- Writing Gherkin for Cucumber Behavior-driven development (BDD) Test Automation Framework and creating the Test data, if required.
- Automating those Test Scripts and deployment of code in Test Repository of BitBucket.(Version Control Tool)
- Doing Code Review for other PEERs.
- Executing and validating the Test Reports for Release Regression.
- Worked on Debugging and fixing the scripts and also Test Case Optimization for cleaning the Out dated Scripts.
- Involved in cross-browser Testing using Automation.
- Executing test suites on CICD Pipeline.

Software Tools/Skills: SALESFORCE, Automation Testing (Selenium WebDriver using Java, TestNG, BDD) , JIRA, BitBucket, Page Object Model (POM), Jenkins(CICD Pipeline)

Project Title: CRM Application

Domain: Banking

Description:

Worked in SALESFORCE for Investment banking domain. The Application deals with relationship between Financial Advisors and their Clients, where application tracks and manages all the Financial Advisors and Clients data and Interactions between them.

Role: Automation Engineer

Roles & Responsibilities:

- Engaged in designing automation scripts based on Test cases and executing Test Scripts.
- Designed automation scripts using Accelq tool.
- Worked for readiness of Test scripts Batch execution and resolving issues during the same.
- Automated test cases using BDD Framework.
- Works as single point of contact for stakeholders.
- Reporting and managing defects in JIRA (Defect Tracking Tool)
- Doing Mobile Testing using PERFECTO for iOS and Android devices.

Software Tools/Skills: SALESFORCE, Automation Testing (Selenium WebDriver using Java, TestNG, BDD), JIRA, BitBucket

Project Title: Arrow Electronics

Domain: Banking

Description:

Worked in SALESFORCE for Investment Banking Domain. The Application deals with Institutional related part. It is relation between Parent Company and Child Companies where Application tracks and manages all the Opportunities and Financial Transactions which are made by Parent Company and Child Companies.

Role: Automation Engineer

Roles & Responsibilities:

- Engaged in designing automation scripts based on Test cases and executing Test Scripts.
- Worked for readiness of Test scripts Batch execution and resolving issues during the same.
- Automated test cases using BDD Framework.
- Works as single point of contact for stakeholders.
- Reporting and managing defects in JIRA (Defect Tracking Tool)
- Doing Mobile Testing using PERFECTO for iOS and Android devices.

Software Tools/Skills: SALESFORCE, Automation Testing (Selenium WebDriver using Java, TestNG, BDD), JIRA, BitBucket

Project Title: Ebay

Domain: E-commerce Domain

Description:

Ebay is a java-based application that provides B2B services for company use. The Application provides the precise and complete information of the products that are produced in the company as well as raw material stock and invoices that the organization is dealing with.
