PROFESSIONAL SUMMARY:

- Mobile application developer with 3+ years of experience in building cross-platform mobile applications using React Native, ReactJS, JavaScript, and TypeScript.
- Proficient in developing responsive, scalable, and high-performance apps leveraging Redux, Zustand, Context API, and Async Storage for efficient state management.
- Experienced in app deployment for both Android and iOS platforms, including manual releases and automated deployments using CI/CD pipelines.
- Hands-on experience integrating REST APIs, Firebase, Google Maps, Push Notifications, and third-party tools such as CleverTap, Sentry, and AppDynamics for analytics and crash tracking.
- Focused on performance optimization, minimizing load times, and efficiently managing large data sets.
- Skilled in parsing complex JSON data, developing modular and reusable UI components, and applying Atomic Design principles for maintainable front-end architecture.
- Experienced in debugging, unit testing with Jest, and managing platform-specific implementations for both iOS and Android using tools like Flipper and Reactotron.
- Strong understanding of Agile methodologies, contributing throughout the software development life cycle — from requirements gathering to deployment and post-launch support.
- Recognized for excellent interpersonal, problem-solving, and time-management skills, with proven ability to collaborate effectively with teams and clients.

EXPERIENCE SUMMARY:

- Working as a Software Engineer at **HELIUS COMPUTECH INDIA Pvt Ltd** from Nov 2025.
- Worked as Software Engineer at **Modern Ballistic Solutions** Oct 2O24 to July 2025.
- Working as Software Engineer at **Kwint IT Services** from Sep 2023 to Sep 2024.
- Worked as Software Engineer at **Bento Labs Pvt Ltd** March 2O22 to April 2023.

TECHNICAL SKILLS:

Programming Languages : JavaScript, TypeScript, HTML, CSS

Mobile & Web Technologies : React Native, React-js

State Management & Debugging Tools : Redux, Redux Toolkit, Zustand, Context API, Jest

APIs & Backend Integration : REST APIs, Axios, Firebase, Node.js,

Database Technologies : MongoDB, SQLite

Development Tools & IDEs : Git, Bitbucket

Monitoring & Analytics Tools : CleverTap, AppDynamics, Sentry, Firebase

PROJECT SUMMARY:

Company : HELIUS COMPUTECH INDIA PVT LTD **Nov 2025 - Present**

Project 1 : Singlife **Nov 2025 - Present**

Technologies : React Native, JavaScript, Typescript, Redux Saga, Firebase, App Dynamics, Sentry

Environment : Azure

Role : React Native Developer

Team Size : 4

Description:

Worked on a Life Insurance digital platform for Singapur Life Insurance, supporting end-to-end insurance workflows including customer onboarding, policy management, premium payments, and claims processing. The application was built as a secure, scalable, and compliance-driven system serving customers and internal stakeholders across multiple environments.

- Designed, developed, and maintained application features for a production-grade insurance platform.
- Implemented business workflows related to policy issuance, premium payments, renewals, and claims tracking.
- Ensured secure handling of sensitive customer and policy data in line with standards.
- Collaborated closely with backend, QA, and product teams to deliver features on tight deadlines.
- Followed secure coding and compliance practices required for insurance and financial applications.

Company : Modern Ballistic Solutions Pvt Ltd **Oct 2024 - July 2025**

Project 1 : Kotak Mahindra Bank – Kotak-mb-app-2.0 **Oct 2024 - July 2025**

Technologies : React Native, JavaScript, Typescript, Zustand, Firebase, App Dynamics, Clever tap

Environment : Azure

Role : React Native Developer

Team Size : 8

Description:

A next-generation mobile banking app replacing Kotak App 1.0, offering seamless access to investments, loans, insurance, cards, and payments.
Developed advanced investment modules for Mutual Funds, ETFs, IPOs, and portfolio tracking with real-time market insights.
Enabled digital insurance purchases with premium calculation, policy comparison, and secure payment flows.
Focused on delivering a fast, scalable, and user-friendly experience across Android and iOS.

Roles & Responsibilities:

- Developed cross-platform mobile applications using React Native and TypeScript, delivering seamless user experiences across Android and iOS.
- Developed cross-platform mobile applications using React Native and TypeScript, delivering seamless user experiences across Android and iOS.
- Designed and implemented investment and insurance modules, enabling users to invest in Mutual Funds, ETFs, IPOs, and purchase policies digitally.
- Responsible for ensuring successful code execution, debugging, and performing data quality checks.
- Reviewed and executed migrated code, identified issues, and implemented effective debugging and fixes.
- Integrated REST APIs and third-party services like Firebase, CleverTap, AppDynamics, and Sentry for backend communication, analytics, and performance monitoring.
- Utilized Zustand for efficient state management and scalable application architecture.
- Focused on UI performance, optimized API calls, and handled complex nested JSON data to ensure fast and responsive screens.

Company : Kwint IT Services Pvt Ltd **Sep 2023 - Sep 2024**

Project 2 : Yonah (Realestate Agents) **Sep 2023 - Sep 2024**

Technologies : React Native, JavaScript, Typescript, Redux, Firebase

Environment : Azure

Role : React Native Developer

Team Size : 2

Description:

Yonah is a comprehensive real estate application designed to simplify and enhance your property search experience. With a user-friendly interface and robust features, Yonah caters to both buyers and renters, offering a seamless platform for finding, saving, and viewing properties.

Roles & Responsibilities:

- Deployed Android and iOS apps to play store and app store
- Development of push notifications fuctionality and Maps.
- Implemented appInSights to track in production
- Writing platform based specific code for android and iOS using react native
- Work and collaborate with the rest of the team
- Developement of responsive Screens with flexbox and dimentions API
- Develop a flexible and well-structured front-end architecture, along with the APIs to support it

Company : Bento Labs Pvt Ltd **Mar 2022 - Apr 2023**

Project 3 : Praan Wellness(Mental Wellness) **Mar 2022 - Apr 2023**

Technologies : React Native, JavaScript, Bitbucket, Redux

Environment : Azure

Role : React Native Developer

Team Size : 2

Description:

Praan Wellness provides individual and group counselling and psychotherapy services where you can talk about and work through your emotional difficulties with a trained counsellor/ therapist. This is safe and non-judgmental environment for anyone working on their mental health or even just looking for personal growth.

Roles & Responsibilities:

- Deployed Android and iOS apps to play store and app store
- development of new highly-responsive mobile screen interfaces
- Writing platform based specific code for android and iOS using react native
- Work and collaborate with the rest of the team
- Using network libraries to perform api integrations
- Learn and understand user interactions

EDUCATIONAL QUALIFICATIONS:

B Tech (**CIVIL)** with Damisetty Bala Suresh Institute of Technology in 2021.
Diploma with GOVT. PLYTECHNIC- NELLORE in 2018.
SSC with ZP High School, Duvvur in 2014.

DECLARATION:

I hereby declare that above mentioned information is correct to the best of my knowledge.
