## SKILLS SUMMARY

- **Languages**: Python, JavaScript, SQL
- **Frameworks**: Flask, FastAPI, ReactJS, Pytest
- **Database**: Mongodb, MySQL, PostgreSQL, ORM, SQLAlchemy
- **Other**: Jenkins, AWS (S3, EC2, Lambda, Boto3), Docker

## WORK EXPERIENCE

**Software Engineer | Opcito Technologies** **August 2022- Present**

- Built and maintained REST APIs across multiple projects ensuring efficiency, documentation, and security.
- Implemented data processing, data integration and data encryption using Python, Flask, MongoDB, MySQL, and Redis.
- Designed and implemented database schemas using PostgreSQL, MySQL, MongoDB .
- Identified and addressed performance bottlenecks in APIs and backend systems.
- Conducted API testing, implemented automated testing with PyTest, developed and maintained test scripts, and implemented CI/CD pipelines using Jenkins
- Collaborated with DevOps on infra and deployments, and with the frontend team to deliver on project requirements.
- Migrated applications, debugged and resolved issues, and performed root cause analysis for infrastructure issues and product bugs.Participated in code reviews and contributed to documentation efforts to maintain project transparency and knowledge sharing.

## PROJECTS

**Food Tech Platform** (Python, Flask, MongoDB, Pandas, NumPy, JavaScript, ReactJS, Stripe)

- Developed and optimized **REST API**s, backend features, and data-processing components for an AI-based food personalization platform.
- Implemented integrations (CSV/Excel/Google Sheets), location mapping, product sharing, and maintained AI recommendation notebooks.
- Identified and resolved API issues, improved performance, fine-tuned database queries for performance and ensured backend scalability and reliability through thorough testing.
- Collaborated with frontend and product teams to meet project requirements and created clear documentation for APIs and data models.

**Resource Management Application** (Python, Flask, MongoDB, MYSQL, JavaScript, ReactJS)

- Designed and developed a full-stack resource management platform with role-based access control for employees, HR, and team leads.
- Implemented **data encryption mechanisms in MySQL** to secure sensitive employee and resource information.
- Participated in **sprint planning**, collaborated with the frontend team, and supported end-to-end feature implementation.
- Managed deployments to **staging and QA** environments and led defect reporting and tracking.
- Worked closely with senior management to analyze issues, propose solutions, and support continuous improvement.

**Zero Trust Security Platform** (Python, Pytest, Jenkins, AWS, OpenAI, ChatGPT, Gemini)

- Automated test workflows using **Python, Pytest, and Jenkins**, improving test coverage and reliability across platform modules.
- Developed and maintained automated test scripts for **GenAI applications, AI firewall, Database apps, SSH apps, User management, and RBAC systems**.
- Implemented **CI/CD pipelines** to streamline automated testing and ensure continuous quality validation.
- Assisted in setting up and configuring **gateways, VMs, and infrastructure** required for functional and integration testing.
- Created comprehensive **test plans, test cases, and test reports** covering quality metrics, findings, and coverage.
- Validated features through manual/automated testing and ensured defects were accurately identified and resolved.

**Load Balancer Platform** (Python, Pytest, Jenkins, AWS, Azure, GCP, VMware Cloud, Kubernetes)

- Monitored **new Functional Testing (FT) builds**, generated reports, and triaged failures including infrastructure issues, product defects, and configuration problems.
- Automated **Jenkins workflows** for multiple test suites across feature areas, improving efficiency and reliability of CI pipelines.
- Performed **script fixes, test case fixes**, and enhancements to maintain stable and accurate FT execution.
- Developed and refined **test plans** while improving existing automated test suites for better coverage and robustness.
- Contributed to the development of an **internal monitoring tool** to track FT runs, health metrics, and failure trends.

---

## EDUCATION

**Pune University** Pune, India
MSc Computer Science, CGPA: 9.71 **2021-2023**
**Pune University** Pune, India
BSc Computer Science, Percentage: 78.84% **2018-2021**
