Experience

Thoughtworks *Bangalore, IN*

Senior Software Engineer Sept 2025 – Present

- Led design of the **Specification + MCP (Model Context Protocol)** workflow for an AI-native SDLC platform and provided technical leadership to 4 engineers, improving team velocity and reducing blocker resolution time.

Software Engineer Jul 2022 – Aug 2025

- Spearheaded the end-to-end UPI + NetBanking payments service, supporting **₹56Crores** in Day-1 volume and **530+** successful transactions through fault-tolerant integration with Juspay.
- Enabled migration from Spryker to Medusa.js, transitioning away from the legacy monolith and cutting platform licensing costs by around **$3M annually**.
- Built automated reporting tooling reducing turnaround from days to under **5 minutes**, eliminating repetitive manual effort for **10+ engineers**.

Software Engineer Intern Feb 2022 – Jul 2022

- Built secure deployment infrastructure on AWS using Nomad, Consul, and Vault.
- Reduced deployment time by **75%** through CI/CD optimizations and containerized build pipelines.

Projects

Open Fiesta | *Next.js, TailwindCSS, ShadCN UI, Vercel AI SDK, Drizzle ORM, Postgres* Aug 2025

- Launched an **AI chat platform** with **200+ models** and side-by-side comparison, reaching **800+ active users** within the first few weeks.

MCP Server Integrations (Klavis.ai) | *FastMCP, Python, Typescript* July 2025

- Implemented secure **Model Context Protocol (MCP)** servers for Airtable and monday.com.

Not V0 | *Next.js, TailwindCSS, ShadCN UI, Vercel AI SDK, Supabase, Postgres, E2B Sandbox* July 2025

- Developed an **open-source alternative to v0.app** that generates complete **Next.js applications** from a single prompt with live code preview; onboarded **100+ early users**.

Awards & Achievements

Google DeepMind Gemini 3 Bengaluru Hackathon | *2nd Prize ($30,000 AI credits)* Feb 2026

- Built a **real-time multilingual AI voice calling agent** using Gemini Realtime API, LiveKit, and Twilio capable of autonomous phone conversations with seamless human handoff.

Education

St Joseph's College of Engineering Graduated in June 2022

Bachelor of Engineering *Chennai, IN*

Technical Skills

Languages: Python, TypeScript, JavaScript

Frameworks & Technologies: React.js, Next.js, Express.js, FastAPI, Tailwind CSS, ShadCN UI, Vercel AI SDK, LangGraph, LangChain, Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), Material UI, Flask, Django, AWS, Postgres, Drizzle ORM, Sequelize, Docker, Terraform, CI/CD, Git, Vector Embeddings, Pinecone, FAISS

Architecture & Engineering Practices: Event-driven architecture, Domain-driven design (DDD), TDD, Agile
