# VIKASH SINGH

A goal-oriented & versatile professional, targeting challenging assignments in **Software Development** in a reputed organization in **IT & Software Based Industry**; preferably in **Delhi-NCR, Bengaluru or Hyderabad.**

vikashs7077@gmail.com | +91-8354823013 | https://www.linkedin.com/in/vikash7077/

## CORE COMPETENCIES

- Software Architecture
- User Experience Design
- Agile Project Management
- System Integration
- Performance Optimization
- Software Development Lifecycle
- Cloud Computing Solutions
- CI/CD
- Application Scalability

## SOFT SKILLS

- Collaborator
- Communicator
- Leadership
- Problem-solver

## TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, TypeScript, Kotlin, C++, Shell Scripting.
- **Frontend Technologies:** React.js, HTML5, CSS3, Bootstrap, Responsive Design, UI/UX.
- **Backend Technologies:** Node.js, Express.js, NestJS, Spring Boot, RESTful APIs, GraphQL.
- **Database Systems:** PostgreSQL, MongoDB, MySQL, Database Design, Query Optimization.
- **DevOps Tools:** Git, Docker, Kafka, JWT Authentication, CI/CD Pipelines, Version Control.
- **Development Methodologies:** Object-Oriented Programming (OOP), Agile Development, Test-Driven Development, Code Review, SDLC

## EDUCATION

- **B.Tech. in Computer Science** from Motilal Nehru National Institute of Technology, Allahabad, Prayagraj in **2025**

## AWARDS & RECOGNITIONS

- **Runner-up, Webster, Codesangam** - Annual MNNIT Allahabad's web development competition, delivering innovative and tested web applications.
- **2nd Runner-up, Revengg, Avishkar** - Penetration testing and cybersecurity challenge, solving complex security problems and vulnerabilities.

## PERSONAL DETAILS

- **Date of Birth:** 11th October 2002
- **Languages Known:** English, Hindi
- **Location:** Bengaluru

## PROFILE SUMMARY

- Possess extensive experience spanning **over an year in software development**, focusing on **full-stack engineering in the tech industry**, dedicated to crafting innovative solutions that prioritize user-centric design.
- Currently working on the position of **Software Development Engineer I at Calfus Inc**, tasked with designing and executing sophisticated software solutions aimed at optimizing operations and improving user engagement.
- Cultivated a diverse skill set that includes **full-stack development, database management, and API integration**, demonstrating a consistent track record of producing high-quality software solutions.
- Holds extensive expertise in contemporary software development methodologies, such as **Agile practices and Test-Driven Development**, guaranteeing superior code quality and timely project delivery.

## Work Experience

### Since Jan'25 | Calfus Inc., Bengaluru

Calfus

**As Software Development Engineer I (Since Jul'25)**

- Engineered and deployed a scalable Helpdesk Management Platform using **NestJS, React.js, TypeScript, and PostgreSQL,** streamlining feedback and request workflows for **300+ users** and reducing administrative **turnaround time by 75%.**
- Implemented automated notification mechanisms through Sandbox email APIs, enabling real-time alerts to administrators and users for new submissions while supporting 1,000+ concurrent ticket requests with **99.9% application availability**.
- Designed and structured a robust **PostgreSQL data architecture comprising 15+ normalized tables,** while integrating JWT-based authentication and role-driven access controls to ensure secure and efficient system operations.
- Enhanced **application reliability and performance by resolving 50+ critical defects** and implementing strong data validation frameworks using TypeScript interfaces, middleware, Kotlin, and Spring Boot, resulting in 90% improvement in system stability and zero data integrity issues.

**As Fullstack Developer Intern (Jan'25-Jun'25)**

- Designed and delivered multiple full-stack web applications using React.js, Node.js, Express.js, and PostgreSQL, driving a **20% uplift in user engagement** across digital platforms.
- Developed and **optimized 10+ RESTful APIs and GraphQL services** leveraging Spring Boot and Node.js, improving API response performance by 25% while sustaining 99.5% system uptime.
- Architected **scalable PostgreSQL database structures**, implementing optimized queries and indexing strategies while integrating third-party services such as payment gateways and authentication platforms to expand application capabilities.
- Built and implemented an automated API testing framework using Cucumber, Kotlin, Spring Boot, and Kafka, **reducing manual QA efforts by 90%** and enabling CI/CD-driven automated test execution across multiple microservices.

## Projects

**Kafka Integrated Service | Spring Boot, Kotlin, NestJS, TypeScript, GraphQL, PostgreSQL, TypeORM, Kafka | Jan 2025**

- Designed and developed a distributed microservices architecture using NestJS and Kotlin Spring Boot, ensuring seamless synchronization between two independent databases whenever updates occur in either service.
- Implemented Kafka-based event-driven communication to enable real-time data exchange and maintain high reliability and consistency across services.
- Optimized database performance through TypeORM query enhancements and implemented Data Transfer Objects (DTOs) to streamline data validation and efficient data handling.
- GitHub: VikashSingh0007/EmpManagement

**DivvyUP | ReactJS, MongoDB, Node.js, Express.js, Recharts, EmailJS, ReactOAuth2.0 | Nov 2023**

- Developed a group expense and money management platform supporting 500+ daily active users for transaction tracking and debt settlement.
- Enabled real-time financial insights into spending and savings, reducing manual tracking errors by 40% while supporting multi-currency transactions.
- Built features including bill storage, receipt management, and expense export functionality, improving user retention by 25%.
