Shivank Mehta

Software Developer

Python Software Developer with **3+ years of experience at Amdocs**, specializing in **backend development, automation, and secure RESTful APIs**. Strong expertise in **Python, Django ORM, PostgreSQL, Pandas**, and **enterprise authentication (OAuth2, JWT, Azure Active Directory, SSO)**. Proven ability to build **scalable data pipelines, monitoring systems, and automation workflows** in Linux environments.

WORK EXPERIENCE

Software Developer
Amdocs

03/2024 - Present *Gurugram, India*

Achievements/Tasks

- Developed and maintained **Python-based automation scripts** for an in-house monitoring platform (Mercury), reducing manual operational effort by **~40%**.
- Built and optimized **RESTful APIs using Django ORM**, ensuring scalable, secure, and high-performance backend services.
- Designed and implemented **data ingestion pipelines** for file synchronization, parsing, transformation, and loading into **PostgreSQL** databases.
- Integrated **OAuth2 authentication with Azure Active Directory**, improving API security and compliance with enterprise standards.
- Implemented **Single Sign-On (SSO)** for tools such as Grafana, enhancing user authentication efficiency. Enabled **real-time alerting and email notifications**, reducing incident response time and improving observability.

Associate Software Developer
Amdocs

05/2022 - 03/2024 *Gurugram, India*

Achievements/Tasks

- Integrated custom metrics into **Prometheus** and configured alert rules to prevent downtime and improve incident response time by **30%** .
- Collaborated with DevOps, QA, and product teams in Agile sprints for troubleshooting and feature releases.
- Created interactive dashboards using **Grafana, Elasticsearch, Kibana, and SQL** for operational insights.
- Coordinated directly with clients to understand issue impact, provide timely updates, and meet SLAs.

EDUCATION

Bachelor of Engineering (B.Tech) – Computer Science
Chandigarh University

2018 - 2022

SKILLS

Python | Django | Flask | FastAPI | Git

Rest APIs | Microservices | CI/CD | Jira

Docker | Postman | Grafana | PostgreSQL

PERSONAL PROJECTS

Data Ingestion & Monitoring Pipeline – Python

- Data Ingestion & Monitoring Pipeline – Python (NumPy, statistics), comparing trends across weeks.
- Implemented **real-time monitoring and alerting**, increasing operational visibility.
- Automated routine operational tasks using **Python scripts and Linux cron jobs**.

Automated ETL & Data Quality Validation Pipeline

- Developed a full-stack **Django application** to visualize processed data using interactive dashboards.
- Used **Uber H3 geospatial indexing** to enable scalable, location-based data analysis.
