P Madhu Sudhan

Bangalore, KA | perumalmadhusudhan13@gmail.com | +91 7075069734

Professional Summary

DevOps Engineer with 5+ years of experience in automating cloud-native infrastructure and building scalable CI/CD pipelines, reducing manual operational effort by up to 90%. Strong expertise in Artifactory for artifact management, secure access control implementation, and managing large-scale deployments with 99.9% availability. Proven track record of improving software release velocity, system reliability, and operational efficiency.

Technical Skills

- **Programming Scripting:** Python, Shell Scripting
- **Cloud Technologies:** AWS (EC2, S3, IAM, CloudWatch, ELB, Auto Scaling)
- **Configuration Management:** Ansible
- **CI/CD DevOps Tools:** Jenkins, Docker, Kubernetes, Git, Bitbucket, JFrog
- **Monitoring Logging:** Splunk, CloudWatch
- **Methodologies:** Agile, Scrum
- **Collaboration Tools:** Jira, Confluence

Experience

AWS Cloud DevOps Engineer UNISYS India Pvt Ltd – Bangalore, Karnataka **Sept 2024 – Till Now**

- Designs and implements highly scalable and resilient infrastructure architectures to support large scale applications and workloads.
- Designed and implemented highly scalable, resilient cloud infrastructure using Terraform and AWS Bicep to support large-scale applications and workloads.
- Built, optimized, and maintained CI/CD pipelines using Azure Pipelines, Maven, and Ansible, enabling automated build and deployment of Java microservices.
- Managed source control and branching strategies with Git and AWS Repos, ensuring secure, reliable, and collaborative development workflows.
- Deployed and operated containerized platforms using Docker/Podman with orchestration on Kubernetes and OpenShift, improving scalability and system reliability.
- Implemented DevSecOps practices, including SAST (SonarQube), JFrog artifact management, HashiCorp Vault, and security reviews to strengthen compliance and reduce vulnerabilities.
- Ensured high availability, performance, and observability through AppDynamics, Nagios, Splunk, disaster recovery planning, and automation using Shell, Python, and PowerShell.

System Engineer (DevOps), Fujitsu Consulting India Pvt Ltd Bangalore
(May 2022 – August 2024)

- Implement AWS cloud solutions by following industry best practices.
- Perform hands-on provisioning and configuration of cloud resources.
- Develop, manage, and maintain CI/CD pipelines for application deployments.
- Support cloud migration and modernization activities across teams.
- Work closely with onshore and offshore teams for smooth delivery.
- Ensure secure, stable, and reliable cloud services.
- Troubleshoot and resolve cloud, CI/CD, and deployment issues.
- Document processes, configurations, and solutions for future use.
- Use Terraform for infrastructure automation and consistency.
- Work with containerized applications and microservices.
- Apply AI / GenAI tools to improve automation and efficiency.
- Follow Agile/Scrum ways of working in fast-paced projects.

Systems Engineer – Hinduja Global Solutions – Bangalore, Karnataka - July 2019 – January 2022

- Manage and monitor cloud infrastructure on Amazon Web Services and Microsoft Azure.
- Create and maintain virtual machines, storage, and networking resources.
- Configure IAM roles, users, policies, and access control for security.
- Monitor system performance using CloudWatch and Azure Monitor.
- Handle incident response, troubleshooting, and root cause analysis.
- Perform system patching, upgrades, and regular health checks.
- Implement backup and disaster recovery strategies.
- Work with DevOps teams to support CI/CD pipelines and deployments
- Ensure high availability, scalability, and cost optimization of systems.
- Follow security best practices and company compliance standards.

Education

MBA, SITAMS College, Chittoor, JNTU University Anantapuram 2017 – 2019

BSc, Vignana Sudha Degree college, Chittoor, SV University, Tirupati 2014 - 2017

Achievements & Certifications

- AWS Certified Cloud Practitioner – In Progress.
- Recognized as “Miss Experian 2024” for outstanding contributions to team culture and collaboration.
- Awarded ‘A’ Certificate from Army Wing Infantry with the rank of Cadet (CDT).
- Completed “Introduction to Python” certification from Coding Ninjas (Mar 2021 – May 2021).
- ITIL V4 Certified.
