PROFESSIONAL SUMMARY

Software Test Engineer with **3.6+ years of experience** in **Manual, Automation, and API testing** across enterprise healthcare .Life Science applications. Strong expertise in **Java, Selenium, REST Assured BDD framework, SQL, CI/CD (Jenkins)** and **GenAI testing on real-time projects**. Proven ability to build scalable automation frameworks, improve regression coverage, and reduce production defects. Seeking challenging **SDET / Automation Engineer** roles in product or high-growth organizations.

Professional Skills

- **Automation Testing**
  Selenium WebDriver
  TestNG
  BDD (Cucumber)
  Hybrid Automation Framework Design
  Cross-browser testing

- **API Testing**
  REST Assured (BDD framework)
  API validation using Postman
  Request/Response validation, authentication, schema checks

- **Programming & Logic**
  Java (Core Java, OOPs concepts)
  Logical programming (Strings, Arrays, Collections)

- **Manual Testing**
  Agile Methodology, Functional, Regression, Smoke, Sanity, System Testing
  Test case design, execution, defect lifecycle

- **Database Testing**
  SQL (Joins, Subqueries, CRUD operations)

- **DevOps & Tools**
  Git (Version Control)
  Jenkins (CI/CD pipeline integration)
  Maven
  JIRA, ALM, Microsoft Azure

- **Emerging Technologies**
  GenAI Testing (project experience on Lab Smart Assistant Chatbot)

PROFESSIONAL EXPERIENCE

Software Test Engineer

Apexon | May 2022 – Present

Project 1: Aster(Client-DM Aster HealthCare)

Domain*:* Healthcare

Responsibilities:

- Performed **manual and automation testing** for healthcare web applications.
- Designed and executed test cases for **functional, regression, and sanity testing**.
- Automated critical regression scenarios using **Selenium WebDriver and TestNG ,POM**.
- Validated backend data using **SQL queries**.
- Actively participated in **sprint testing, defect tracking, and release validation**.

Project 2: IQVIA-COTS

Domain: Healthcare / Life Sciences

Responsibilities:

- Designed and maintained a **hybrid automation framework** using **Java, Selenium, BDD (Cucumber), TestNG, POM, Maven**.
- Automated end-to-end workflows for **patient and doctor applications**.
- Worked on multiple enterprise modules: **Concentriq**, **Spin Technologies** ,**Roche** ,**REES**, **Teleforms**, **QLIMS**
- Developed and maintained **200+ automation test cases**, significantly increasing regression coverage.
- Implemented **API automation using REST Assured BDD framework** for backend validations.
- Integrated automation suites with **Jenkins CI/CD pipelines** for scheduled and on-demand execution.
- Used **Git** for source code version control and team collaboration.
- Collaborated closely with developers, product owners, and business analysts.
- Performed **GenAI testing** by validating AI-generated outputs, accuracy, negative scenarios, and edge cases in real enterprise use cases.
- Reduced **production bug leakage by approximately 25%** through early defect identification.

KEY ACHIEVEMENTS

- Automated **200+ web and API test cases** across multiple enterprise applications
- Reduced production defects by **~25%**
- Improved regression execution efficiency through **CI/CD automation**
- Hands-on experience in **GenAI testing on real projects.**

EDUCATION

Bachelor's Degree : (BE in Computer Science Engineering) – (VTU / Sri Krishna Institute Of Technology)

CERTIFICATIONS :

- Selenium Automation Testing , REST Assured API Automation
- Java Programming , GenAI Testing.
