PROFESSIONAL SUMMARY

Full Stack Software Engineer with experience building production AI Saas platforms and enterprise web applications. Skilled in **React.js**, **Python Flask**, **LangChain**, and **Azure** cloud deployment. Delivered AI agent systems, **LLM-powered features** and full stack products end-to-end for US and Middle East enterprise clients. Patent holder. Seeking a high growth engineering role with strong team culture and technical depth.

WORK EXPERIENCE

Software Engineer – Full Stack & AI *Jul 2025 – Present*

Resermine Inc (US-based AI SaaS Startup)

- Designed and shipped **LLM-powered features** using LangChain and open-source LLMs (Mistral AI, Ollama) enabling conversational analysis, dynamic plots and tool-based API calling.
- Led end-to-end development of an **AI agent system** from architecture design to full frontend-backend integration under tight deadlines.
- Built and scaled **RESTful Flask APIs**, session management, structured responses, error handling and performance-optimized workflows serving US and Middle East enterprise markets.
- Development complex **React.js** / **TypeScript** / **Redux** features including routing architecture, query-param state, large data tables and interactive data visualizations.
- Reduced API traffic by **~75**% by eliminating redundant calls and implementing React Query client-side caching significantly improving UX.

Software Engineer Intern | Volvo Group | Karnataka, Bengaluru *Jan 2025 – Jul 2025*

- Developed and maintained an internal framework for system-level (V5) testing of Volvo trucks & buses using **C++, C#**.
- Developed frontend for internal tool using **React.js** which visualizes signal interaction between different LDCs.
- Eliminated dependency on PlantUML visualization by designing a custom algorithm using **JavaScript** & data structures.

PROJECTS

Team & Project Management Platform (Freelance | Client: IRAI Engineering, Hosur-Bengaluru) *Aug 2025 – Feb 2026*

- Built a full-featured team, project and task management platform for a **10–15-member** engineering org.
- Implemented **role-based access control (RBAC)** with three privilege levels: Admin, Project Lead & team members.
- Built **Jira-styled drag-and-drop task board** using the native browser Drag and Drop API with optimistic UI updates.
- Designed the complete **MySQL database schema** from scratch for users, roles, projects, tasks, assignment and audit relationships.
- Configured **production-grade Azure VM security**: dedicated deploy user, SSH key-only auth, root login disabled, Fail2Ban, UWF firewall (ports 80/443/22 only), Azure NSG rules, Nginx reverse proxy, domain & SSL configuration.

TECHNIAL SKILLS

Languages:	Python, JavaScript, TypeScript, C++
Frontend:	React.js, Next.js, Redux Toolkit, Tailwind CSS, React Query
Backend:	Python Flask, REST APIs, MySQL, Redis, Microservices
AI & LLM:	LangChain, RAG pipeines, AI Agent workflows, OpenAI, Mistral, Ollama
Cloud & DevOps:	Azure VM, Docker, Nginx, Linux Server Hardening, SS/HTTPS, NSG, UFW, CI/CD
Tools:	Git, GitHub, Jira, Agile, Claude Code, Cursor, Antigravity, Codex (AI-assisted development)

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering *2021- 2025*

Vellore Institute of Technology (VIT), India | CGPA**: 8.84 / 10** | Minor: Artificial Intelligence
