP).
- Migrated Ingestion logics from SSIS to ADF.
- As per the financial domain requirements, applied transformations using pySpark.
