Professional Summary

Backend Python Developer with 2.5 years of experience designing and building backend services and REST APIs using FastAPI and PostgreSQL. Skilled in developing Flask dashboards and implementing machine learning models through projects and internships. Strong foundation in core Python, API design, and database integration. Experienced in authentication, request validation, error handling, and writing tests for robust backend systems.

Experience

Ielektron Technologies Pvt. Ltd. **Bangalore**

Software Engineer [Client - Mercedes Benz] *Jan 2024 – Present*

- Worked on **Workflow management backend**, focusing on API development for workflow creation, execution, and monitoring.
- Designed and implemented **REST APIs** enabling multiple users to create, configure, and trigger independent workflows.
- Built **generic and reusable backend solutions** to support workflows across different **ECUs**, ensuring scalability and consistency.
- Implemented backend logic for **workflow executions**, including execution creation and state transitions.
- Developed APIs to support **runner-based execution**, where workflows are executed on different test setups based on available runners.
- Implemented **permission-based access control** to restrict user access to specific workflows and runners, ensuring privacy and system security.
- Integrated **PostgreSQL database** to manage users, workflows, executions, runner configurations, and permissions.
- Collaborated with cross-functional teams in an **Agile** development environment.

Ielektron Technologies Pvt. Ltd. **Bangalore**

Data Science Intern *Aug 2023 – Jan 2024*

- Developed a real-time **Driver Monitoring System** using **3D-CNN** models for drowsiness detection.
- Built data preprocessing pipelines for video streams to support inference.
- Achieved **>90% accuracy** through model evaluation and optimization.

Technical Skills

Programming: Python (OOPS, DSA), C++, PowerShell

Databases: SQL, PostgreSQL

DevOps: Git

Cloud: AWS (EC2, S3, IAM fundamentals)

AI Exposure: scikit-learn, PyTorch, LLMs, TensorFlow, keras

Projects

Computer Vision Systems: Designed deep learning pipelines using **CNN, 3D-CNN, and CNN–LSTM with attention** for real-time vision-based inference and image (Hindi Language) caption generation.

IPL Match Score Prediction Service: Designed and deployed a **backend prediction service** using Python and Flask, exposing **REST APIs** for real-time score prediction.

Face Mask Detection System: Built a real-time computer vision pipeline using **OpenCV and MobileNet**, integrated with alert mechanisms.

Certifications

2025: **Generative AI with LLMs** — DeepLearning.AI & AWS

Education

Indian Institute of Information Technology Dharwad

B.Tech in Computer Science, CGPA: 8.48 *2019 – 2023*
