Vikash Kumar

Java developer

8 Years' Experience in java backend along with updated java 21, spring boot, GraphQL, Messaging Queues, micro services and cloud technologies. Wide range of experience in Banking and finance domain, Automobile domain, e-commerce domain, supply-chain and media domain web application. Proven ability to leverage AWS knowledge. Expertise in BPM design and development.

WORK EXPERIENCE

Baxter Planning Sep 2024 – Present
Remote, India
Project: Prophet – ALM (Asset Lifecycle Management)

- Architected and developed as backend development with graphql APIs and backend logic for the ALM module using Java 21, Spring Boot and AWS cloud infrastructure
- Implemented logic for the LTB (Last Time Buy) module to calculate optimal purchase quantities by integrating variables such as return rates
- Applied System Design for defining application HLD and LLD for designed cloud-native applications leveraging: EC2, S3, VPC, SNS, SES, infrastructure setup through terraform module.
- Amazon ElastiCache (Redis) for distributed caching and performance optimization.
- Followed TDD approach for validating the business scenarios and Standardized the code quality and coverage using sonar and unit & integration testing

Ford Motors Mar 2023 – Sep 2024
Remote, India
Project: FordLiive Powerwall

- Conceptualizing and building REST APIs using spring boot and java 17 features.
- Involved in requirement specification and gathering of data for automobile domain specific application for HLD and LLD.
- Worked on cloud technologies using GCP cloud services with high throughput and SLO of 99.7% availability
- Setup infrastructure for cloud native application using terraform modules with having Tekton CI/CD pipelines for more than 90 % accuracy in infra setup
- Followed TDD approach for validating the business scenarios and Standardized the code quality and coverage using sonar and unit testing

SKILLS:

- Java
- Spring
- Springboot
- GraphQL
- JOOQ
- Terraform
- Hibernate /JPA
- Micro services
- AWS Cloud
- GCP
- Apache Kafka
- IBM MQ
- MongoDB
- Postgres SQL
- Javascript/TypeScript
- Project Management
- Application Design
- System Design
- Datadog

EPAM Systems Dec 2020 – March 2023

Pune, India

Project: BRD-GLOS

- Conceptualizing and building REST APIs using java 11 and spring boot micro services architecture
- Involved in requirement specification and gathering of data for technical HLD and LLD designs activities with SLO 99.8% of availability for AWS cloud native infra
- Worked on Banking and finance domain to leverage highly safe and secure application using spring security and other development tools.
- Participated for integration activities with Front-end and DevOps
- Worked on NOSQL technologies like: MongoDb and DynamoDb
- Followed clean code design pattern and SOLID principles for standardize the software development process.

CYBAGE Software Pvt. Ltd Jan 2018 – Nov 2020

Pune, India

Project: Decisionmines

- Conceptualizing and building REST APIs using micro services architecture.
- Involved in technical HLD and LLD activities with using cloud native applica
- Deployed 99.99% monthly uptime for EC2 instances deployed across two c Availability zones
- Involved in sync with the front-end as well as Machine learning team to de Request
- Worked on Caching and async features, which improves more than 60% be Performance application.
- Followed TDD approach to leverage unit testing and using Mockito framew

EDUCATION

MSC CS – 2012-2014: PONDICHERRY UNIVERSITY, PUDUCHERRY

BCA – 2009-2012: PATNA SCIENCE COLLEGE, PATNA

AWARDS and RECOGNITION

Employee Of the year

Pat on Back

Awareness

- Spring Batch
- Spring Security
- ORM Framework
- Rabbit MQ
- DSA
- HLD and LLD
- Maven
- Gradle
- CI/CD Pipeline
- Jenkins
- Cloud Formation
- Kubernetes
- Docker
- Liquibase
- Flyway
- Html/CSS
- ReactJs
- GenAI
- RAG
- Log4J
- Kibana
- Cache
- Apache Parquet
- Oracle
- MySQL
- MariaDB
- EC2, S3, Elastic search, Cloud search, SNS, SES, Lambda, RDS, Step Functions, Data Lake, VPC etc.
