Mohd Taha Khan

Software Engineer — GenAI — Python

taha65641@gmail.com 09118756403 LinkedIn Github
Video Resume

Professional Summary

Results-driven and performance-oriented Software Engineer with **3 years of experience** building scalable full-stack applications and **AI-powered systems**. Specialized in **Python**, **Flask**, **FastAPI**, **React**, and **multi-tenant architectures**, with expertise in **LLMs** and **prompt engineering**. Built production-grade **AI agents**, async pipelines using **Celery + Redis**, and **vector-search solutions** that power high-impact automation for enterprise clients. Passionate about designing clean architectures, shipping **reliable systems**, and creating intelligent, user-centric products that scale.

Technical Skills

Programming Languages: Python, JavaScript
Frameworks & Libraries: React, Flask, FastAPI, LangChain, Node.js
Cloud & Tools: Azure (App Service, Functions, Blob Storage, Key Vault), AWS, Git, Postman, Message Queues
Databases: PostgreSQL, MongoDB, PgVector, Pinecone, Redis (Caching & Task Store)
AI & GenAI: OpenAI, RAG, Langchain, Lovable, Bolt.new, Cursor, Co-pilot, Prompt Engineering, Vector Databases
System Design: Microservices, Authentication (OAuth2, JWT), Multi-Tenant Architecture, REST APIs

Professional Experience

Software Engineer April 2023 – Present
Synergy-ML Pvt Ltd

- Developed a **React + Python-based SCM application** to automate Excel workflows, reducing manual effort by **30%** and improving data accuracy.
- Implemented **AI-driven monitoring tools** that cut client reporting delays by **60%** through **real-time anomaly detection** and automated summarization.
- Created an **AI-powered Conflict Resolution Platform** for Covenant House that converted documents, videos, and evidence into structured insights—cutting manual search time by **50%** and resolving **100+ cases** faster.
- Enabled **scalable async processing** using **Celery + Redis**, improving API responsiveness and enabling distributed job execution, and integrated **WebSocket** based real-time updates to push job status/progress instantly to connected clients.
- Integrated **5+ AI agents** using **OpenAI + LangChain** for document Q&A, function-calling DB interactions, and CSV analytics; integrated with **PgVector** to enable **semantic search** and boost query accuracy by **20%**.

Projects

Web Mind Retriever - GenAI | *Python, Flask, React, OpenAI, Pinecone* Aug 2025 – Sep 2025

- Architected a **full-stack web application** that extracts and cleans website content using **Beautiful Soup**, generating **1536-dimensional embeddings** via **OpenAI**.
- Indexed **1000+ text chunks** in **Pinecone** to enable **vector-based search** with **millisecond response times**.
- Implemented **AI-powered querying** allowing users to ask **natural-language questions** and receive precise, context-aware answers.

Ecommerce Website | *React, Node.js, PostgreSQL, MongoDB* Mar 2023 – Apr 2023

- Engineered a **full-featured e-commerce platform** at Code Quotient enabling seamless product buying and selling for **1,000+ users**.
- Implemented **secure payment processing**, **inventory tracking**, and optimized queries for **30% faster** user experience.

Education

United Institute of Technology Allahabad, India
*B.Tech - Computer Science & Engineering — **CGPA: 8.0/10.0*** *August 2019 – July 2023*
