SUMMARY

Frontend Engineer with nearly 3 years of experience building scalable and performant web and mobile interfaces using React, TypeScript, and React Native. Skilled in optimizing UI performance, architecting reusable components, and delivering high-quality features with strong ownership in Agile environments.

TECHNICAL SKILLS

Languages & Databases: JavaScript, TypeScript, Python, HTML, CSS, SQL, PostgreSQL, MongoDB
Frameworks & Libraries: React.js, Redux, React Native, Tailwind, Next.js, Node.js, Express.js, Django
Tools & Platforms: Git, Postman, Sentry, Mixpanel, Notion, Draw.io

EXPERIENCE

Maximl Labs **Oct 2025 – Present**
SDE-2 *Bengaluru, India*

- **Leading the documentation initiative** for the Permit-to-Work (PTW) product — defining and building **end-to-end technical documentation** covering features, configuration options, and workflows to improve onboarding and cross-team clarity.
- **Driving frontend ownership across PTW's web and mobile applications**; collaborating with backend, QA, and product teams to ensure performant, reliable feature delivery.
- Identifying and proposing **UI and performance improvements** in critical workflows.
- Creating **reusable UI components** and patterns to standardize frontend implementation across modules.

Maximl Labs **July 2023 – Sep 2025**
SDE-1 *Bengaluru, India*

- Transitioned authentication from **JWT** (local storage) to secure **HTTP-only cookies,** strengthening application security and session management.
- Optimized frontend performance by implementing **server-side pagination**, **lazy loading**, and **infinite scroll** — reducing load times by **~70%.**
- Implemented **Smart Autosave** with debounced and batched updates for high data consistency and fewer API calls.
- Integrated **Sentry** and **Mixpanel** for monitoring and analytics, cutting **MTTR by 25%**.
- Designed a reusable **Async Job Progress Renderer** component to standardize progress tracking and enhance UX for long-running jobs.
- Developed **advanced document printing** with configurable layouts and batch mode for permits and attachments (PDF, Word, Excel, images), optimizing layout efficiency and space utilization.
- Developed **Role-Based Access Control (RBAC)** using **CASL** for dynamic UI permission handling.
- Contributed to the **offline-first React Native** PTW app supporting low-connectivity environments.
- Participated in **Agile workflows** — sprint planning, peer reviews, and CI/CD pipelines.
- Enabled **geolocation capture** across modules to support field-level tracking and operations.

Maximl Labs **Jan 2023 – June 2023**
SDE-Intern *Bengaluru, India*

- Developed frontend components for the PTW product using **React** and **Redux**; wrote unit tests with **Vitest** and mock APIs using **MSW** with custom interceptors.
- Built and optimized **UIs for AI-powered and smart-intelligence products**, focusing on rendering ML-driven outputs, result visualization, and seamless API integrations.
- Built a **Postman-like API testing tool** in React, supporting collections, mock servers, and saved responses.

Other Work: Built applications including an **IPL T20 Live Dashboard** using **Next.js, TypeScript**, and **Puppeteer**, featuring SSR and data scraping to deliver SEO-friendly, scalable UI performance.

EDUCATION

Indian Institute of Information Technology, Sri City **Aug 2019 — May 2023**
B.Tech - Computer Science Engineering, ***CGPA – 8.69*** *Andhra Pradesh, India*

CERTIFICATIONS

- **React & Django Full Stack**, **Typescript**, UI Design - Udemy
- **Front-End Development with React**, Server-side Development - Coursera
