# Divya Mudaliyar

***QATest Engineer*** +91-7227919476 | mudaliyardivya023@gmail.com | Chennai, INDIA | Experience: 2 Years 1 Month

---

Experienced Business Analyst and QA Engineer with expertise in stakeholder collaboration, requirement gathering, and Agile/Scrum methodologies. Proficient in sprint planning, UAT, post go-live support, and creating FRDs, user stories, and Confluence documentation. Skilled in process improvement, gap analysis, and workflow optimization, utilizing Visio, Draw.io, and Figma for wireframing and process mapping. Successfully cleared interview for Product Owner role and demonstrated strong project delivery through cross-functional collaboration. Solid capabilities in test case design, functional, regression, smoke, and UI testing, covering Web, Mobile, and API testing using Postman and SoapUI. Adept at test automation with UiPath, Selenium, and TestNG, and proficient in defect tracking with JIRA, TFS, and TestRail, as well as performance testing using K6. Core strengths include Business Analysis, Test Automation, Agile Delivery, and Continuous Improvement.

- Test Management
- Business Analysis
- Test Strategy
- Manual Testing
- Selenium Automation
- Qa Manual
- QA Testing
- Project Management
- QA Analysis
- Selenium
- UAT
- QA Automation
- Test Planning
- Test Engineering
- Automation Testing
- Requirement Analysis

## WORK EXPERIENCE

***QA Test Engineer - AVASOFT*** ***Dec 2023 - Present***

Business Analyst and QA Engineer experienced in stakeholder collaboration, requirement gathering, and Agile/Scrum practices. Skilled in sprint planning, UAT, post go-live support, and preparing FRDs, user stories, and Confluence documentation. Proficient in process improvement, gap analysis, and workflow optimization with hands-on experience in wireframing and process mapping using Visio, Draw.io, and Figma. Cleared client interview for Product Owner role and successfully delivered projects through effective cross-functional collaboration. Strong in test case design, functional, regression, smoke, and UI testing. Experienced with Web, Mobile, and API testing using Postman and SoapUI, and test automation through UiPath, Selenium, and TestNG. Skilled in defect tracking with JIRA, TFS, and TestRail, and performance testing using K6. Core strengths include Business Analysis, Test Automation, Agile Delivery, and Continuous Improvement.

## PROJECTS

***Avalon Project Management Tool*** ***7 Months***

- Defined product scope, user stories, and lifecycle documentation to drive efficient product development.

- Aligned business goals with product development by actively engaging stakeholders.

- Managed platform integrations including Salesforce, ServiceNow, and AI-driven workflows to enhance operational efficiency.

- Conducted UAT and led product walkthroughs to maintain high delivery quality standards.

- Authored comprehensive user manual documentation to enhance end user experience.

- Implemented performance testing using K6 to validate system scalability and optimize performance.

***CloudGen Cloud Management Tool*** ***6 Months***

- Led the development of an internal product to optimize Cloud management processes, resulting in a 30% increase in operational efficiency and 40% reduction in manual work.

- Gathered end-to-end cloud management requirements and created detailed Functional Requirement Documents (FRDs), test cases, and scripts, ensuring 100% coverage of product functionality.

- Collaborated with stakeholders to align on cloud management business needs, providing insights through walkthroughs and identifying tailored solutions to address gaps.

- Monitored project progress, proactively identifying and resolving gaps to ensure on-time product delivery within allocated budget.

- Conducted User Acceptance Testing (UAT) and guided product walkthroughs, ensuring high delivery quality and improving user satisfaction.

- Authored comprehensive user manual documentation, enabling seamless adoption and usage by end users.

- Validating system response under varying load conditions.

***GIRUDO - Gaming Project*** ***8 Months***

- Supervised the development of GIRUDO, a versatile gaming platform integrating games, chat, forums, and daily activity videos to enhance user engagement

- Initiated the collection of client requirements and meticulously formulated FRDs, test cases, and scripts, contributing to the project's success

- Facilitated seamless collaboration with development teams, consistently delivering high-quality results that met or surpassed client expectations

- Orchestrated and chaired onshore stand-up meetings, ensuring effective communication, updates, prompt issue resolution

- Engaged closely with the client to comprehend and address specific gaming business needs, cultivating a strong partnership and providing customized solutions

- Conducted comprehensive walkthroughs of U.S. business processes to GIRUDO teams, effectively identifying areas for improvement

- Acted as a key liaison between technical and business teams, ensuring transparent and efficient communication to underpin the project's success

***MBOOTH - E- Commerce*** ***6 Months***

- Designed and executed test cases and scripts, resolving quality issues efficiently.

- Conducted functional testing for mobile applications, ensuring alignment with user requirements.

- Validated blacklist/whitelist engine for leasing using Postman.

- Acted as a standalone QA, ensuring end-to-end product quality.

- Conducted attribution and tagging testing for accurate campaign tracking and user behavior insights across web and mobile platforms.

***RACPad - MX*** ***3 Months***

- Implemented rent-to-own model for electronics, appliances, and furniture through owned/partner stores, facilitating real-time integration between online and in-store systems for seamless lease and payment processing via e-commerce.

- Successfully cleared client interview and efficiently onboarded as Product Owner, demonstrating strong communication

and leadership skills.

- Defined comprehensive business requirements and proficiently managed user stories using Jira & Confluence, ensuring effective project coordination and delivery.

- Conducted walkthroughs of U.S. business processes for MX teams, identifying gaps and devising tailored solutions to streamline operations.

- Acted as a key liaison between technical and business teams, ensuring clear and effective communication to drive project success.

- Led User Acceptance Testing (UAT) and conducted product demos, showcasing an in-depth understanding of customer needs while ensuring product quality.
