VINEET KUMAR KHATRI

PRINCIPAL AI & DATA SOLUTIONS ARCHITECT

ACHEIVEMENTS

- Microsoft Certified Azure AI Engineer Associate

CONTACT

+91 9312526337

vineet.khatri1@gmail.com

Pune, INDIA

linkedin.com/in/vineet-khatri

SKILLS

- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

TECH SKILLS

- Agentic AI
- GenAI
- Hadoop
- Spark
- Hive
- Python
- Kafka
- Data Lakehouse
- Snowflake
- Databricks
- Docker
- Unix shell Scripting
- ORACLE SQL
- Azure
- AWS
- Microservices
- In - Prem
- Data Modelling

PROFILE

- Experienced **Principal Data Architect** and building **Agentic AI** and **Generative AI** solutions using **OpenAI** via Azure with over total **14+ years** of expertise in designing and implementing large-scale data architectures that maximise performance, efficiency and cloud-native data solutions.
- Led AI and data architecture strategy for pre-sales and RFP engagements, translating complex business requirements into scalable, compliant, and high-impact **AI-driven solutions** to support deal wins.
- Proficient in **data migration**, **data Lakehouse** implementation, and performance tuning using cutting-edge **BigData** and **Agentic AI** technologies such as **RAG**, **LLM**, **Lang Graph**, **PySpark**, **Databricks**, **Kafka**, **Python**, **Azure**, **AWS**..
- Strong problem-solving abilities, with a proven track record of identifying issues and implementing efficient solutions.
- Mentored junior team members, providing guidance on technical challenges.

WORK EXPERIENCE

LTIMindtree — DEC 2020 - PRESENT

Principal AI & Data Solutions Architect

Title: Enterprise Data & AI Platform Architecture

- **Owned the end-to-end architecture of an enterprise-scale, agentic AI–enabled data platform** on Microsoft Azure, built on Azure Databricks, leveraging **Delta Lake**, **PySpark**, **Vector DB** and **Delta Live Tables (DLT)** to support **high-volume, regulated ELT workloads**
- Defined a **cloud-native architectural strategy for intelligent schema evolution, leveraging LLM-based automation (LangChain, LangGraph)** to detect, evaluate, and govern schema drift across **Bronze–Silver–Gold (Medallion) layers**
- Scaled **self-healing, policy-aware data pipelines** with **automated decisioning,** improving **SLA adherence,MTTR,incident response time, and platform resilience** while meeting **GDPR and HIPAA compliance requirements.**

Title : Text-to-SQL Generation (Generative AI for Business Reporting)

- Built a **natural language to SQL** generation system using **OpenAI** models and **RAG** deployed on Azure, enabling business users to query databases using plain English.
- Designed and deployed a secure, scalable solution integrated with enterprise data sources to support ad hoc reporting needs.
- Streamlined **complex SQL generation** for non-technical users, reducing reliance on data teams and improving reporting turnaround time.

Title: Lakehouse Migration, Performance & Cost Optimization (Delta Format)

- **Architected** end-to-end, **cloud-native data platforms** leveraging **Azure Data Lake, Azure Synapse Analytics, and Azure Databricks,** implementing **Spark-based ETL/ELT workflows, Delta Lakehouse architecture, and enterprise data governance** using **Azure Purview and Unity Catalog.**
- **Optimized data pipelines** using **Databricks Declarative Pipelines, PySpark,** and **SQL, reducing compute consumption (OCPU cores) and** improving **end-to-end processing performance by ~40%.**
- **Implemented enterprise-grade vault management and secure emailing systems, GDPR/HIPAA compliance, and reliable operational alerts.**
- **Designed and optimized data models** in **Snowflake,** leveraging features like **Time Travel, Zero-Copy Cloning** and **Snowpipe** for data ingestion

EXPERTISE

TRAINED IN SPARK

TRAINED IN PYTHON

TRAINED IN MULTI CLOUD AND IN-PREM

EDUCATION

Bachelor of Technology
KEC, Ghaziabad
G.B.T.U.
JUL 2008- JUN-2011

LANGUAGES

- English (Fluent)
- Hindi (Fluent)

WORK EXPERIENCE

xoriant DEC 2017 - DEC 2020

Lead Data Architect

Title : Data Integration System (Banking Sector)

- Designed and implemented scalable data architectures for enterprise-level applications where incorporating ETL Feature with Big Data to Extract Transform and Load Huge amount of data..
- Spark Development and Implementation on Hadoop
- ·Fine Tune Spark Application for high performance and throughput.
- Implemented ETL Process and Applied Edit-Check Rules.

Title: Data Archival (Banking Sector)

- ·Loading From disparate dataset into Spark dataframe
- ·Created Parallel session on the basis of partitiions
- Developed Spark Application for archiving the tables dynamically.

Accenture Jun 2017 - Nov 2017

Application Development Senior Analyst

Title : Anti Money Laundering System (Banking Sector)

- ·Assign Schema and create Hive Table
- ·Created Hive Queries for for 3 layers that is Core/ Raw HQL, Staging and Final HQL tables for Analytics
- Created Python Rest Api which fetched technical metadata from Cloudera Navigator and populated into DSE graph using Gremlin Language

HCLTech Nov 2014 - Jun 2017

Senior Software Engineer

Title : Preform Call Drop Analysis (Telecom Sector)

- ·Loading from disparate data sets into Spark dataframe
- ·Created Parallel Session on the basis of partitions
- ·Perfomance Tunning Spark Application
- ·Used Spark-Streaming APIs to perform necessary transformations and actions which gets the data from Kafka in near real time.
- ·Experience in migrating the data using Sqoop from HDFS to Relational Database System and vice-versa according to client's requirement.
- ·Wrote Spark SQL, Hive programs for Analysis of data
- ·Written the Apache Hive scripts to process the HDFS data.
- ·Written UDF for various business requirements in Python.
- Implemented Partitioning, Dynamic Partitions, Buckets in HIVE

IBM IBM on the pay role of EMITTANCE PVT LTD Jun 2012 - Nov 2014

Software Engineer

Title : Telecome Advance Business Solutions (TABS)

- ·Creation of Functions, Procedures, Packages, Triggers and Views In Oracle PL/SQL
- ·Automation of manual work like Reconciliation process using shell script and procedures
- Mediation Configuration

Nucleus Software Exports Ltd Nov 2011 - May 2012

Project Intern

Title : Power Card (Banking Sector)

- ·Upload CSV files' data into table using SQL Loader
- ·Apply filtration rule on incoming files and dump on down streams
- ·Created Batch Script to manage Space issue at Servers.
- Detecting Errors while executing processes and resolving bugs
