• https://github.com/mohanhundre1 • Mumbai, INDIA

Summary

AI Engineer with 8+ years of experience delivering **Enterprise-grade RAG and Agentic RAG platforms** across **BFSI and automotive** domains. Expert in **LangChain, GPT-4o/3.5, FAST API, Pinecone, and Azure OpenAI**, integrating **LLMs with ML pipelines** for data-driven decision-making. Skilled in **cloud-native AI deployment using AWS, cost optimization**, and **compliance-driven automation** of GenAI workflows.

Skills

Generative AI:

Agentic AI · RAG · LLM · Azure OpenAI GPT3.5/4o · Embedding · LangChain · LanGraph · Vector DB · Pinecone · Python · FAST API · DVC · S3 · Sentence Transformers · Postgres DB · Evidently · Prometheus · Grafana

LLM/MLOps:

Machine learning · DVC · Evidently AI · KubeFlow · Kserve · MySQL · MLFlow · Pandas · Scikit · Tensorflow

Cloud & DevOps:

AWS · Azure · Terraform · Cloud Watch · RBAC · IAM · AWS Secret Manager · ArgoCD · Jenkins CI · Docker · Kubernetes · EKS · S3 · Helm · Confluence · Service Now · Jira

Certifications

AWS Certified Machine Learning Engineer – Associate

Google Cloud - Google Professional Machine Learning Engineer

AWS Certified Solution Architect Associate(SAA-C01)

Microsoft Azure Solution Architect Associate (AZ-103)

Experience

Nagarro — Mumbai, India

Senior AI Engineer — 01/2023 - Present

Technology: GenAI, Agentic AI, RAG, DVC, S3, OpenAI Embedding, Azure OpenAI GPT 4, FastAPI, LangChain, Langgraph, RAG Pipeline, Prometheus, Grafana, Evidently, MLFlow.

- Architected and delivered a **4-agent Orchestration workflow** using **LangGraph, GPT-4, and Python execution tools** to automate Brevan Howard's daily market-risk reporting workflow end-to-end.
- Developed **enterprise-grade RAG pipelines** using LangChain, OpenAI embeddings, and Vector database to retrieve internal **risk rulebooks, exposure guidelines, and compliance policies** for accurate limit validation and breach detection.
- Developed API-based market data pipelines with time-series validation for accurate VaR, volatility, drawdown, and correlation metrics.
- Designed **Risk Analysis Agents** capable of writing and executing Python code autonomously to compute financial risk metrics and generate actionable insights, reducing analyst workload by **90%+**.
- Built **report-generation and summarization agents** using GPT-4o with grounded RAG context to produce analyst-ready PDF risk reports, charts, and teams alerts delivered to portfolio managers within minutes.
- Deployed the full Agentic AI pipeline as **FastAPI-based microservices on AWS (EKS)** with Docker, CI/CD automation (Jenkins), and environment-specific configurations.
- Established **LLMOps/MLOps practices** using MLflow, DVC, ArgoCD, and version-controlled risk rules to ensure reproducibility, auditability, and continuous evaluation of model and agent behavior.
- Implemented **strict security guardrails** including IAM role isolation, KMS encryption, VPC networking, and policy-aligned data flows to safely handle financial datasets, rulebooks, and internal exposure limits.
- Collaborated with **portfolio managers, risk analysts, quants, and cloud architects** to translate domain problems into scalable Agentic AI systems and mentored internal teams on RAG, Agentic AI, and LLM best practices.

Experience

Hexaware Technologies

Sr. Cloud Engineer — 05/2021 - 10/2022

Client: Sita

Technology: AWS, EKS, Jenkins CI/CD, Ansible, Helm, Microsoft Azure, MLOps,

- Deployed and operationalized **machine learning models** in a production environment with automated pipelines, monitoring, versioning, and scalable inference.
- Implemented Infrastructure as Code with **Terraform, reducing operational overhead by 30%** and simplifying environment provisioning.
- Enabled customers to adopt DevSecOps practices with **container scanning, policy-as-code (Trivy)** and secrets management using **AWS Secrets Manager.**
- Designed and implemented cloud solutions on AWS and Azure, ensuring **high availability, cost optimization** and seamless integration across **multi-cloud environments.**

ITSource Technologies

Cloud Engineer — 04/2020 - 05/2021

Client: ICICI BANK

Technology: Git, GitHub, Jenkins CI/CD, Nagios, EKS, GitHub Actions

- Set up and **monitored alerting systems** using Nagios and ELK stack to ensure 24/7 service reliability.
- Integrated **Sonar Cloud into CI/CD pipelines** (Jenkins/GitHub Actions) to enable automated static code analysis across microservices.
- Improved **code management efficiency by 50%** through effective use of Git and distributed repositories such as GitHub, ensuring streamlined version control and collaborated.

PC Technology Center Pvt. Ltd

Cloud Support Engineer — 12/2018 - 01/2020

HDFC Bank

IT Officer — 04/2017 - 11/2018

Education

Annamalai University — INDIA

MBA - IT — 2015 - 2017

University of Mumbai — INDIA

BSC - IT — 2012 - 2015

Projects

BH - Risk Intelligence Assistant (RIA) - Agentic RAG Workflow

- Built a multi-agent Risk Intelligence Assistant (RIA) using RAG, autonomous code execution, and compliance validation to compute VaR, volatility, beta, correlations, and rulebook-based risk limits. Automated end-to-end risk analysis, reducing analyst effort by 80% and delivering consistent, accurate, and structured portfolio risk insights.

BH- FinDigital Platform

- Developed the FinDigital RAG-based financial forecasting platform for Brevan Howard to retrieve contextual insights, simulate what-if market scenarios, and generate data-driven recommendations — improving relevance accuracy to 91 % and reducing analysis time by 60%.

BMW - Intelligent Knowledge Assistant

- Built and deployed a RAG-based knowledge assistant for BMW, integrating GPT-3.5, LangChain, and Pinecone to deliver context-aware, citation-backed answers from 50 GB+ of technical data reducing search time by 75 % and hallucinations by 80%.
