PROFESSIONAL WORK EXPERIENCE

Currently working as a Manual Test Engineer at **Infosys Mumbai since** October 2022.

PROJECT

Project Name: Equity Trade System.
Domain: Investment Banking
Client: Wells Fargo Securities.
Description:

Wells Fargo Securities provides institutional clients, alternative asset managers, and large corporations with a comprehensive approach to the sales, trading, structuring, and execution of a wide variety of financial market products, including bonds, equities, market-linked products, clearing services, and risk management. Ensure the accuracy of mutual fund transactions such as purchases, redemptions, switches, and SIPs (Systematic Investment Plans). Validate fee structures, performance reporting, and compliance adherence.

Project Name: Operations Of Users and Employees
Domain: Internet Banking

Client: ICICI Bank

Description:

This project focuses on the banking operations of both users (customers) and employees. This system is based on Internet banking. It provides facilities like fund transfer within the same bank or other banks with RTGS, NEFT, and IMPS payment methods. The user can transfer funds to any account with the same bank; it saves time and paperwork.

ROLES AND RESPONSIBILITIES

- Following agile scrum methodology as part of SDLC.
- Participate in daily scrum, sprint planning, review, retrospective meetings, and product walkthroughs as part of the agile process.
- Active participation in daily and weekly status calls with the client.
- Analyzed business requirements and interacted with the product owner, the development team, and the QA team.
- Prepare test scenarios, design test cases, and a requirement traceability matrix, and review them with the help of project requirement documents (PRDs).
- Interact with the business analyst for requirement analysis and also for product improvement feedback.
- Preparation of project-wise product knowledge documents to archive for future reference
- Interact with developers, product owners, and project managers for defect queries. Help them understand defect impact and tracking for defect-free product release.
- Performing sanity testing, functional testing, retesting, regression testing, and database testing.
- Involved behavioral, input domain, Error handling, Calculation, and service-level testing.
- Worked on HP-Alm and the JIRA tool for the design and execution of test cases, as well as for defect logging and tracking.
- Validation of Expected Output vs. Actual Output in the respective database tables using SQL.
- Generate status reports (daily status reports and weekly status reports) and share them with the management team promptly.

PERSONAL DETAILS

Name: Pandurang Ramchandra Jagtap

Date of Birth: 18th March 2000

Address: A/P- Banewadi, Tal. Kavathemahankal

Dirst. Sangli, 416410

Declaration:

I declare that all the information furnished above is the best of my knowledge.
