Mohan Chandra Prasad Kotte
Mobile: **+91 8660117318**
E-Mail: kyasodhamohan.fsd@gmail.com

SYNOPSIS

- ☒ 8+ years of experience in the IT industry as a Full stack Developer.
- ☒ Having 3 years of experience in developing frontend applications with React js, JavaScript and TypeScript.
- ☒ Extensive experience in SpringBoot, Restful web services, gRPC, Hibernate, Spring MVC and jQuery, React JS.
- ☒ Quickly adapting to newer technologies.
- ☒ Self-Starter, Self-Motivated & Quick Learner.
- ☒ Conducting software analysis, programming, testing, and debugging, troubleshooting and resolving the reported issues and replying to queries in a timely manner.
- ☒ Good experience on AWS Webservices.
- ☒ Good knowledge on Kafka architecture and integration with SpringBoot application.

SKILL SET

Operating System	**Windows 7/8/10, Linux, Mac**
Framework	**Spring MVC, SpringBoot, Hibernate, React JS, Angular 6**
Databases	**Oracle10g, MySQL5.0, MS SQL Server**
Build Tool	**Maven**
Source Versioning	**SVN, BitBucket**
Web Technologies	**CSS, HTML, AJAX, JavaScript, JSON, jQuery, Servlets, JSP**
IDE /Tools	**Eclipse, Spring STS**

EXPERIENCE

Organization	Designation	Duration
Marlabs	Technical Lead	Jan 2024 to till date
Landmark Group	Senior Software Engineer	Oct 2022 to Sep 2023
Capgemini Technology Services India Ltd	Consultant	Nov 2020 to Jan 2022
Epsilon – Mathan Software Services	Consultant	July 2019 to June 2020
Object Technology Solutions Pvt Ltd (Ericsson)	Software Engineer	Nov 2017 to June 2019
Girmiti Software PVT LTD	Software Engineer	Feb 2017 to Oct 2017

PROJECTS

Project 1: CS

Client **TransUnion**

Team Size **4**

Tools & Technology **Spring Boot, RESTFUL Web Services, gRPC, JUnit, Cucumber Framework, Tomcat, Maven, Bitbucket, Jenkins, Postman, BloomRPC, Microservices, React.js, TypeScript, CSS, HTML, AWS, Docker, Kubernetes**

Description

Assembly Gateway is a component that sits between the API Gateway and the Product Orchestrator/ Assembly, validating and authorizing the requests from the end client. It is a REST service that supports JSON messages. This will provide a single-entry point for any clients that access our products via APIs.

Role & Responsibilities:

- ✓ Developed RESTful APIs with Java and Spring Boot framework.
- ✓ Perform unit testing for the API end points.
- ✓ Responsible for bugs fixing.
- ✓ Involved in analysis, design and developing the project modules.
- ✓ Fixed Black Duck and SonarQube issues.
- ✓ Did POC and successfully Integrated HashiCorp vault with Spring Boot application to read secrets.
- ✓ Written shell script for member registration API.
- ✓ Created test suite with spring boot and cucumber API for credit report application.
- ✓ Developing and executing automation scripts with Cucumber Framework and Spring Boot for RESTFUL webservice and gRPC.
- ✓ Updating the test cases for the change requests and enhancements of the Product.
- ✓ Analysis of UI requirement and coding as per requirement.
- ✓ Developing web view and webpages in React js
- ✓ Unit testing of pages as per given style guide.

Project 2: NSBN

Team Size **8**

Tools & Technology **SpringBoot, RESTFUL Web Services, Spring Data JPA, Microservices, Postgres SQL, Gradle, Github, Jenkins, Postman**

Description The Nasdaq Sustainable Bond Network (NSBN) is a centralized platform for information on green, social and sustainability bonds issued around the globe. Nasdaq fully supports the Sustainable Development Goals ("SDG"s) created by the United Nations ("UN"). Corresponding logos & icons are used for informational purposes to inspire and help promote these goals for a more sustainable world. Green bond issuance has grown substantially since the first green bonds were issued in 2007, as investors seek opportunities to fund environmental, social and climate-related projects. The Nasdaq Sustainable Bond Network (NSBN) data furthers the investment process for sustainable bonds by allowing investors to source detailed information for investment due diligence, selection and monitoring. The data includes documents, data and qualitative information submitted by the issuers and the Nasdaq team.

The NSBN data can be leveraged to:

Search and explore sustainable bonds globally
Aggregate data on allocation of proceeds and impact on a pro-rated basis
Find new sustainable investments matching your sustainability goals
Simulate changes to your portfolio's sustainability based on its holdings

Role & Responsibilities:

- ✓ Developed RESTful APIs with Java and Springboot framework.
- ✓ Writing Junit for implemented API's.
- ✓ Reviewing the code of peers.
- ✓ Responsible for bugs fixing.

Project 3: Centrepoint

Team Size **3**

Tools & Technology **Spring, Hybris, Ant, Bitbucket, Jenkins, Postman, Selenium**

Description

Centrepoint represents the Landmark Group's strategy to synergize its core retail concepts, Babyshop, Splash, SHOEMART, and Lifestyle, under one identity, thereby projecting a 'single fashion destination for the entire family. The most visible benefit of this convergence has been the enhanced design and stimulating shopping experience for consumers. Centrepoint offers the same great value for money in a visually exciting destination for the whole family. It is shaping consumer perceptions, increasing brand worth and fuelling future growth for the group in the mid-market retail section.

Role & Responsibilities:

- ✓ Developed RESTful APIs with Java and Spring framework.
- ✓ Worked on Login enhancements.
- ✓ Developed API'S to fetch orders based on order id or email id
- ✓ Perform unit testing for the API end points.
- ✓ Responsible for bugs fixing.

Project 4: CT

Team Size **4**

Tools & Technology **SpringBoot, RESTFUL Web Services, React.js, Redux, Tailwind CSS, Strapi, Bitbucket**

Description

The Connecticut Office of Early Childhood (OEC) Registry empowers professionals to apply for scholarships and incentives, find free training and resources, and advance their careers. Worked on scholarships and registration modules.

Role & Responsibilities:

- ✓ Developed and maintained a responsive and dynamic web application using React, providing users with seamless browsing experience.
- ✓ Optimized the user interface for performance and accessibility, improving load times and ensuring a consistent experience across devices.
- ✓ Integrated RESTful APIs to handle backend operations, including product data retrieval, order processing, and payment transactions.
- ✓ Collaborated closely with backend developers, designers, and product managers to create a cohesive and scalable front-end architecture.
- ✓ Used modern tools and libraries such as Redux for state management, React Router for navigation, and Axios for API requests.
- ✓ Implemented unit and component testing with Jest and React Testing Library, enhancing code reliability and maintainability.
- ✓ Participated in code reviews and agile development practices, contributing to continuous improvement and knowledge sharing within the team.

Project 5: Vendor Link

Client **John Keells**

Team Size **7**

Technology **Spring MVC, Spring Boot, Hibernate, JSP, JSON, Bootstrap, RESTFUL Web Services, JUnit**

Database **MS SQL Server**

Description

Integrate all suppliers on a web-based, self-service portal and drive down costs. Vendor Link empowers retailers and the suppliers with the choice to develop transactional or strategic partnerships. align business goals and execute joint strategies, leading to more successful promotions and greater shopper loyalty.

Modules**:** Vendor Management, Product Management, Finance Management, Order Management, Promotions.

Role & Responsibilities:

- ✓ Developed NVI, NPI, product delisting functionalities.
- ✓ Responsible for writing Rest Controller classes.
- ✓ Responsible for writing service layer components.
- ✓ Responsible for writing Repository class.
- ✓ Responsible for writing JUnit and fixing SonarQube issues.
- ✓ Collaborate with the product owner and testing team and other stakeholders for requirement gathering.

Project 6: Banking Information System

Client **National Australia Bank**
Team Size **8**
Technology **SpringBoot, Hibernate, RESTFUL Web services, Angular 6, Mockito, API Automation Test suite**
Database **Oracle 11g**
Description

The system is to provide online transaction of a Bank, developed for N. A. Bank Limited, AU. The different functional modu les are Customer and Administrator. The Customer module includes opening of various types of accounts such as Savings Account, Current Accounts, and Loan appliances through online. The administration module includes providing services to the customers, such as approving the Loans, Accounts, Withdrawal and Deposits of these accounts are being maintained. Calculation of interest is done automatically for the periods specified for the various accounts with specified validations. Various Users are created, and access restrictions are provided to enhance the security of the system.

Role & Responsibilities:

- ✓ Involved in analysis, design and developing the project modules.
- ✓ Designed and developed Business Logic.
- ✓ Developed the application utilizing SpringBoot framework.
- ✓ Developed data access layer using Data Access Object (DAO) design pattern.
- ✓ Developed entity class which is mapped to DB Tables.
- ✓ Responsible for bugs fixing.
- ✓ Production support for the application.
- ✓ Giving the support for multiple test environments.
- ✓ Responsible for writing JUnit and fixing SonarQube issues.
- ✓ Responsible for reviewing the code

Project 7: Straight Through Services
Client **Standard Chartered Bank**
Team Size **6**
Technology **Java, JSP, Servlet, JDBC, jQuery, JavaScript, Eclipse, Tomcat, Oracle SQL Developer**
Database **MS SQL Server**
Description

STS application is a Proprietary electronic payment solution, offered by Standard Charted Bank (SCB) for corporate customers to create their payment instructions to SCB for execution. STS is multi- country/Cross Currency, regional payment system. Through STS, customers can process multiple payment types in multiple currencies. In STS there are two types of processing modes. They are Online, Batch & Real Time. Online processing mode means the batch jobs are cyclic (every 7 minutes). Batch Processing mode means the batch jobs are run by end of day (EOD). Real time processing mode means payments processing End to End with TAT.
There are 2 legs in STS, those are Debit leg and credit leg. In Debit leg, STS will send instructions to back-office to debit the customer's account and credit the suspense account. In Credit leg, STS will send instructions to back office to debit that suspense account and credit the beneficiary account.

Role & Responsibilities:

- ✓ Involved in analysis, design and developing the project modules.
- ✓ Designed and developed View and Business Logic.
- ✓ Responsible for bugs fixing.
- ✓ Production support for the application.
- ✓ Giving the support for multiple test environments.
- ✓ Responsible for writing Junit.

Project 8: MIFARE Service Platform
Client **NXP**
Team Size **8**
Technology **Java, JSP, Spring MVC, JAX-RS, Hibernate, jQuery, JavaScript, Eclipse, Tomcat, Oracle SQL Developer, Selenium, TestNG**
Database **MS SQL Server**
Description

MIFARE Service platform is an NXP suite of product which works on behalf of Service Providers example. Transit Operators that support management, provision of MIFARE services on to consumer wallet. MIFARE Service Platform is developed to facilitate Wallet Providers to easily integrate

and get consumers MIFARE services provisioned which can be used at their Service Providers locations. It deals with different modules for different management and functionalities such as Dashboard, Manage, Access Management, Tickets, Promotional Messages, Settings, Reports.

Role & Responsibilities:

- ✓ Developed components on Business, Integration and Persistence tier, for creating a server-side application.
- ✓ Used Hibernate as a persistence provider to object map the DB tables.
- ✓ Used JSP, CSS, HTML5, AJAX, jQuery, JSTL
- ✓ Responsible for writing Junit.
- ✓ Fixed SonarQube issues.

2024 - Annual Performance Assessment 1.0 for Kotte Mohan Chandra Prasad

Employee Information

First Name	Kotte	Last Name	Prasad
Employee Id	113208	Department	Product Engineering (Innov) (75160302)
Job Code	Technical Lead (JC100407)	Hire Date	01/15/2024
Human Resource	Asha P Kumar	Manager	Nagendra Chilkunda Gangadharaiah
Location	North Gate - Bangalore (NG01)	Title	Technical Lead

Review Dates

Originator	H N Shubhashaya Review
Period	01/01/2024 - 12/31/2024
Due Date	01/31/2025

Goals

This section is for evaluating accomplishments of goals.

The weights for the goals in this section must add up to 100, and there must be a rating for each goal before the form is sent for signatures.

Role Specific Goals

10% of total score

1.1 Learning and Development

On Track

* Certificate Completion
* Update of skill profile in mTalent.

Manager's Rating	Rating
Select a rating...	Role Model

Comment/ Justification to substantiate the rating

Developed mini project on **NextJS**. Attended the **training** on NextJS**.**

Additional Ratings and Comments

Rating by Arun K

Meets Expectations

Comments by Arun K

Have undergone training related to NextJS for straiterline project. No certification information.

Goal Details

Goal / KRA title	Learning and Development	Goal Description	Every individual to complete 30 hours of learning which includes minimum of 25 hours in their area of work (Technical Skills for the Delivery/Practice teams, Functional skills for the BEF teams). Remaining 5 hours in the area of soft skills / behavioral.
Activities involved in the Goal	* Internal / External Training * Certifications * Workshops	Year	2024
Weightage	10%	Start Date	01/01/2024
Due Date	12/31/2024	Goal Status	On Track

Milestones (Optional)

Overall Comments on Goal Achievement **Comment /**

Justification to substantiate the rating

Received appreciation from the manager and lead for delivering the work with quality. Help team members in understanding and completing the stories. I spent a considerable amount of time conducting peer code reviews.
Got the appreciation from the members for working on a complex task and completing it with zero defects. Constantly upskilling my knowledge to meet the project's needs.

Comments by Arun K

Overall, Mohan's work in NASDAQ project is appreciated by client manager.
He was working as an individual contributor in client's project and also helped other consultants during his period with NASDAQ project.

He follows the process defined in the project and takes ownership of the work assigned to him. However, as a technical lead, need to show team leading capabilities.
