NEVIL JASMIN MEHTA

+91-8347062282 | nevilmehta5@gmail.com | LinkedIn | GitHub | Leetcode

PROFESSIONAL SUMMARY

Motivated Computer Science graduate with a Master's degree and hands-on experience in Python and Java development. Skilled in Python backend frameworks including FastAPI, Flask, and Django REST Framework, with practical experience building APIs and scalable backend systems. Experienced in Natural Language Processing (NLP) and interested in LLM-RAG based applications. Looking to contribute to Software Development and System Design roles where I can apply my Python backend development skills and continue working on scalable systems and AI-driven solutions.

EDUCATION

Manchester Metropolitan University, UK Sept 2023–Sept 2024

MSc Computer Science & Engineering (**Distinction –** 74%)

Relevant Coursework: Algorithms & Data Structures, Cloud and Enterprise Development, Information Systems and Databases

Indus University, India July 2018 – June 2022

BTech Computer Science & Engineering (**First Class Honors -** 9.56/10 CGPI)

Relevant Coursework: Applied Mathematics, Operating Systems, Web Development, Data Science, Machine Learning, Cybersecurity

SKILLS

Languages: Python, Java, C++, HTML, CSS, JavaScript, jQuery | **Frameworks:** Django, FastAPI, Flask, ReactJS

Databases: MySQL, MongoDB, PostgreSQL | **DevOps:** Docker, Git

Cloud: AWS | **Other Skills:** Web Scraping, EDA, Streamlit, NLP, LLM, RAG

PROFESSIONAL EXPERIENCE

Full Stack Developer, Teknobu Solutions (UK) Mar 2025 – June 2025

- Developed and managed Johnson 1871's business website using React.js frontend and Java backend with MySQL database.
- Integrated AWS services including Lambda, S3, Amplify for deployment, and Cognito for authentication and access control.
- Contributed to Teknobu Engage development, a real-time voice interaction product capable of processing audio and generating responses
- Built scalable cloud-based app and gained expertise in advanced voice-driven technologies, ensuring reliable system performance.

Software Developer, InfiniteAi Technology Private Limited Jan 2023 – July 2023

- Developed APIs using Django REST Framework for a Mitsubishi project, improving API response time and system efficiency.
- Enhanced user experience by 30% through JavaScript, HTML, CSS implementation, creating interfaces and seamless user interactions.
- Optimized API performance and database queries, improving response time and system reliability.
- Automated CAD design with Python, reducing manual effort by 70% and cutting design time from 3 days to 6 hours using Tkinter.

Python Developer Intern, Rejoicehub Solutions Jan 2022 – May 2022

- Specialized in backend development using Python frameworks, NLP, text summarization, data management, and FastAPI-based APIs.
- Performed web scraping and integrated MongoDB & MySQL databases, with successful deployment on Heroku platform for scalability.
- Improved data processing by 90% in a USA medical project, utilizing NLP (85%) and text summarization (80%) with FastAPI.
- Implemented automation scripts for data extraction, enhancing efficiency (92%), plus developed a vehicle project using Django REST.

PROJECTS (Source code available on Github)

AGSAQ Chat & Multilingual Voice AI, Freelance Project 2025

- Developed AI-Powered Chatbot using React–Python AI Chatbot integrated with Gemini for summarization and WhatsApp notifications.
- Designed multilingual AI voice call feature (Phase 2) for automated confirmations, notifications, and summarized call insights.

Plagiarism Detection for Large Language Models through Watermarking Method, Dissertation 2024

- Conducted research on plagiarism detection for LLMs, improving detection accuracy by 40% using watermarking algorithms.
- Minimized detection failures by 15%, ensuring optimal performance and reliability of watermarking system for detecting generated text.

Sentiment Analysis of Different Aspects, Industrial Report 2022

- Developed sentiment analysis application using Streamlit and DistilBERT for real-time YouTube and Twitter comment classification.
- Improved model accuracy by 30% and processing efficiency by 20% using optimized NLP pipelines and visualization tools.

VehicleLab using Django REST Framework

- Developed Django REST API with MySQL, third-party APIs, JWT authentication, and optimized performance with various features.
- Managed version control with Git and deployed on Heroku/AWS for high availability, smooth integration, and enhanced scalability.

Infomaniac News Website using ReactJS

- Built responsive React-based news platform integrating News API for real-time multi-category updates.
- Enhanced performance and responsiveness, mimicking live news portal functionality with efficient API handling and seamless interface.

PUBLICATIONS

Overview of VR Rhythm Game – Beat Saber, IJNRD Jul 2022

- The paper explores Beat Saber's mechanics, block generation from waveforms, and VR integration for immersive gameplay.

Advancements of AR in Deep Learning, IJARESM Nov 2021

- Examining AR in Deep Learning, this paper uses AI eye-tracking to create heat maps highlighting consumer focus areas.
