QA ENGINEER

Seeking to handle responsibilities and challenging assignments to harness my technical and analytical skills

Career Recital

Dedicated and experienced Quality Assurance professional with 3+ years of expertise in manual and automation testing. Seeking a challenging role to leverage my skills in ensuring software quality, improving testing processes, and contributing to the success of innovative projects.

Technical Proficiencies

- Manual/Automation/API Testing
- Web and Mobile applications
- Test Plan, Cases and Process
- API Testing Tool: Postman
- Defect Tracking Tool: Jira
- Scripting Languages: Java
- Automation Testing Tool: Selenium
- SCM Tool: Git
- Operating Systems: Windows

Profile At A Glance

- 3+ years of hands-on experience in both **Manual , Automation and API Testing.**
- Certified in **ISTQB** tester
- Experience in Git for Version control
- Experience in SAP Integration Testing
- Experience in Data Driven framework
- Experience in Cucumber BDD approach
- Proficient in test case design, execution, and defect tracking.
- Experience knowledge in API testing using tools like **Postman**
- Experience in project management tool such as **JIRA,Confluence**
- Experience in **Selenium using Java.**
- Exposure in using TestNG for various testing requirements creating customized reports.
- Excellent problem-solving and analytical abilities
- Experience in Team management activities.
- Effective communication and collaboration with cross-functional teams.
- Proactive in keeping up with industry best practices and emerging trends
- Performed comprehensive testing for web and eCommerce applications integrated with Shopify, Akeneo PIM, Algolia & Sanity CMS

Credentials

BTech in Electrical and Electronics Engineering from Kerala University

PROFESSIONAL CONTOUR

Licious , Kochi **Jun'25 – Present**
QA Engineer II

Project #1: Post Order Scenario

Roles & Responsibilities:

- Performed **end-to-end testing of post-order workflows** including order confirmation, preparation status, dispatch, live tracking, delivery, and feedback submission.
- Validated **real-time order status updates** (e.g., "Accepted by Restaurant", "Out for Delivery", "Delivered") across customer and delivery partner apps.
- Tested **order modification and cancellation flows**, ensuring accurate refund calculation and wallet/UPI/card reversals.
- Verified **payment settlement and reconciliation** post-order, including edge cases like partial refunds, failed transactions, and duplicate charges.
- Conducted **negative testing for delivery failures** (restaurant rejects, delivery partner unassigned, order delayed/cancelled) to ensure proper user communication via SMS, email, and in-app notifications.
- Ensured **synchronization between customer, restaurant, and delivery apps**, validating order ID, items, and status consistency across platforms.
- Tested **loyalty points, coupons, and wallet refunds** applied during post-order scenarios.
- Validated **invoice and GST receipt generation** after successful delivery.
- Tested **push notifications and in-app messages** for delivery updates, feedback requests, and promotions triggered post-order.
- Performed **API validation** for post-order endpoints (order status API, refund API, delivery tracking API).
- Conducted **performance testing** of order tracking and live delivery map updates under concurrent user loads.
- Executed **database validation** for order records, refund status, and transaction logs to ensure backend consistency.
- Ensured **compliance with SLA timelines** (e.g., refund within 5-7 days, delivery ETA accuracy).
- Collaborated with developers and product managers to identify and resolve defects in **critical post-order customer experience flows**.

Valoriz Digital,Trivandrum **Nov'21 – Jan'25**
QA Engineer

Project #1: ACE,Watson,Kiabi,ToysRUs
