Pavan Payke
Mobile: +91 9373203792
Email: pavanpayke98@gmail.com
Designation: Test Engineer

Career Objective

Dedicated professional with 6.5 **years** of experience in **software testing**, I am an excellent team player andpossess a positive attitude towards individual goals and an organizational goal.

Professional Summary

Manual Testing Skills Set

- Very Good understanding of **Software Development Life Cycle (SDLC)** as well as **Software Testing Life Cycle (STLC).**
- Participate in different **Agile Ceremonies**.
- Involved in **Test case design, Test case review, Test case execution, Defect tracking and Reporting using JIRA tool & Redmine Tool.**
- Performed different testing like **Sanity Testing, Functional Testing, Non-Functional Globalization Testing, Retesting and Regression Testing.**
- Experience in **test planning, test strategy, estimation, and scheduling.**
- Able to design the **Traceability Matrix** to map Business Requirements with **test Case.**
- Experience in **Database Testing** with MYSQL server by using **DDL** and **DML** commands.
- Experience in **API testing** using **POSTMAN** tool, Basic knowledge about **SOAP UI**.
- Experience in **Defect Life Cycle** / **Bug Life Cycle**.

Automation Testing Skills Set:

- Strong knowledge of Core Java and Object-Oriented Programming (OOP) concepts including **Inheritance, Polymorphism, Encapsulation, and Abstraction.**
- Hands-on experience in **Automation Testing using Selenium WebDriver** with Java for web-based applications.
- Expertise in **Cucumber BDD framework with Gherkin syntax** for writing feature files and implementing reusable Step Definitions and Hooks
- Experience in handling dynamic web elements, iFrames, alerts, pop-ups, dropdowns, mouse actions, and synchronization using explicit and implicit waits.
- Proficient in **TestNG framework including annotations,** assertions, test configuration, grouping, and parallel execution.
- Designed and implemented **Page Object Model (POM)** with Data-Driven and Hybrid Framework approaches.
- Experience in creating and maintaining reusable test scripts and regression test suites.
- Hands-on experience with **Maven** for build management and dependency handling.
- Integrated automation scripts with Jenkins for **CI/CD** pipeline execution.
- Experience in **Cross-Browser Testing on Chrome, Firefox, and Edge browsers.**
- Familiar with Git for version control and code repository management.
- Strong analytical, problem-solving, and communication skills with the ability to quickly learn and adapt to new technologies.
- Designed CI/CD pipeline strategy integrating Selenium suites with Jenkins and Maven.
- Worked on scalable automation architecture using Page Object Model and reusable utilities.
- Maintained and improved automation test coverage for critical business flows.
- Implemented parallel execution strategy using TestNG for faster execution.

- Basic exposure to Docker containers for test execution environments.
- Basic knowledge of Cloud platforms (AWS/Azure) for test environments.
- Performed basic performance testing understanding and validation.
- Practiced Shift-left testing by early validation with developers.
- Defined BDD implementation strategy using Cucumber and Gherkin.
- Integrated Allure reporting tools for detailed execution reports.
- Applied design patterns like Singleton, Factory and Page Object Model.
- Developed REST Assured framework design for API automation.

Technical Skills

- **Desktop Operating Systems: Windows Family**
- **Languages: Java and SQL.**
- **Database: MYSQL.**
- **Project Management Tool: JIRA.'**

Education

Completed **Bachelor of Computer Science** from **BATU University with First Class in 2019**

Completed **HHC in science** from **Pune board in 2016**

Completed **SSC** from **Pune board in 2014**

Projects

TEST ENGINEER •Mintifi finance PVT.LTD, Mumbai• 2022 – TILL DATE

Domain: Finance

Project Name: LOS , LMS

Client: India

Description: Mintifi is one of India's leading B2B supply chain financing platforms providing digital lending and embedded finance solutions to last-mile distributors and SMEs. The platform includes Loan Origination System (LOS) and Loan Management System (LMS) modules to manage the complete loan lifecycle — from customer onboarding, KYC, credit evaluation, and loan approval to disbursement, EMI processing, repayment tracking, and closure — through technology-driven workflows.

Project Name: Customer Web Application (Post-Disbursement Portal)

Client: India

Description:

Customer facing web application used after loan disbursement where customers manage their loan transactions and servicing activities. The application allows customers to create invoices, initiate DDR requests, perform repayments, update mobile number and email details, and raise support requests related to loan servicing and account operations.

Roles and Responsibilities

- Performed end-to-end Manual and Automation Testing across LOS and LMS modules.
- Tested customer onboarding, KYC validation, credit evaluation, loan approval, disbursement, EMI generation, and repayment workflows.
- Developed automation scripts using Selenium WebDriver (Java), TestNG, and Cucumber (BDD framework).
- Conducted API testing using Postman and automated REST APIs using RestAssured.
- Validated backend data using SQL queries to ensure financial data accuracy.
- Integrated automation suites with Jenkins CI/CD using Maven and Git.
- Executed regression, smoke, and sanity testing before production releases.
- Logged and tracked defects using Jira and collaborated with development teams for resolution.
- Participated in Agile/Scrum ceremonies including sprint planning, daily standups, and retrospectives

Curriculum vitae

TEST ANALYST-QA • Ulgulan Venture Private Limited, PUNE • 2019 TO 2022

Domain: Investment Banking
Project Name: TMS (Transaction Management System)
Client: Bridgepoint Capital, UK
Description: The project offers corporate, financial, and sponsor client's expert advice, innovative solutions, and outstanding execution for both simple and complex transactions and everything in between. It also provides multiple functions like Equity, Derivatives, Commodity, Currencies, etc.

Roles and Responsibilities

- Requirement Analysis: Understanding the requirements and communicating with BA team for better understanding of the requirements.
- Responsible for getting clarification from the Development Team regarding defects.
- Writing effective and optimized Test Cases in EXCEL Sheet.
- Performing Functional Testing and Regression Testing, Globalization Testing, Cross Browser Testing, UI Testing.
- Responsible for sending progress reports on the weekly basis.
- Logging the defect in Defect Tracking Tool (JIRA).
- Identify the test cases for Automation.
- Performing Multiple types of testing, and Automation Testing using Selenium WebDriver with JAVA.
- Used existing Hybrid Framework for the test script execution.
- Execute SQL queries to check table updates and data retrieval

Personal Details

Date of Birth: 13th Dec 1997
