PROFILE

Cloud DevOps Engineer with 5+ years of experience in designing, implementing, and managing CI/CD pipelines, cloud infrastructure, and container orchestration. Skilled in automating deployment processes, ensuring system reliability, and optimizing scalability in agile environments. Strong problem-solving skills and a proven track record of enhancing operational efficiencies through automation and infrastructure management.

SKILLS

- Continuous Integration/Continuous Deployment: Jenkins, AWS/Azure DevOps | Cloud Platforms: AWS, Azure| Containerization: Docker | Orchestration: Kubernetes, Helm, Docker Swarm | Version Control: Git, GitHub| Infrastructure as Code (IaC): AWS CloudFormation, Terraform| Scripting: Bash, Python, Shell Scripting | Linux |Nexus | Ansible | Database Management: MongoDB | Monitoring and Logging: Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana).
- Collaboration| Cross-functional| Best Practices| Teamwork| Problem-solving and Troubleshooting| Quick Learner| Time Management| Work Ethic.

PROFESSIONAL EXPERIENCE

DevOps Engineer | BotexAI Private Limited **(01/2021 – Till date)**

Project #2 – Infrastructure Management and CI/CD **(12/2023– 11/2025)**

- Designed and implemented CI/CD pipelines using **Jenkins**, automating build, test, and deployment processes, reducing manual errors by 30%.
- Managed cloud infrastructure on **AWS**, ensuring scalability and high availability for e-commerce applications.
- Managed containerized applications on **Kubernetes**, leveraging Docker for consistent deployments.
- Configured and maintained monitoring solutions using **Prometheus** and **Grafana**, enabling real-time performance tracking and incident resolution
- Developed **automation** scripts in Python and Bash to streamline operational tasks, enhancing efficiency by 25%.
- Provided **production support**, troubleshooting performance and functional issues, and ensuring adherence to SLAs.
- Utilized **Terraform** for infrastructure as code, reducing provisioning time by 40%.

Project #1 – Migration POC for Banking Client **(01/2021– 11/2023)**

- Led proof of concept for migrating on-premises banking applications to AWS, leveraging **EKS**, **ECS**, and **CloudFormation** for scalable cloud infrastructure.
- Configured ELK Stack for centralized logging and monitoring, reducing incident response time by 20%.
- Ensured security compliance by implementing **IAM policies, security groups, and secret management.**
- Orchestrated containerized applications on **Amazon EKS**, improving deployment reliability.
- Developed shell scripts for automation, minimizing manual infrastructure management by 80%.
- Supported agile teams using Jira and Confluence for project tracking and collaboration.
- Environment: - AWS (EC2, S3, RDS, VPC, ELB, EKS, ECS, Lambda, IAM, Auto Scaling) UNIX/LINUX.

EDUCATION

Bachelor of Technology in Computer Science and Engineering from RGPV University, Bhopal (M.P.) **(8.1 CGPA)**

CERTIFICATIONS

- AWS Certified Developer - Associate Certification
- AWS Certified Cloud Practitioner Certification

AWARDS & RECOGNITION

- Got nominated twice for Excellence Award.
- Awarded with Rising Star Award for scaling up quickly and delivering high performance in the project.
