Mobile: +91 9003729065
Mailto: shankaranarayanan1003@gmail.com

With 4.5 years of experience as a MERN Stack Developer, I specialize in building dynamic, responsive web applications using MongoDB, Express.js, React.js, and Node.js. I focus on cross-browser compatibility, performance optimization, and delivering seamless user experiences. Proficient in JavaScript, HTML, CSS, Bootstrap, and Material-UI, I have a proven track record in developing scalable and maintainable full-stack solutions. Skilled in integrating RESTful APIs, collaborating closely with UX/UI designers, and adhering to best development practices including Git. I thrive in agile environments, actively contributing to sprint planning, code reviews, and effective team collaboration.

Professional Experience:

- Working as **UI/UX Developer at TAGCS Private Limited** since **August 2023 to Till Date.**
- Worked as **Associate Web Designer at Tag Technology Service** since **July 2021 to July 2023.**
- Worked as **UI/UX Designer at MasterStroke Tech Systems** since **September 2020 to April 2021.**
- Worked as **Visual Designer Intern at Glocal Sense** since **December 2019 to March 2020.**

Technical Skills:

Operating System	XP/Windows 7, Windows 8, Windows 10
Technology	HTML, CSS, JavaScript
Framework and Libraries	React Js, Node Js, Angular, Next Js, Express Js, Mongo DB
Styling Framework	Bootstrap, Material UI
Tools	Microsoft Visual Studio, Atom, Illustrator, Photoshop, Figma, Xd, Postman

Project Experience Summary:

Project1

Project: Customer Management Together-Web Application
Client: TAGIT Store, Chennai
Environment: React Js, Material UI and Restful API
Role: MERN Stack Developer
Duration: August 2024 to Till Date

Description:

The Customer Management Console, built using the MERN stack (MongoDB, Express.js, React.js, and Node.js), is a comprehensive platform designed to streamline customer interactions across multiple products. It enables efficient management of customer profiles, product information, order processing, support tickets, appointments, account settings, and billing operations. Leveraging MongoDB for structured data storage and Node.js/Express.js for robust backend services, the console delivers real-time updates and

smooth API integration. Enhanced with advanced analytics and strong security protocols, it ensures data integrity and operational efficiency while offering a seamless, user-friendly experience that drives customer satisfaction and engagement.

Project 2	
Project:	Tailor Management System (TMS)
Client:	Lakshitha Designer Studio, Mogappair, Chennai
Environment:	React Js, Material UI and Restful API
Role:	MERN Stack Developer
Duration:	May 2024 To August 2024

Description:

The Tailor Management System, developed using the MERN stack (MongoDB, Express.js, React.js, and Node.js), is a powerful solution designed to optimize tailoring workflows. It streamlines the management of client information, order tracking, custom measurements, and appointment scheduling, while also handling inventory control and billing processes. Utilizing MongoDB for dynamic data storage and Express.js/Node.js for a scalable backend, the system ensures smooth data flow and real-time updates. With built-in analytics and robust security measures, it significantly enhances operational efficiency and client engagement, delivering a seamless experience tailored to the needs of tailoring professionals.

Project 3	
Project:	Personal Website (Dynamic)
Client	AL Ganesan, Chennai
Environment:	Angular and Bootstrap
Role:	Developer as well as Tester (Individual)
Duration:	Oct 2021 to Apr 2022

- Implement and maintain responsive design elements, ensuring the website is visually appealing and functional across various devices.
- Ensure a smooth and intuitive user experience through interactive features, clear navigation, and fast load times.
- Regularly test and optimize website performance, including load times, responsiveness, and overall efficiency.
- Bug Fixes and Updates: Identify and resolve any bugs or issues, and apply updates to keep the website functioning properly and securely.

Project 4	
Project:	StudySmart (Edutech Application)
Client:	Imperial Edutech, Singapore
Environment:	Microsoft Visual Studio, HTML, CSS, Javascript, Bootstrap
Role:	Front-End Developer
Duration:	August 2021 to February 2023

The EduTech application for primary education, built with HTML, CSS, and JavaScript, enhances learning through interactive lessons, resources, and assessments. It supports lesson planning, tracks student progress, and delivers age-appropriate content. With a user-friendly design, responsive features, and strong performance, it offers an effective and secure educational experience for students, educators, and parents.

Academic Profile:

Course	Percentage	Year of Passing	Board/University
B.Sc	75%	2020	VIT University, Vellore.
HSC	80%	2017	State Board, Vellore.
SSLC	85%	2015	State Board, Vellore.

Personal Profile:

Date of Birth : March 10,2000

Gender : Male

Marital Status : Single

Linguisticability : English, Tamil

Address : No: 45/17, Vijayaragavapuram 1st street, Sathuvachari,Vellore-632009.
