CAREER OBJECTIVE

Detail-oriented QA Engineer with experience in manual and automation testing, test planning, and quality assurance processes. Skilled in Selenium, Playwright, and Postman with strong expertise in designing and executing test cases, developing automation scripts, debugging issues, and ensuring high-quality software delivery in Agile environments. Passionate about building efficient, scalable, and reliable automation solutions.

EXPERIENCE

QA Engineer - SurveySparrow *(May* 2024 - *Present*)

- Designed and maintained automated test suites using **Selenium** (Python) and **Playwright** (JavaScript) for end-to-end UI testing.
- Worked extensively on the **SurveySparrow Brand** Module, a reputation management platform that aggregates and analyzes customer feedback by scraping reviews from multiple sources.
- Enhanced test coverage and automated critical workflows related to features like review scraping, data analytics, social listening (monitoring social platforms), and customer engagement
- Developed robust API test scenarios using **Postman**, covering email service endpoints.
- Collaborated closely with developers and product owners during Agile sprints to define testable requirements and acceptance criteria.
- Collaborated with cross-functional teams and contributed to multiple modules such as **Ticket Management, SurveySparrow Brand, and Distribution**, ensuring seamless integration, improved reliability, and efficient release cycles.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript
- **Automation Tools:** Selenium (Python), Playwright (JavaScript), Postman
- **Tools:** Git, GitHub, Bitbucket, Jenkins
- **Databases:** MySQL
- **Other:** Data Structure and Algorithms

ACADEMIC PROJECTS

- Developed an **IoT-based food spoilage detector** integrating gas sensors for real-time monitoring of food freshness. Designed the solution with accessibility features to support visually impaired individuals.
- Developed a **gender classification model** using **Deep Convolutional Neural Networks (CNN)** for image recognition. Implemented and trained the model to achieve accurate classification through deep learning techniques.
- Developed an **Alzheimer's disease diagnosis model** using **Graph Convolutional Networks (GCN)** to analyze complex medical data. Implemented deep learning techniques to enhance prediction accuracy and support early diagnosis.

CERTIFICATIONS

- Smart India Hackathon 2022 - Finalist
- Participant in "AI for India" by Guvi

EDUCATION

B.E. in Information Science and Engineering (2020 - 2024) – Bannari Amman Institute of Technology with CGPA- **8.93**

Higher Secondary Education - Metro Matriculation Higher Secondary School with **83%**

SSLC - Metro Matriculation Higher Secondary School with **94%**
