1941/A,Srivatsam, #3001, AECS Layout, Bangalore, Karnataka - 560068, India

SKILLS

Language & Frameworks

JAVA , Python, Spring Boot, Spring Batch
Microservices, Distributed Systems

Database & Storage

SQL (MySQL, Postgres), NoSQL (MongoDB, Cassandra) , Redis, Kafka, ActiveMQ

Cloud Services

AWS, Snowflake, BigQuery, Fivetran

Others

GitHub, Jenkins, JIRA, AI Tools

EDUCATION

Bachelor Of Engineering (CSE)

Dayananda Sagar College Of Engineering
Bangalore, Karnataka

2013-2017

Intermediate

Doon Public School (DPS)
Patna, Bihar

2012

Matriculation

Patna Central School (PCS)
Patna, Bihar

2010

LANGUAGES

Hindi

English

PROFILE

Lead Backend Developer **specializing in cloud-native microservices** and **distributed systems**, committed to architecting and **delivering scalable, high-performance applications** with exceptional reliability. Expert at **streamlining backend processes** through cross-functional collaboration and driving innovation in fast-paced environments.
Passionate about embedding AI-driven automation and **"Build with AI"** methodologies to accelerate delivery cycles, boost code quality, and achieve faster time-to-market.

WORK EXPERIENCE

Senior Backend Developer

Nov 2023 - Current

5X

- **Owned and led the Core Platform Squad,** driving the product and engineering roadmap while coordinating cross-functional efforts across security, data, and platform teams to ensure scalability, compliance, timely delivery, and proactive management of technical debt and stakeholders.
- **Architected and delivered a scalable data warehousing integration framework** enabling rapid provisioning of managed or BYOC warehouse instances, complete with ETL pipelines, environment management, built-in code editors, and RBAC**; enabled onboarding of 30+ customers with ~90% reduction in manual effort.**
- **Designed and implemented a usage-based billing and custom invoicing system** to replace a complex legacy solution, introducing batch-driven usage capture and a streamlined billing engine that **reduced operational overhead by ~70%** while reliably handling high-value financial transactions.
- **Led architecture and delivery of a cloud-native container orchestration system** with dynamic compute selection and automated scheduling, achieving **50–60% reduction in cloud infrastructure costs for customers** while improving scalability and resource efficiency.

Lead Software Developer

Mar 2022 - Nov 2023

Rupifi

- **Owned and led the LMS engineering team,** driving product design, solution architecture, collaborative development, and on-time delivery while mentoring engineers and fostering a high-performance, execution-focused culture.
- **Architected and built a standalone Loan Management System (LMS) from the ground up,** enabling multiple services to manage end-to-end loan lifecycles—including disbursements, repayments, and interest accruals—**reliably handling $10M+ in active loan portfolios.**
- **Designed and implemented cyclic loan functionality** (credit-card–like borrowing model) enabling rapid, short-duration loans; **expanded addressable customer segments and increased sales and revenue by 30%+.**
- **Bridged operational insights and stakeholder priorities** by translating frontline customer and operations feedback into scalable product and platform enhancements, improving user satisfaction and measurable business outcomes.

Senior Technology Analyst

Sep 2018 - Mar 2022

OakNorth Bank

- **Founding backend engineer,** leading greenfield development of core platform services from inception and establishing scalable architecture and engineering standards that enabled rapid product growth and major business milestones.
- **Owned and scaled mission-critical microservices** including User Portfolio Manager, Ledger, and Identity services**, processing millions of financial transactions with high availability, consistency, and fault tolerance.**
- **Designed and implemented complex fintech and banking workflows**—applications, loan schedule generation, repayments/prepayments, and interest accrual engines**—ensuring financial accuracy, regulatory alignment, and system scalability.**
- **Championed customer-centric problem solving** by working closely with customers and operations teams to resolve critical issues, improve platform reliability, and accelerate issue turnaround; **recognized as Best Performer for two consecutive quarters.**

Software Developer

Aug 2017 - Sep 2018

MoveInSync Tech Pvt Ltd.

- **Led the design and development of an EHS (Everyday Health Status) compliance system,** tracking real-time health and eligibility of drivers and cabs to enforce ride authorization; **enabled daily compliance checks for hundreds of drivers and vehicles,** ensuring operational safety and regulatory adherence.
- **Built a centralized properties management dashboard** allowing internal teams to dynamically update critical runtime configurations (e.g., routing rules, feature toggles) across **500+ active vehicles in real time,** significantly improving operational agility and reducing manual interventions.
- **Developed on-demand internal automation tools** using App Scripts to streamline operational data collection and workflows**, reducing manual effort and turnaround time for operations teams** while improving data accuracy.
