Professional Summary

Software Development Engineer with end-to-end SDLC expertise, specializing in designing and building scalable, fault-tolerant, and cloud-native distributed systems.

Education

Kalinga Institute of Industrial Technology — Bhubaneswar, India
Bachelor of Technology, Computer Science and Engineering
CGPA: 8.84

Work Experience

KPIT Technologies — (***Dec 2023 – Present)***

Software Engineer, **(*Client – Honda R&D Co.*)**

Tech Stack: *HTML, CSS, JavaScript (ES6+), TypeScript, React, Material UI, AWS, Java, Spring Boot, Docker, Jira*

• Developed a scalable Vehicle Test Data Analysis Platform for a major **Japanese automotive** OEM, improving data processing efficiency and usability through **React, Redux** state management and **TypeScript**.

• Architected a scalable **feedback system** (likes, dislikes, comments) **for dashboard cards** especially for **Gen AI** tags, boosting **user engagement** by 25%.

• Architected an end-to-end **authentication** and **authorization** platform, implementing **RBAC** for 1,000+ users and securing access with **JWT/OAuth 2.0**, eliminating all unauthorized access vulnerabilities.

• Streamlined **Agile/Scrum** processes via **Jira,** cutting cycle time by 25% and achieving 100% sprint goal completion over 10+ sprint.

Intern

• Developed a high-performance microservice in **Java** & **Spring Boot**, using improving data handling efficiency by 30% via a comprehensive **RESTful API**.

• Containerized and deployed the service with **Docker**, integrating **Spring Security (JWT-based auth)** to enforce secure API access and ensure scalability.

Skills

Languages : C, C++, JavaScript (ES6+), Typescript, Java, Python

Frontend : HTML5, CSS, React.js, Redux, Tailwind CSS, Material UI

Backend : Node.js, Express.js, Spring, Spring Boot, Hibernate, JPA, Rest API

Database : MYSQL, PostgreSQL, MongoDB

Others : Git, GitHub, Postman, Docker, AWS, Data Structures, Algorithms

Projects

Global Book Store | *Link* | Tech Stack : *React.js, JavaScript (ES6+), Spring Boot, Spring Security , Spring Data JPA (Hibernate), Docker*

• **Built a Book Store Application Web Application using Spring Boot**, leveraging **Spring Data JPA (Hibernate)** for efficient persistence and RESTful API development.

• **Implemented secure authentication and authorization with Spring Security**, using **JWT and Outh2.0**, and **Dockerized** the application for consistent, scalable deployment.

GenAI Chat Assistant | ***Live*** | **Tech Stack :** *Python, Streamlet, Google Gemini API, FAISS*

• Developed a predictive **AI assistant** handling 100+ queries/day with 90% accuracy, reducing user time by 65%.

• Built an image captioning module using **Gemini Vision AI**, processing 20+ images/hour with 85% accuracy.

Achievement

• Awarded **A+ performance** rating during traineeship and secured ***Rank 1 in KPIT's inter-organization Code Vistas*** challenge, winning **₹75,000** for exceptional software engineering and **problem-solving** excellence**.** ***[Link]***

• Awarded Certificate of Appreciation for scoring high **CSAT score (4.9 out of 5)** for my project at KPIT.

• Strong problem-solving skills secured by solving over 500 DSA problems on **LeetCode** and **GeeksforGeeks**.

• **IBM Full Stack Developer** ◊ **Link** **AWS Certificate** ◊ **Link**
