SENIOR ASSOCIATE (IT)

Dynamic and results-oriented Senior Associate in IT with over 7.8 years of experience in managing and implementing technology solutions. Seeking leverage expertise in project management, system analysis, and team collaboration to contribute to innovative IT initiatives. Committed to driving efficiency and enhancing user experience through the application of best practices in software development and systems integration. Eager to join a forward-thinking organization to utilize technical skills and leadership capabilities to support business objectives and foster a culture of continuous improvement

PROFILE SUMMARY

- **Project Management:** Demonstrate strong project management skills by effectively planning, executing, and monitoring IT projects to ensure timely delivery and alignment with business objectives.
- **System Analysis and Design:** Conduct thorough system analysis to identify user requirements and design solutions that enhance functionality and performance within the organization's IT infrastructure.
- **Technical Support and Troubleshooting:** Provide expert technical support and troubleshooting for hardware and software issues, ensuring minimal downtime and maintaining high levels of user satisfaction.
- **Collaboration and Team Leadership:** Foster collaboration among cross-functional teams by leading discussions, facilitating knowledge sharing, and mentoring junior team members to enhance team performance.
- **Data Analysis and Reporting:** Utilize data analysis tools to interpret complex data sets and generate insightful reports that drive informed decision-making and strategic planning.
- **Software Development and Integration:** Apply software development methodologies to design, develop, and integrate applications that streamline processes and improve operational efficiency within the organization.
- **Awards & Appreciations:** Consistently recognized for exceptional performance, receiving **High Performing Employee awards** in 2016 and 2017 from the parent company, and again in 2023 and 2024,2025 from a **key client** (**ThermoFishers Scientific**), demonstrating a sustained commitment to excellence and delivering impactful results across diverse projects and teams.

CORE COMPETENCE

- Project Management
- System Analysis
- Technical Support
- Data Analysis
- Collaboration
- Process Improvement
- Team Leadership
- Software Development
- Risk Management
- Stakeholder Engagement
- Performance Metrics
- Change Management

TECHNICAL SKILLS

- **Operating Systems:** Windows - MAC / XP / 2000, UNIX, Linux
- **Programming Languages:** Java, J2ee, Python
- **Web Technologies:** JSP, Servlets, HTML, CSS, JavaScript.
- **Frameworks:** Play frame, Spring Boot, Angular JS
- **Database:** PostgreSQL, MySQL 5.0
- **AWS:** S3, EC2, RDS
- **Web Servers:** Apache Tomcat
- **IDE/ GUI Tools:** Eclipse, NetBeans, IntelliJ, Edit Plus, Visual Studio, GitHub CoPilot, Chat GPT.
- **Repository:** GIT, Bit-Bucket, perforce.
- **Others:** JIRA, Jenkins, Agile-tool Rally, Confluence pages

WORK EXPERIENCE

Cognizant Technology Solutions, Bangalore, India **Jan 2023 - Present**

Senior Associate
Client: ThermoFishers Scientific **Domain: Life Science**

Project: E-Commerce applications based on AEM based forms
Tech-Stack: Spring Boot, Java, Gradle, Rest API, AEM, HTML JS, CSS, JSP, AWS-S3/EC2 & RDS.

Description: AEM based E-commerce application to provide grantee delivery of forms to destinated target system. Main agenda of the application is to create the forms using AEM, when user submitted request through these forms, it should reach to endpoint. Once it reached to endpoint will provide the acknowledgement Id to track the application status.

Accountabilities:

- Lead project initiatives by collaborating with cross-functional teams to ensure timely delivery of high-quality outputs that align with organizational goals.
- Analyze and interpret complex data sets to provide actionable insights, facilitating informed decision-making and strategic planning across departments.

- Mentor and train junior associates, enhancing their skills and fostering a collaborative team environment to promote professional growth and knowledge sharing.
- Develop and implement process improvements that streamline operations, increase efficiency, and enhance overall productivity within the team.
- Prepare comprehensive reports and presentations for stakeholders, effectively communicating project status, outcomes, and recommendations to drive business objectives.
- Manage client relationships by addressing inquiries and resolving issues promptly, ensuring a high level of customer satisfaction and loyalty.

HCL Technologies Ltd, Bangalore, India **Nov 2019 – Jan 2023**
Technical Lead

Client: DELL-EMC2 **Domain: Storage**

Project-1: Viper- Storage domain product (Support project)
Tech-Stack: Java, Linux, Unix, Eclipse, Play Frame

Description: The EMC Viper Controller provides a single, automated way to provision and deliver storage resources. Works with EMC products: VMAX, VNX, VNXe3200, VPLEX, Isilon, RecoverPoint, Viper SRM, XtremIO, Data Domain, and VCE Vblock Systems. Integrates with third-party storage: Dell, Hitachi Data Systems (HDS), HP, IBM, NetApp, Oracle and SolidFire

Project-2: Voyager System Configuration (VPLEX)
Tech-Stack: Voyager VPLEX 7.0, Vplex-cli, Idrac, Python, Ansible, Shell scripting, Linux.

Description: VPLEX is a virtual computer data storage product introduced by EMC. Development of Voyager VPLEX platform which delivers continuous data availability, transparent data mobility, and non-disruptive data migration for mission critical applications

Project-3: AVAMAR- Storage domain Product
Tech-Stack: Spring boot, java8, Maven, Perforce, Rest API, Angular-2, Clarity Design framework.

Description: Dell EMC Avamar enables fast, efficient backup and recovery through its integrated variable- length deduplication technology. Avamar is optimized for fast, daily full backups of physical and virtual environments, NAS servers, enterprise applications, remote offices and desktops/laptops. Avamar is available as a virtual edition or as a component of Dell EMC Data Protection Suite, which offers you a complete suite of data protection software options.

Accountabilities:
- Oversaw project development by coordinating technical teams and ensuring adherence to project timelines and specifications, resulting in successful project completions.
- Designed and implemented software architecture that improved system performance and scalability, leading to enhanced user experience and reduced downtime.
- Conducted code reviews and provided mentorship to junior developers, fostering a culture of continuous learning and maintaining high-quality coding standards within the team.
- Collaborated with cross-functional teams to gather requirements and translate them into technical specifications, facilitating seamless integration of new features and enhancements.

Exilant Technologies (Quest-Global), Bangalore, India **May 2018 – Nov 2019**
Lead Engineer
Client: Apple **Domain: Enterprise Content Management**

Project-1: Apple Docs Upgrade – Alfresco
Tech-Stack**:** Java SE 6, Servlets, JSP, HTML.

Description: Apple Docs had to be migrated to a new VM as the old one was set to be decommissioned. Also, the CMS used had to be upgraded to a newer version. Current Version 3.2 and upgraded to3.4.14.24. Modifying the project structure and code as per the alfresco documents and bringing up application in local system.

Project-2: HAYSTACK **Domain: Enterprise Content Management**
Tech-Stack**:** Java SE 6, Spring2.6, Servlets, JSP, Hibernate, Oracle 10g, HTML, Eclipse

Description: Legacy search application built with Java 1.5 is upgraded to Java 8 and Spring boot. Application is used to retrieve the records from Sonar, Radar application based on client requirement by using solar indexing tool.

Client: GE **Domain: Transport**
Project-3: DMA (DRIVER MOBILE APP)
Tech-Stack**:** Java, Angular-2, Jasmine /Karma, PG Admin, HTML, CSS, JavaScript, Play Frame.

Description: This is Hybrid application APP for drivers to manage their Pre-Checking and Pre-Checkout containers. The OASIS Driver Mobile Application (DMA) is a solution that is installed on a smartphone (iOS or Android) and allows truck drivers to in-gate and out-gate units into intermodal yards and to report transactions directly into OASIS system. DMA includes features designed to reduce time at the gate, reduce driver in-terminal dwell time, and establish a method of direct communication between the terminal management and the drivers. DMA also comes with a web-based portal that allows driver registration and account maintenance.

Accountabilities:
- Directed engineering projects from conception to completion, ensuring alignment with organizational goals and adherence to industry standards, which resulted in successful project launches.
- Spearheaded the design and development of innovative engineering solutions, optimizing system performance and efficiency while reducing operational costs.
- Mentored and guided a team of engineers, providing technical expertise and fostering professional growth, which enhanced team collaboration and productivity.
- Coordinated cross-functional teams to address project challenges and streamline communication, ensuring timely resolution of issues and alignment on project objectives.

PREVIOUS ENGAGEMENTS

KoneCranes, Bangalore, India
Senior Engineer Jan 2017 – May 2018

Demag Cranes, Bangalore, India
Commissioning Engineer Dec 2011 – Dec 2016

Bucyrus India Pvt Ltd (Caterpillar Inc), Bangalore, India
Engineer Jan 2009 – Nov 2011

EDUCATION

BE – EEE, Andhra University Mar 2007
Diploma – EEE, Board of S.B.T.E.T, Hyderabad Jun 2003

TRAINING AND CERTIFICATIONS

Participated in hackathon to present IOT project

PERSONAL DETAILS

- **Nationality:** Indian
- **Date of Birth:** 20 Dec 1983
