Profile Summary

- Results-driven QA Automation Engineer with 2.5 years of experience in **manual** and **automation Testing** on **Web Applications and Mobile Applications.**
- Hands-on experience in executing and maintaining Selenium WebDriver automation scripts using Java and TestNG (POM and data-driven approach).
- Automated manual test flows using the Flexi UI (Detox +Appium framework), reducing test execution time by ~30% and significantly improving overall efficiency.
- Hands-on experience in Agile environments, test planning, bug reporting, and defect lifecycle.
- Specialized in functional, regression, and API testing, utilizing Postman for effective test case execution.

Technical Skills

Testing Methodologies: Functional Testing, Regression Testing, Test Case Design, Test Planning.
Testing Tools: Postman, Selenium, JIRA, BrowserStack, Maven, Git.
Automation Framework: Selenium with TestNG (Hybrid approach using POM and Data-Driven techniques).
Agile Practices: Scrum, Kanban, Agile Testing, Continuous Integration (CI).
Database: Oracle SQL, PostgreSQL (Basic CRUD operations).
AI Coding Assistant-Cursor.
Language: Java.

Work Experience

Hinge Health — Bangalore, India
Quality Assurance Automation Engineer — Jan 2024 – Oct 2025

- Led QA efforts for the successful launch of Enso 3, an FDA-cleared wireless pain relief device, by executing comprehensive testing across real-world scenarios and software updates—**ensuring a seamless experience for 100K+ users and over 3.3M treatment sessions.**
- Performed end-to-end testing, identifying and reporting **230+ defects**, ensuring a stable and high-quality experience for end users.
- Leveraged AI-assisted workflows to optimize test case design, bug reporting, and regression processes**, reducing manual effort by 40% and improving overall release efficiency.**
- Executed and maintained Selenium WebDriver regression test suites using Java and TestNG.
- Developed data-driven automation scripts using TestNG DataProvider to validate multiple input scenarios.
- Executed API test cases using Postman, validating response status codes and response data to ensure API functionality.

M5 Info Solutions Pvt. Ltd. — Bangalore, India
Software Implementation and QA Tester — May 2023 – Dec 2023

- Executed functional, regression, and UAT testing for client applications, ensuring software stability.
- Identified, tracked, and reported defects using **JIRA**, helping improve test coverage and product quality.
- Wrote and executed clear and concise **test cases**, contributing to faster defect resolution and improved quality assurance outcomes.

Software Projects

N8N-based workflow automations

- Developed **N8N** based workflow automations that integrated APIs and databases, implementing **functional testing** and **regression testing** to enhance testing accuracy and operational efficiency, resulting in a 30% reduction in manual testing time.
