Professional Summary

Detail-oriented IT Analyst with experience in supporting and improving SaaS-based web & mobile platforms. Skilled in system engineering, deployment support, incident/problem management, and technical troubleshooting. Strong collaborator with a record of improving platform performance and reducing operational issues while working with global teams.

Professional Experience

Product Solution Engineer | HigherEd BPO Pvt. Ltd.
Client: Ready Education – CampusGroups | Dec 2023 – Present

- Led system engineering and production support for the CampusGroups SaaS platform, ensuring high reliability and scalability across web and mobile applications.
- Worked closely with Ready Education's product and engineering teams to resolve escalations, optimize platform performance, and drive continuous product improvements.
- Conducted detailed root cause analysis (RCA) on recurring issues and implemented long-term corrective actions, improving stability and reducing incident recurrence.
- Supported deployment cycles, version upgrades, and post-release validation, contributing to zero-downtime releases for university clients.
- Monitored system health, third-party integrations, and SLAs using analytical tools to proactively detect and prevent failures.
- Created and maintained internal SOPs, knowledge base articles, and technical documentation to streamline operations and reduce onboarding time.
- Contributed to the design and rollout of an AI-driven self-service chatbot, increasing user enablement and reducing ticket volume / turnaround time.
- Recognized for excellence with the Star Performer Award (April 2025) from Ready Education's CEO and a Shining Star Award within the first six months.

Key Achievements
🏆 Star Performer Award – April 2025
