N. Naga Durga Ayyappa

SDET – Selenium Java | API Automation | Mobile Automation | CI/CD | AI-Augmented QA

Email: naninaga07@gmail.com

Mobile: +91 7989670964

PROFILE SUMMARY

Automation SDET with 2.5+ years of experience in Web, API, and Android automation using Java-based frameworks. Strong expertise in Selenium, REST Assured, TestNG, and Appium with hands-on experience in scalable framework design and CI/CD integration. Proven track record of automating large-scale regression suites and improving release efficiency through optimized execution strategies.

SKILLS

Automation & Frameworks: Selenium WebDriver, TestNG, REST Assured, Appium (Android), Cucumber (BDD), Page Object Model (POM), Hybrid Framework, Data-Driven Framework, Playwright(Basic Knowledge)

Programming: Java, TypeScript(Basic Knowledge)

API & Tools: Postman, JSONPath

CI/CD & Version Control: Jenkins, Git, GitHub

Database: MySQL

Test Management & Tracking: JIRA, TestRail, FireFlink

Methodology: Agile Scrum

AI-Assisted Development: GitHub Copilot, Cursor, LLM-based debugging & test case generation

Other Tools: BrowserStack, IntelliJ IDEA, Eclipse, VS Code, Appium Inspector, Android Studio

PROFESSIONAL EXPERIENCE

SDET – Automation | TestYantra | 2023 – Present

• Architected and maintained a scalable Selenium + Cucumber (BDD) hybrid automation framework using Java and TestNG.

• Automated end-to-end regression suites for Web, API, and Android platforms ensuring CI/CD pipeline readiness.

• Developed REST Assured automation suites validating authentication flows and payload schemas.

• Integrated automation suites with Jenkins pipelines for scheduled and trigger-based executions.

• Optimized regression runtime by 40% through parallel and data-driven execution strategies.

• Automated 950+ validation scenarios across Web, API, and Mobile applications.

• Reduced manual regression effort by 60% through large-scale automation implementation.

• Applied structured test grouping strategies for selective and efficient regression execution.

• Designed and executed detailed manual test cases for new feature validations, identifying functional defects before automation implementation.

PROJECT EXPERIENCE

Aspire App – Fintech Platform | QA Automation Engineer

• Delivered end-to-end automation across Web, API, and Android platforms covering account management, payments, and expense workflows.

• Designed and executed functional, regression, integration, smoke, and system validation scenarios across modules.

• Developed reusable automation utilities enhancing framework scalability and maintainability.

• Validated payment and authentication APIs using REST Assured ensuring response integrity and data consistency.

• Implemented data-driven and parallel execution strategies using TestNG.

• Performed cross-browser and cross-environment validation to ensure consistent application behaviour.

• Managed defect lifecycle using JIRA and supported production releases through structured validation cycles.

INTERSOFT (Relay – Logistics Application | IEDE – International Export Direct Entry)

Automation Test Engineer / QA Automation Engineer

• Analyzed business and export processing workflows to design functional and integration validation scenarios.

• Implemented automation coverage across logistics modules including collection, delivery, pre-advice processing, multi-stage scanning, and label generation.

• Executed integration testing across interconnected systems ensuring seamless data flow and backend consistency.

• Identified, tracked, and managed defects using JIRA while collaborating with development teams for resolution.

• Prepared structured test documentation covering functional, edge, and boundary validations.

FireFlink – Quality & Automation Platform | Test Analyst | Automation & API Testing

• Analyzed system workflows and designed functional and regression validation scenarios.

• Performed UI and API validation across core modules ensuring response accuracy and data consistency.

• Executed cross-browser testing to ensure consistent application behavior.

• Identified, tracked, and managed defects using JIRA throughout the defect lifecycle.

• Improved automation coverage and enhanced execution stability across critical modules.

EDUCATION

Bachelor of Science in Mechanical Engineering, Sri Vasavi Institute of Engineering & Technology, Pedana, Andhra Pradesh, 2019
