Raja –Cloud DevOps Engineer

2-454 Main Street, DLF, CHENNAI 600089 | 7780666266 | pasalaraja0@gmail.com | www.linkedin.com/in/ pasala-raja-29b419175

Profile

Accomplished **Senior Cloud DevOps Engineer** with 4+ years of experience specializing in **AWS** and **GCP** ecosystem automation. Expert in **Infrastructure as Code (Terraform/Cloud Formation)** and container orchestration (**Kubernetes/EKS/GKE**). Proven track record of architecting scalable CI/CD pipelines and robust monitoring solutions that optimize system reliability, security, and cloud cost-efficiency.

Experience

RSA | CLOUD-DEVOPS ENGINEER | SEPTEMBER 2025 – PRESENT

- **Infrastructure as Code:** Architected scalable **GCP/AWS** environments using **Terraform (Modules/State)** and **CloudFormation**; managed **GCE** and **EC2** fleets with **Auto Scaling (ASG)**.
- **Container Orchestration:** Managed production **EKS** and **GKE** clusters; authored **Helm** charts for microservices and utilized **Rancher/Lens** for cluster management.
- **Modern CI/CD:** Engineered pipelines using **Jenkins Shared Libraries (Groovy)**, **GitLab CI**, and **AWS CodePipeline**; integrated **SonarQube**, **JUnit**, and **BlackDuck** for security gates.
- **Serverless & Automation:** Developed **Python (Boto3)** scripts to automate **AWS Lambda** and **Google Cloud Functions** for microservice onboarding and build-job maintenance.
- **Observability & Security:** Established full-stack monitoring using **Prometheus, Grafana, CloudWatch**, and **CloudTrail**; enforced security via **IAM, KMS, GuardDuty**, and **Secrets Manager**.
- **Advanced Networking:** Designed multi-tier **VPC** networks with **PrivateLink**, **Transit Gateway**, **ALB/NLB**, and **Route 53**.

TRANSUNION | CLOUD ENGINEER | OCT 2023 – JAN 2025

- **Provisioning:** Automated cloud provisioning on **AWS/GCP** using **Terraform** and **Ansible**; implemented **VPC Peering** and **Direct Connect** for secure hybrid connectivity.
- **Data & Storage:** Managed **S3** lifecycle policies, **Google Cloud Storage (GCS)**, and **RDS (Aurora/MySQL)**; utilized **BigQuery** and **Pub/Sub** for event-driven data workflows.
- **Cost Governance:** Spearheaded **FinOps** initiatives using **AWS Trusted Advisor** and **Cost Explorer**, utilizing **Spot/Reserved Instances** to reduce cloud spend by 20%.
- **Release Engineering:** Controlled end-to-end deployment from **QA to Prod** using **Maven** and **Nexus**; managed complex **Git** branching and tagging for build backtracking and compliance.

CAPGEMINI | CLOUD ENGINEER | OCT 2021 – APRIL 2023

- **AWS Core Services:** Provisioned and supported cloud infrastructure involving **EC2**, **S3**, **EBS**, **RDS**, **IAM**, **Route 53**, and **Auto-scaling Groups**.
- **Centralized Logging:** Deployed and maintained the **ELK Stack (Elasticsearch, Logstash, Kibana)** for proactive troubleshooting and system visibility across **EC2** instances.

QUALCOMM |Associate Engineer | DEC 2018 –SEPT 2021

- **App Deployment:** Deployed **Java/Spring Boot** apps on **Apache Tomcat** within **Dockerized** environments; used **Docker Swarm** and **AWS ECS** for container orchestration.
- **Core Automation:** Built **CI/CD** workflows using **Maven** and **Jenkins**; authored **Bash** scripts for routine **Linux/Unix** system administration and packaging fixes.

Education

BACHELOR OF COMPUTERS IN CSE WITH 72 % | APRIL 2018| ,JNTUA ANDHRA PRADESH

TECHNICAL SKILLS :

Category	Technologies & Tools
AWS Services	**Compute:** EC2, Lambda, Fargate, EKS, ECS. **Storage:** S3, EBS, EFS. **Database:** RDS (Aurora), DynamoDB, ElastiCache. **Management:** CloudWatch, CloudTrail, Config, Systems Manager (SSM)
GCP Services	**Compute:** GKE, App Engine, Cloud Run, Compute Engine. **Data/Storage:** Cloud Storage (GCS), BigQuery, Cloud SQL, Pub/Sub. **Identity:** Cloud IAM, Cloud Build, Artifact Registry.
IaC & Config	**Terraform** (Modules/State), **Terragrunt**, CloudFormation, **Ansible**, Packer.
Orchestration	**Kubernetes** (EKS/GKE), Docker, **Helm**, **ArgoCD (GitOps)**, Rancher, Lens
CI/CD / Build	**Jenkins** (Shared Libraries), GitLab CI, **GitHub Actions**, CodePipeline, Maven, Nexus.
Observability	Prometheus, Grafana, **ELK Stack** (Elasticsearch), CloudWatch, Datadog, OpenTelemetry.
Security/DevSecOps	**IAM**, KMS, GuardDuty, **Secrets Manager**, Trivy, Snyk, HashiCorp Vault, SonarQube.
Networking	**VPC** (Subnets, IGW, NAT), ALB/NLB, **Route 53**, **PrivateLink**, Transit Gateway, Istio.
Dev & Data **Methodologies**	**Python (Boto3)**, Bash, Java, Spring Boot, **Kafka**, Redis, MySQL, PostgreSQL. **Agile/Scrum**, **SRE** (Site Reliability), **SDLC**, **FinOps** (Cost Optimization), **ITIL**.

,

Project Highlights

- **Cloud Infrastructure Automation:** Created reusable Terraform modules, secure VPCs, IAM roles, and S3 lifecycle policies.
- **Kubernetes Platform Deployment:** Designed CI/CD pipelines (Jenkins, Ansible, Docker, Kubernetes) with self-healing, auto-scaling, and disaster recovery strategies.

-
