Dhanavathu Sai Tarun Naik

Bangalore | Ph:8328654114 | naiksaitarun@gmail.com | LinkedIn

TECHNICAL SKILLS

Programming Languages: **Python, Java, JavaScript**
Frameworks: **FastAPI, Flask, Spring Boot**
Frontend Technologies: ***React.js***
Databases: **MySQL, MongoDB**
Observability & Search Tools: **Elasticsearch**
Development& Version Control Tools: **Poetry, Eclipse, GIT**
Cloud & Other Tools/Technologies: **AWS, Redis, Postman, Swagger, OpenCV**

CAREER OBJECTIVE

Dedicated Python Developer with over 2 years of experience in building scalable systems using FastAPI and Flask, Implemented deep learning Neural Network architectures along with OpenCV for image processing applications. Seeking to leverage my skills in a dynamic organization focused on innovation and growth.

OVERVIEW

- Designed Elasticsearch ingest pipelines to process and enrich over **5M+** driverless vehicle logs/day, improving log readability
- Implemented automated alerting in Elasticsearch to detect anomalies, reducing detection time from 8 hours to under 2 hours.
- Developed scalable backend services using FastAPI delivering 50+ real-time fleet metrics (vehicle health, routes, rider allocation) with <200ms latency, enabling engineers and fleet managers to monitor operations seamlessly.
- Engineered an AI-based teeth alignment prediction model using OpenCV and Flask, achieving 98% correction accuracy.
- Built an end-to-end online pharmacy application using Spring Boot and React.js (Java Full Stack).
- Involved in various phases of the SDLC, including developing backend services using FastAPI, focusing on improving performance and maintainability.

WORK EXPERIENCE

L&T Technology Services **Mysuru, Karnataka**

Software Engineer **September 2023 - Present**

- **Security Information and Event Managaement, ZOOX**

  Developed and optimized Elasticsearch pipelines and alerting mechanisms to process millions of driverless vehicle logs daily, enhancing data reliability and reducing anomaly detection time from hours to minutes.

- **Fleetdash Application, ZOOX**

  Engineered FastAPI-based backend services for driverless vehicle operations, delivering live fleet metrics through scalable RESTful APIs and a clean, modular architecture**.**

- **Smile Predict**

  Implemented Orthodontic Teeth Correction system which showcased as an AI capability demo for LTTS and client PoCs.

- **AnyTime Pharmacy**

  Built a full-stack e-commerce pharmacy application and implemented secure order placement, role-based access control, and modular backend services for product catalog, cart, checkout, and transaction management.

EDUCATION

Andhra University, Visakhapatnam **2019-2023**

Bachelor of Technology IT, 8.00 CGPA

Sri Chaitanya Junior College, Visakhapatnam **2017-2019**

Intermediate, 90.3%
