VARSHANK M

Multi-Cloud DevOps Engineer | 5+ Years | AWS & Azure | Kubernetes | Terraform | Jenkins | Helm

Phone: +91- 9187064488 Email Id: varshank488@gmail.com

Professional Summary:

Self-motivated and results-oriented Cloud & DevOps Engineer with 5+ years of experience **in designing, building, and maintaining** multi-cloud environments (AWS and Microsoft Azure**). Strong expertise in** cloud infrastructure, CI/CD pipelines, Kubernetes (EKS), Docker, Jenkins, Git, Terraform (IaC), Helm**, and** cloud-native deployments**. Hands-on experience with** AWS services (EC2, S3, IAM, VPC, RDS, and Cloud Watch) **and** Azure services (Virtual Machines, App Services, Azure AD, Load Balancer, and Monitoring & Alerts)**. Proficient in** Linux administration, Shell scripting, basic PowerShell**, and** SQL operations**. Experienced in** monitoring and observability using Prometheus, Grafana, and Cloud Watch**, implementing** DevSecOps practices**, and supporting** production systems **in agile environments. Seeking a challenging role to drive** automation, reliability, scalability, and operational excellence**.**

Professional Experience:

Cloud Operations Engineer | Applied Systems India P ltd April 2024 – Present

Project Name: Multi-Cloud Application Operations & Automation Platform

Project Description: Supporting and operating a **multi-cloud (Azure & AWS) application platform** focused on high availability, scalability, and operational efficiency. The project involves managing cloud infrastructure using **IaaS and PaaS services**, automating deployments through **CI/CD pipelines**, containerized application operations using **Kubernetes**, and infrastructure provisioning via **Terraform**. Responsibilities include proactive monitoring, incident management, and continuous optimization of cloud resources across environments.

Roles & Responsibilities:

- Designed, built, and maintained **cloud infrastructure on Azure and AWS** using **IaaS and PaaS** service models.
- Managed **Azure Web App Services**, App Service Plans, and application deployments.
- Provisioned and administered **Windows and Linux Virtual Machines** on Azure and AWS (EC2).
- Created and managed **AWS services** including **EC2, IAM, VPC, Security Groups, and Cloud Watch** for compute, access control, and monitoring.
- Implemented **Infrastructure as Code (IaC)** using **Terraform** to provision and manage cloud resources consistently across environments.
- Managed containerized workloads using **Docker and Kubernetes**, including deployments and scaling strategies.
- Created and maintained **Helm charts** for Kubernetes application deployments and versioned releases.
- Built and supported **CI/CD pipelines using Jenkins**, integrating **Git** for source control and automated build and deployment workflows.
- Implemented **Git-based branching strategies** and managed code repositories for infrastructure and application pipelines.
- Configured **monitoring and alerting** using **Azure Monitor, Application Insights, AWS Cloud Watch**, and logging tools for proactive incident detection.
- Created **alert rules and dashboards** to monitor system health, application performance, and infrastructure availability.
- Performed **incident troubleshooting, root cause analysis**, and resolution to ensure minimal downtime.
- Collaborated with development, QA, and security teams to support **DevOps and Cloud Operations best practices**.
- Ensured cloud environments met **security, compliance, and operational standards** through IAM policies and access controls.

Cloud System Engineer | Anthology | Aug 2021 – March 2024

- Installed, upgraded, and maintained **Student Information System (SIS)** solutions across **On-Premises, Express, and Enterprise environments** using internal installation and deployment tools.
- Deployed and managed **Anthology applications** on the **Microsoft Azure platform** using **CI/CD pipelines**, ensuring reliable and repeatable releases.
- Provisioned and configured **Azure infrastructure resources** including **Virtual Machines (Windows & Linux), Storage Accounts, Virtual Networks (VNet), Subnets, and Azure Load Balancers**.
- Configured and managed **Azure App Services, App Service Plans, and Application Insights** for application hosting, monitoring, and performance tracking.
- Implemented **VM Scale Sets** to support high availability, scalability, and load-based auto-scaling for business-critical applications.
- Performed **cloud migration activities**, supporting the transition of applications and IT infrastructure from **On-Premises and hosted environments to Azure**.
- Administered **Active Directory and Azure Active Directory (AAD)**, including user/group management, permissions, and troubleshooting authentication issues.
- Configured **Azure AD Connect** to synchronize on-premises Active Directory with Azure Active Directory.
- Implemented **Azure security controls** including **RBAC, Conditional Access policies, Privileged Identity Management (PIM), and Multi-Factor Authentication (MFA)**.
- Configured **Azure AD B2B and B2C** for secure partner and external user access.
- Monitored **infrastructure and application health** using Azure monitoring tools, responding to alerts and restoring services within defined SLAs.
- Provided **Systems Management, Application Support, and Infrastructure Monitoring**, ensuring high availability and operational stability.
- Created and managed **IIS websites and application pools**, supporting application hosting and configuration changes.
- Performed **OS upgrades, Windows security patching, task scheduling, and system maintenance** to ensure compliance and stability.
- Supported **Citrix XenApp environments**, including application publishing and routine maintenance.
- Collected **memory dumps and diagnostic logs**, collaborating with development teams for root cause analysis and issue resolution.
- Conducted **pre-deployment validation and testing**, ensuring system compatibility and minimizing deployment risks.
- Troubleshot and resolved **deployment, infrastructure, and application issues**, reducing downtime and service disruptions.
- Provided **L2/L3 technical support**, resolving critical and escalated production issues in a timely manner.
- Performed **basic SQL DBA activities**, including database backup, restore, and security management.
- Collaborated with cross-functional teams and **mentored junior engineers**, promoting best practices and operational excellence.
- Demonstrated strong **troubleshooting, communication, and stakeholder coordination skills** in production support environments.
- Collecting Memory Dump and handing it over the DEV team for analysis.
- Conducted pre-deployment testing and validation to ensure system compatibility and stability.
- Trouble shooted deployment issues and provided timely resolution minimizing downtime and disruptions.
- Participated in on-call rotation to provide support for critical deployment activities outside of regular business hours.
- Provided technical support and troubleshooting assistance to end users and resolved Critical and escalated issues in timely manner.
- Performed OS upgrades and Deploy, Manage and scheduled windows security patches.
- Configuring and managing the task scheduler.

- Knowledge on implementation and configuration of Azure active directory B2B and B2C.
- Good Troubleshooting skills and strong communication skills.
- Good team player and Mentor and guide team members.
- Ability to handle SQL DBA activities like backup, restore, and managing securities.

Cloud Trainee System Engineer | Suisse Tech Partners India Pvt ltd | Feb 2021 – Aug 2021

- Designed, built, and maintained **cloud infrastructure and application platforms on Microsoft Azure**, leveraging **IaaS and PaaS service models**.
- Provisioned and managed **Windows and Linux Virtual Machines** on Azure, including VM sizing, disk management, and network configuration.
- Configured and supported **Azure Web App Services**, ensuring application availability, performance, and scalability.
- Supported **cloud operations and troubleshooting**, identifying and resolving infrastructure and application-level issues.
- Assisted in **cloud environment maintenance**, troubleshooting infrastructure and application issues
- Supported **CI/CD and deployment activities** by coordinating with development and operations teams.
- Maintained basic documentation for **cloud infrastructure, deployments, and operational procedures**.
- Implemented and maintained **CI/CD pipelines using Jenkins and Git**, enabling automated build, test, and deployment workflows.
- Containerized applications using **Docker** and deployed micro services on **Kubernetes (EKS / AKS)** with **Helm charts** for versioned and repeatable releases.
- Managed **AWS services** such as EC2, S3, IAM, VPC, RDS, and Cloud Watch, and **Azure services** including Virtual Machines, App Services, Azure AD, and Load Balancers.
- Applied **DevSecOps best practices**, including IAM roles, RBAC, MFA, secrets management, and access control policies.

SKILLS

- Cloud computing, cloud infrastructure.
- Microsoft Azure.
- Active Directory, Azure Active Directory.
- Basic SQL queries.
- Knowledge on Docker and K8S container
- Knowledge on Terraform and Ansible tools
- Knowledge in DNS, DHCP, SMTP, Telnet
- Knowledge in basic Bash and PowerShell scripting
- **Programming Languages:** Shell Scriptin, HTML, CSS,
- **Frameworks/Platforms:** AWS Cloud, Kubernetes, Helm, DevOps, Cloud Networking, Cloud IAM, AWS Kubernetes Engine, Docker.
- **Server Administration:** Linux Build Server, Apache Tomcat, Git, Jira, Jenkins
- **IaC Tools**: Terraform.
- **CI/CD Tools**: CI/CD with Jenkins Pipeline, Jenkins.

- **Build Environment Tool:** Makefile, Maven.
- **Databases:** MySQL.
- **Cloud Environment:** Aws
- **Operating Systems:** Windows, Linux.
- **Version Control Tool:** Git and GitHub.
- **Database :** SQL
- **Others:** SonarQube, Grafana, Prometheus

TOOLS

- SSMS for SQL
- Service Desk and Service now for incident/ticket.
- Citrix XenApp for applications.

CERTIFICATION

- I have Microsoft certified Azure fundamentals (AZ-900).

EDUCATION

Electronics & Communication Engineering | PES Institute of Technology and Management, **2020 Shivamogga.**
