## SUMMARY

8 Years of industry experience in e-commerce and fintech domain. Experience in conceptualizing, designing and coding technical solutions. Strong analytical and communication skills with proficiency to grasp new technical concepts rapidly.

## SKILLS

- Java
- Spring Boot
- Spring Webflux
- Rest Api
- Kafka
- Elastic Search
- MSSQL
- OOPs
- DS and Algorithms
- CI/CD
- GCP/AWS/Kubernates

## EDUCATION

**2014 - 2017**

**NATIONAL INSTITUTE OF TECHNOLOGY TRICHY**

- Master In Computer Application
- GPA :8.5

## LANGUAGES

- English (Fluent)
- Hindi (Fluent)

# Shahnaz Bano

**Software Engineer III**

**Walmart Inc.**

## WORK EXPERIENCE

**June 2022 - Current**
**Software Engineer III Walmart Inc.**

- Cashi Digital Wallet: Cashi is Walmart's digital wallet, which allows users to pay for purchases in Walmart stores, digital platforms, and also bill payments, including sending transaction history, push notification, email, and SMS communication to customers about the transaction in real time (Java, Spring Webflux, Spring Boot, Rest, MSSQL, Kafka).

- Moving from a monolithic structure to microservices architecture, setting up infrastructure, alert and monitoring, and improving the performance of the system for a better user experience (Grafana, Splunk, Memcache, Kubernetes).

**July 2017 - April 2022**
**Senior Software Engineer Target Corporations India Pvt. Ltd**

- Promotion Publisher: This is used to support real-time contingency of offers in Target.com. It listens to offer updates and finds out the deltas that need to be updated, and sends delta offer notifications to the consumers. It helps Target enable lightning deals in Target.com (Java, Spring Boot, Apache Kafka).

- Messaging Service: Designed the backend flow, developed the messaging app APIs, which are responsible for serving promo/offer messaging on Target.com's product page and cart page.

- Performance improvements: enabling caching, vertical scaling, horizontal scaling, and decreasing network latency, rate limiter (Java, Rest, Spring Boot, Supports 8k+ TPS).

- Google Cloud Platform Applications: Migrated services from ATT to GCP which involves setting up infra, logging, metrics, alerts and monitoring of multiple services (Linux, Python, Kibana, Grafana, Thalamus)

## ACHIEVEMENTS

- Bravo Award in Walmart Inc. for showcasing extra ordinary performance in many parallel initiatives.
- Pyramid Award in Target Corporations, Received Pyramid Awards for showcasing extra ordinary efforts and performance in the projects involved.
- 1st Prize in Entrepreneurship in Infotrec'15, An Inter Department technical symposium.
