Objective

Python Backend Engineer with strong expertise in OOP, RESTful APIs, async programming, and automation. Experienced in building scalable backend systems using FastAPI, AWS, and CI/CD pipelines. Focused on performance optimization, reliability, and clean architecture.

Education

SRKR Engineering College **CGPA** 8.15

Bachelor of Technology in Computer Science and Engineering Sep 2019 – April 2023

Technical Skills

- **Backend:** Python (FastAPI, Flask), REST APIs, AsyncIO, Multithreading
- **Frontend:** React.js, HTML, CSS, Bootstrap
- **Databases:** MySQL, PostgreSQL, DynamoDB
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, IAM), Docker, GitHub Actions, GitLab CI/CD
- **AI & Agentic Systems:** Agentic AI, LLM integration, autonomous agents, multi-agent workflows, prompt engineering
- **Testing & Tools:** PytestPostman
- **Core:** DSA, Clean Architecture, Cloud-native Development

Experience

Software Engineer | Deloitte, Bangalore Dec 2023 – Present

- Designed and implemented REST APIs using **Python (FastAPI)** following OOP and clean architecture
- Built a **parallel multi-agent competitive intelligence system**, orchestrating autonomous agents for coordinated analysis
- Implemented an **agent orchestrator** to manage task delegation and parallel execution across multiple agents
- Developed resource-specific agents to ingest **competitive data from finance, news, and documents**, significantly accelerating insights generation
- Automated ABEND incident handling with logging, **AWS S3** storage, and AI-based log analysis
- Integrated **AWS Lambda** triggers for asynchronous, event-driven processing
- Improved deployment reliability using **GitLab CI/CD** and containerized builds
- Reduced manual maintenance by **60%** through Python-based automation and daily task orchestration

Software Engineer | MAQ Software, Hyderabad Jul 2023 – Nov 2023

- Automated **data processing and backend workflows** using Python and Azure Data Services
- Enhanced **SQL query performance** and data pipelines for high availability.
- Collaborated in an **Agile environment** to deliver backend automation solutions for business insights

Frontend Developer Intern| Saptarishi Solutions, Hyderabad Jan 2023 – Jun 2023

- Developed **React.js UI components** and integrated with backend APIs.
- Built **real-time dashboards** with interactive data visualizations.

PROJECTS

Agentic Task Automation & Monitoring Platform| *Python (FastAPI), React.js, Agentic AI, AWS, PostgreSQL, GitLab*

- Built an agentic AI–based platform using autonomous agents for task automation, log analysis, and monitoring
- Implemented a multi-agent architecture with an orchestrator for parallel execution and faster issue detection
- Developed async REST APIs using FastAPI and automated error analysis
- Deployed via GitLab CI/CD with AWS (EC2, S3, Lambda) integration
