RAHUL GHOSHAL

Software Developer Engineer

Hyderabad, Telangana | +91 8269116958 | rahulghoshal786@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years building cross platform mobile apps and SDKs for government and fintech clients. Core strengths include React/React Native (TypeScript/JavaScript), Native Android bridging (Kotlin), Node.js backends, MySQL, and secure Aadhaar/KYC and biometric integrations (AUA/KUA). Delivered production apps and SDKs (Jeevan Praman, SBI Splito, BlackBuck), automated CI/CD pipelines, and scalable APIs to support thousands of monthly transactions.

PROFESSIONAL EXPERIENCE

SDE-2 **Oct 2022 - Present**

Syntizen (An M2P Company)

- Architected and implemented end-to-end React Native features and SDKs (Android), enforcing secure coding standards and production readiness
- Built and published Jeevan Praman Odhisha (Android) OTP based UIDAI KYC with live image capture and face match; deployed for government pension workflows (10,000+ monthly users)
- Designed and delivered PAN OCR and DigiLocker React Native SDKs for SBI Splito (Android), enabling secure PAN/Aadhaar retrieval and simplifying ~3,000 monthly KYC transactions
- Implemented AUA/KUA Aadhaar integrations (Face, fingerprint, OTP, IRIS) via native Kotlin modules; bridged Kotlin ↔ React Native to enable biometric verification in client apps (BlackBuck)
- Led development of Video KYC SDK (React Native) with Node.js + MySQL backend; deployed on AWS supporting multi role workflows for banks/fintech
- Implemented GitHub Actions CI/CD automation for Android builds and releases, reducing build to release cycle by ~30%
- Collaborated with backend, QA, and DevOps teams to design scalable APIs, improve performance, and maintain release quality through code reviews and automated tests

EDUCATION

Master of Technology (M. Tech.), Mechanical Engineering **2018 - 2021**

CGPA-8.38

Shri Govindram Seksaria Institute of Technology and Science (SGSITS)

Bachelor of Technology (B.Tech.), Mechanical Engineering **2013 - 2017**

CGPA-8.29

Technocrats Institute of Technology

CORE COMPETENCIES

- React Native, React
- Native Android Bridging
- Node.js Backend Development
- MySQL Database Management
- CI/CD Automation
- Secure Aadhaar/KYC Integrations

TECHNICAL SKILLS

Frontend Frameworks: React**,** React Native, Next.js, Redux, Saga
Databases: MySQL
Backend Frameworks: Node.js, Express.js
Programming Languages: JavaScript, TypeScript, Kotlin, SQL
Operating System: Linux, Mac
Integrated Development: Visual Studio, Android Studio
Source and Version Control: Git, Github, CI/CD pipelines
Data Visualization: GoogleCharts, Echarts
Computer Science Fundamentals: Object Oriented Design, Data Structures, Algorithm Design, Problem Solving, Complexity Analysis, Agile Methodologies, Testing, and Debugging.
API Tools: Postman, Hoppscotch
Development Environment Adaptability: Proven ability to thrive in fast-paced
DevOps: Docker, AWS, Azure
AI Tools: Prompt Engineering**,** Github Copilot, Google Gemini, ChatGPT, Microsoft Copilot,Vercel,

KEY PROJECTS

Jeevan Praman Odhisha (Life Certificate App), Android (Production)

- Implemented UIDAI OTP KYC flow, secure image capture, and face match
- Integrated secure transmission/storage; live on Play Store with 10,000+ monthly users

PAN OCR DigiLocker SDK, SBI Splito (React Native Android)

- Developed PAN OCR module and DigiLocker webview integration to securely fetch PAN/Aadhaar data and reduce manual KYC friction
- Supported ~3,000 monthly transactions

Thomas Cook VKYC Project (Node.js, Backend, AWS)

- Developed and maintained backend APIs using Node.js with MYSQL database integration to support Forex VKYC workflows.
- Implemented Aadhar and PAN verification including video-based KYC sessions between customer, agent and auditor for regulatory- compliant approvals according to RBI Guidelines.
- Designed secure KYC status tracking, audit logs and approval flows aligned with compliance requirements.
- Deployed and managed services on AWS, ensuring scalability, security and high availability.

SELF-MADE PROJECTS

Card OCR SDK, React Native *Github Link*

- Developed a custom OCR SDK to scan cards and **extract card details** such as name, number, and other identifiers using real-time camera capture using **Google ML Kit Text Recognization.**
- Built as a reusable SDK with secure data handling and seamless React Native integration.

Face Detection SDK, React Native *GitHub Link*

- Developed a **Face Detection SDK** using React Native native modules on Android to detect **single face, multiple faces, or no face** in real time using **Google ML Kit Face Detection**
- Built as a reusable SDK with seamless React Native integration and optimized performance for camera-based workflows.

Google Pay Clone, React Native ***GitHub Link***

- Developed a Google Pay-like interface in **React Native** that works seamlessly on **both Android and iOS**.
- Implemented responsive layouts for transaction history, quick actions, cards, and other components, ensuring a consistent look across different screen size

LANGUAGE

- English (Fluent)
- Bengali (Native)
- Hindi (Native)
- Telugu (Basic)

INTERESTS

- Learning New Technology
- Playing Tabla
- Badminton
- Travelling and explore new places
